New in 2020 CRSS

Data Elements With Changes

Below is a list of CRSS data elements that have substantial changes for 2020. Changes are denoted in bold/italics for additions and strikethrough for deletions. More detailed information on each data element can be found in the FARS/CRSS Coding and Validation Manual. The National Highway Traffic Safety Administration's National Center for Statistics and Analysis (NCSA) publishes these manuals for each year of data collection and they can be found at:

NM13	Nmdistract.MNMDSTRD	Nmdistract.NMDISTRACT	Non-Motorist Distracted By

The data elements in RED are new to 2020 CRSS.

The data elements in BLUE are changed in 2020 CRSS.

New and Noteworthy

The Analytical User's Manual is updated annually to reflect necessary revisions and ensure quality data collection and analysis. CRSS data elements evolve based on any number of factors including the needs of end-users. Changes are made with careful consideration and collaboration among key stakeholders. Below are the notable changes, challenges, reclassifications, or other issues the analyst should be aware of for this year.

The Effect of the COVID-19 Pandemic on CRSS Data Collection

Beginning in the first quarter of 2020, the COVID-19 pandemic presented several challenges to CRSS data collection. As States implemented shutdowns and closures to limit exposure to COVID-19, several police jurisdictions closed their doors to non-essential personnel, thus the CRSS Samplers were unable to access crash reports for varying amounts of time. Additionally, some jurisdictions stopped responding to Property Damage Only (PDO) crashes and opted to complete citizen reports or desk reports for PDO motor vehicle crashes. CRSS only samples from police reported crashes on official crash reports. Thus, there was a decline in CRSS applicable cases to sample.

COVID-19 also had an impact on the transmission of crash report data. As agencies needed time to coordinate working remotely, the processes to key in and upload electronic crash reports were delayed across various sample sites ranging from weeks to months before NHTSA was able to receive data. The pandemic has impacted CRSS data collection, but NHTSA has adapted to the new safety protocols and changes in sampling schedules with police jurisdictions and has extended listings of crashes to incorporate the delay of receiving crash reports. The situation brought on by the current crisis is unlike anything our administration has experienced before. Nevertheless, NHTSA will continue to explore traffic safety during the COVID-19 pandemic.

CRSS Generalized Variance Function Study

In 2020 NHTSA's Mathematical Analysis Division completed a study to establish the General Variance Functions for CRSS. As for any probability-based sample, the estimates generated from CRSS data are subject to sampling errors. The magnitude of sampling error depends on the study variable, the estimator used, and the sample design. CRSS data is collected under a complex survey design with features such as multistage sampling, stratification, and unequal selection probabilities to ensure it is a nationally representative sample. CRSS case weights are derived corresponding to its complex design features in order to produce unbiased and robust estimates.

Estimation methods and computer software have been developed to make estimates from complex survey data. Specialized procedures for complex survey data analysis, such as SAS PROC SURVEY procedures and SUDAAN procedures, can be used in CRSS data analysis along with proper design statements to take the complex survey design into account. (See more on these methods in [Appendix F: Standard Errors](#)) However, for users who do not have access to specialized software and wish to have a quick assessment of the magnitude of the standard errors of CRSS estimates, the generalized variance functions can be used to generate ballpark standard error estimates for a large quantity of estimates. The study is published in the NHTSA Technical Report [Crash Report Sampling System: Generalized Variance Functions](#).

Addition of VIN-Decoded Data

Prior to 2020 the descriptive vehicle information in Vehicle Make, Vehicle Model, and Body Type were coded from information in the police crash reports and based on a Vehicle Make/Model/Body Type table maintained by NCSA for this purpose. Starting in 2020 this table will no longer be updated and a new set of data elements has been added to the Vehicle and Parkwork data files. These new data elements are:

- [*vPIC Make*](#)
- [*vPIC Model*](#)
- [*vPIC Body Class*](#)
- [*Final Stage Body Class*](#)
- [*Power Unit Gross Vehicle Weight Rating – From*](#)
- [*Power Unit Gross Vehicle Weight Rating – To*](#)
- [*Trailer Gross Vehicle Weight Rating*](#) (data collected up to three trailers)

Elements *vPIC Make*, *vPIC Model*, *vPIC Body Class*, and *Final Stage Body Class* are also added to Person data file.

These data elements are mostly derived from VIN decoding using NHTSA's tool, Product Information Catalog and Vehicle Listing (vPIC), which is based on the vehicle manufacturer submissions to NHTSA mandated by Federal Motor Vehicle Safety Standard (FMVSS) 49 Code of Federal Regulation (CFR) 565. If a vehicle VIN or trailer VIN can be decoded cleanly, such as with no errors or minor issues, *vPIC Make*, *vPIC Model*, *vPIC Body Class*, *Power Unit* or *Trailer Gross Vehicle Weight Rating (From and To)* are coded using information derived from vPIC VIN decoder. If a VIN cannot be decoded cleanly or there is no VIN reported in the police crash report, these elements are coded by analysts using the information on the crash report. *Final Stage Body Class* is applicable only to incomplete vehicles and always coded using the information from police crash report.

To further differentiate between these new data elements and the historic NCSA descriptions for Make, Model, and Body Type, the following data elements have been renamed.

- Vehicle Make → *NCSA Make*
- Vehicle Model → *NCSA Model*
- Body Type → *NCSA Body Type*

Also, *Gross Vehicle Weight Ratio/Gross Vehicle Combination Ratio (GVWR/GCWR)* has been discontinued in response to the new vPIC data elements that collect GVWR for the power unit (upper and lower limits) and any trailers separately. The attributes represent vehicle Class 1 to Class 8.

It is important to note that the new VIN-derived data elements will eventually replace the NCSA ones and result in new body class designations that will differ from NCSA's historic body type classifications. See [Appendix C: Analytical Classification of Select CRSS Data Elements](#) for new classifications based on vPIC Body Class.

In addition to the data elements added to the existing data files, two additional data files are available with many data elements decoded from the VIN, one for vehicles (Vpicdecode) and one for trailers (Vpictrailerdecode). These data files have their own user manual, the *Product Information Catalog and Vehicle Listing (vPIC) Analytical User's Manual*, found in the [NCSA Publications- Manuals and Documentation](#) section of NHTSA's website.

For more information on NHTSA's Product Information Catalog and Vehicle Listing (vPIC), go to <https://vpic.nhtsa.dot.gov/>.

Addition of Non-Motorist Person Types

The data element [Person Type](#) has expanded to collect more specific types of non-motorists on motorized or non-motorized personal conveyances. A personal conveyance is a device, other than a transport device, used by a pedestrian for personal mobility assistance or recreation. These devices can be motorized or human powered, but not propelled by pedaling. Examples include rideable toys, roller skates, motorized and non-motorized skateboards, scooters and wheelchairs. The new attributes replace attribute 8 (Persons on Personal Conveyances) and include:

- 11 (Person on Motorized Personal Conveyance)
- 12 (Person on Non-Motorized Personal Conveyance)
- 13 (Person on Personal Conveyance, Unknown if Motorized or Non-Motorized)

These additions were necessitated by the growing variety and use of these devices. This allows these devices to be more clearly identified and targeted in analyses.

In addition, the NCSA [Person Type Classifications](#) in *Appendix C: Analytical Classification of Select CRSS Data Elements* were updated accordingly.

Change from Multiple Elements to Single Elements that Allow Selection of Multiple Values

Prior to 2020 *Atmospheric Conditions* and the "Related Factor" data elements were comprised of multiple elements to allow the selection of more than one attribute. For example, Crash Related Factors was made up of three elements (i.e., CF1, CF2, CF3) allowing up to three selections. This format, however, limited the number of selections to the available number of elements. Beginning in 2020 these elements have been changed to a single element that allows for the selection of all attributes that apply.

Changes to SAS Names

In 2020 the conversion of six more data elements to allow the coding of multiple attributes brought the total to 17 data files that store these "select all that apply" elements. With this many data files and elements, it was an appropriate time to standardize the SAS names for this type of element. It was also an opportunity to update the SAS names for two of these elements where the element name had changed but the SAS name had not (i.e., Non Motorist Action/Circumstances and Non-Motorist Contributing Circumstances). Nine SAS names were updated and are identified in the [Summary of the SAS Naming Changes](#).

Changes to Imputed Elements

The imputed data element for *Relation to Junction-Within Interchange Area* (RELJCT1_IM) was added back to CRSS in 2020 after being removed in 2019. During the 2019 data collection year, the data element's unknown rate increased to over 60 percent due to additional quality control measures during the data collection process. For the 2020 data collection year, NHTSA incorporated a geolocator tool to assist in coding *Relation to Junction-Within Interchange Area*. A little over 7 percent of the data element was unknown or not reported in 2020 and NHTSA decided to reinstate *Relation to Junction – Within Interchange Area* as a candidate for imputation.

In addition, *Hit and Run* (HITRUN_IM) was removed from the imputation process due to the removal of the “Reported as Unknown” attribute (0.01% in 2019). More details on the imputation process can be found in [CRSS Imputation](#) section.

Analysis of Police-Reported Alcohol Involvement Elements

In recent years the percentage of “Not Reported” cases for *Police-Reported Alcohol Involvement* (DRINKING) increased to over 40 percent. In 2020 the percentage of unknown or not reported cases increased to over 45 percent. This percentage increase can be attributed to NHTSA's improved quality control over the data collection year. This process included but was not limited to establishing state specific coding instructions to help coders with the interpretation of the police crash report fields. In addition, NHTSA implemented new quality assurance plans to improve coding accuracy across the data collection system. Two other data elements, *Alcohol Involved in Crash* (ALCOHOL) and *Driver Drinking in Vehicle* (VEH_ALCH), are derived from the *Police-Reported Alcohol Involvement* data element. Additionally, *Police-Reported Alcohol Involvement* is the basis of the imputed data element, *Imputed Police-Reported Involvement* (PERALCH_IM), which is used to derive *Imputed Alcohol Involved in Crash* (ALCHL_IM) and *Imputed Driver Drinking in Vehicle* (V_ALCH_IM). NHTSA continues to impute the drinking related data elements, but analysts should be aware when using these data elements for analysis.

Limitations of Automated Driving Systems (ADS) Data in CRSS

In 2020, NHTSA continued to collect the data element Motor Vehicle Automated Driving Systems (ADS) that was added in the Fatality Analysis Reporting System (FARS) and the Crash Report Sampling System (CRSS) in 2019. These data are intended for crash avoidance and countermeasure research and development. However, when extensive quality control checks and analyses were performed using the 2019 and 2020 data, the results of the analyses highlighted inconsistencies in collecting and accurately identifying specifics with these elements that can lead to varying or misleading results. Limitations to collection include: only a small number of States have crash reports with ADS fields compatible with the FARS ADS definitions and attributes; a few States have crash reports with ADS-related fields, but these States' instructions and/or crash report element structures are not compatible with the FARS ADS definitions and attributes; and, the majority of States do not have an ADS field on their crash reports - identification of the presence of vehicle automation is only possible through the crash report narrative. At this time, the FARS ADS data are largely coded as “Not Reported.”

Consequently, NHTSA has removed the ADS data elements from the 2019 and 2020 FARS and CRSS while additional research is conducted on how improvements can be made. However,

NHTSA will continue to collect these data for our internal quality control, review and analysis purposes only. The following data elements have been removed from the 2019 and 2020 files:

- Vehicle.ADS_PRES – Automation System or Systems Present in Vehicle
- Vehicle.ADS_LEV – Highest Automation System Level Present in Vehicle
- Vehicle. ADS_ENG – Highest Automation System Level Engaged at Time of Crash

Introduction

One of NHTSA's primary objectives is to reduce the human toll and property damage that motor vehicle traffic crashes inflict on our society. Crashes each year result in thousands of lives lost, hundreds of thousands of injured victims, and billions of dollars in property damage. Accurate data are required to support the development, implementation, and assessment of highway safety programs aimed at reducing this toll. NHTSA uses data from many sources, including the Crash Report Sampling System (CRSS). CRSS is a sample of police-reported crashes involving all types of motor vehicles, pedestrians, and cyclists, ranging from property-damage-only crashes to those that result in fatalities. CRSS is used to estimate the overall crash picture, identify highway safety problem areas, measure trends, drive consumer information initiatives, and form the basis for cost and benefit analyses of highway safety initiatives and regulations.

The CRSS obtains its data from a nationally representative probability sample selected from the more than six million police-reported crashes that occur annually. Although various sources suggest that there are many more crashes that are not reported to the police, the majority of these unreported crashes involve only minor property damage and no significant personal injury. By restricting attention to police-reported crashes, the CRSS concentrates on those crashes of greatest concern to the highway safety community and the general public.

This multi-year analytical user's manual provides documentation on the evolution of coding practices of the CRSS from 2016 to 2020. The manual will continue to grow each year and present the historical coding of the CRSS from inception through present. It includes documentation on the data elements that are contained in the CRSS and other useful information that will enable the users to become familiar with the data system. The FARS/CRSS Coding and Validation Manual provides more detailed definitions and coding rules for each data element and attribute. This manual is available at:

[NCSA Publications — Manuals and Documentation — CRSS.](#)

The compilation of CRSS data is a priority for NHTSA. These data store valuable information that will be preserved over time and are available for present and future use. This analytical user's manual should help improve the usefulness and accessibility of the data. With the exception of personal notes, there is no reason to keep older versions of this reference manual. All information in earlier editions has been retained in this newer version.

CRSS Sample Design

Beginning 2016, as part of the effort to modernize NHTSA's data collection system, NCSA designed two new national probability-based crash sampling systems – the CRSS to replace the NASS GES and the CISS to replace the CDS. CRSS was designed completely independent of GES or CISS. CRSS has the same scope as GES: all police reported motor vehicle crashes that occur on a trafficway. The source of the information for CRSS continues solely to be the police crash report.

The CRSS police crash report sample is selected in multiple stages to produce a nationally representative probability sample since nationwide direct selection is infeasible. A brief description of the selection process at each of the three stages is given below.

1st Stage— PSU Sample: At the first stage, 3,117 counties in the country were grouped into 707 primary sampling units (PSU). U.S. Territories, some remote areas in Alaska, and small islands in Hawaii were excluded. A CRSS PSU is either a county or a group of counties. The 707 PSUs in the PSU frame were stratified into 50 strata by the four Census regions, urbanicity, vehicle miles traveled, total number of crashes, total truck miles traveled, and road miles. First, 101 PSUs were selected using a stratified probability-proportional-to-size (PPS) sampling method. Then a sequence of sub-samples was selected from the original 101 PSU sample and strata were collapsed if necessary. This produced a sequence of nested PSU samples with different sample sizes selected from the collapsed strata. This sequence of nested PSU samples provides NHTSA flexibility to change and scale the PSU sample size in the future without reselecting the sample. Therefore, the final PSU sample was the result of a multiphase sampling mechanism in which the PSU selection probability is still approximately PPS. In the 2020 CRSS, 61 PSUs were selected from 25 PSU strata and 60 PSUs responded. (Note: In the 2016 CRSS, 60 PSUs were selected and 53 responded.)

2nd Stage – PJ Sample: The secondary sampling units (SSU) are police jurisdictions (PJs) or groups of police jurisdictions. Within each selected PSU, PJs were stratified into three strata by their measure of size (MOS) that is a combination of crash counts in six categories of interest. A Pareto sampling method was used to select PJ samples from each PJ strata. This method produces overlapping samples when the sample is reselected. This method reduces the potential of changes to the existing PJ sample when a new PJ sample has to be selected because of PJ frame changes. The PJ inclusion probability under Pareto sampling is approximately PPS. In the 2016 CRSS, a total of 350 SSUs were selected. In the 2020 CRSS, 301 PJs were selected, and 288 PJs responded.

Weight adjustments were made to mitigate the potential bias caused by the non-responding PJs. For some PSUs, NHTSA receives police crash reports (i.e., tertiary sampling unit) in electronic format through the Electronic Data Transfer (EDT) system. In these EDT PSUs, the police crash report sample can be selected directly from all police crash reports of the EDT PSU. In 2020 the second stage sample selection is conducted for 19 EDT PSUs by assigning all police crash reports to one consolidated (pseudo) PJ within an EDT PSU and selecting that PJ with certainty. This leads to a reduction in the number of selected PJs. NHTSA expects more PSUs to provide crash reports through the EDT system in the future.

3rd Stage – Police Crash Report Sample: The tertiary sampling units (TSU) are the police crash reports. The CRSS data collectors periodically obtain police crash reports from each selected PJ. During each collection, all new police crash reports accumulated since the last

collection are sequentially stratified into nine police crash report strata (see table below). These nine strata were formed based on the results of NHTSA's internal and public data needs assessments. The stratification allows NHTSA to over-sample in Strata 2-6.

From each stratum, a systematic sampling method is used to select the police crash report sample. The sampling intervals are determined in such a way that the final weights are approximately equal for all the police crash reports in the same stratum with the ultimate aim of reducing the sampling variance for the domain estimates. The target annual sample size is approximately 50,000 police crash reports.

Please refer to the NHTSA Technical Reports [Crash Report Sampling System: Sample Design and Weighting](#) and [Crash Report Sampling System: Design Overview, Analytic Guidance, and FAQs](#) for more in-depth discussions of the CRSS sample design.

CRSS Police Crash Report Domain Definition, Target Sample Allocation, and Population Distribution

Stratum	Description (Hierarchical Structure)	Target Percent of Sample	Estimated Percent of Population¹
2	Crashes with killed or injured pedestrian	9%	1.9%
3	Crashes with killed or injured motorcycle rider	6%	1.5%
4	LMY passenger vehicle crashes with killed or incapacitated occupant	4%	0.4%
5	NLMY passenger vehicle crashes with killed or incapacitated occupant	7%	1.6%
6	LMY passenger vehicle crashes with injured occupant	14%	6.8%
7	Crashes involving medium or heavy truck or bus	6%	7.9%
8	NLMY passenger vehicle crashes with injured occupant	12%	14.3%
9	LMY passenger vehicle crashes AND no one is killed or injured	22%	27.0%
10	Crashes not in strata 2-9	20%	38.7%
Late Model Year (LMY) passenger vehicle: ≤ 4 years old, Non-Late Model Year (NLMY) passenger vehicle: ≥ 5 years old			

¹ Estimated percentage of population is based on 2020 CRSS estimates.

CRSS Operations

The CRSS obtains its data from a nationally representative probability sample selected from the more than six million police-reported crashes that occur annually. To be eligible for the CRSS sample, a crash report must be completed by the police; it must involve at least one motor vehicle traveling on a trafficway; and the crash must result in property damage, injury, or death.

These crash reports are chosen from 60 selected sites across the United States that reflect the geography, population, miles driven, and crashes in the United States. CRSS data collectors review crash reports from hundreds of law enforcement agencies within the sites, systematically sampling tens of thousands of crash reports each year. The collectors obtain copies of the selected crash reports and send them to a central location for coding. No other data is collected beyond that in the selected crash reports.

Trained personnel interpret and code data directly from the crash reports into an electronic data file. Approximately 120 data elements are coded into a common format. After coding, quality checks are performed on the data to ensure validity and consistency. When these are completed, CRSS data files and coding documentation become publicly available.

The CRSS data are also used to respond to requests from the international and national highway safety communities, State and local governments, the Congress, Federal agencies, research organizations, industry, the media, and the public.

National Estimates

The CRSS police crash report sample is a complex multi-stage, stratified sample with unequal selection probabilities. Estimates from CRSS data must be properly weighted to ensure unbiased and robust estimates. The CRSS weights were created using the following steps:

1. Calculate base weights - the inverse of selection probabilities - at all three stages (PSU, PJ, and Police Crash Report) to correct the selection bias caused by the unequal selection probabilities.
2. Adjust the base weights for non-response at all three stages to correct potential non-response bias.
3. Adjust the weights for duplicate crashes that were identified post sampling.
4. Calibrate PJ and Police Crash Report weights using the PSU level total crash report stratum counts to further correct potential non-response bias and coverage bias.
5. Calibrate case weights by benchmarking Census resident population counts and FARS crash counts.

The final CRSS weight variable that incorporates the above steps is called WEIGHT in the CRSS analysis file. Please refer to the NHTSA Technical Report [Crash Report Sampling System: Sample Design and Weighting](#) for a more in-depth discussion on the CRSS weighting procedure.

Complex sample design features employed in CRSS data collection should be considered in analysis of the CRSS data. Treating the CRSS sample as a simple random sample in estimation may cause severe bias to both point estimates and standard error estimates. Specialized computer software for complex survey data analysis, such as SAS PROC SURVEY procedures and SUDAAN procedures, should be used for CRSS data analysis along with proper design statements. Because of the low PSU level sampling rates, the CRSS PSU sample can be treated as a with-replacement sample with unequal selection probabilities. This simplifies the variance estimation.

In the CRSS analysis file, the variable PSUSTRAT defines the PSU strata, and PSU_VAR identifies sampled PSUs for variance estimation. Also, certainty PSU is treated as a stratum in PSUSTRAT. The PJs selected in the certainty PSU are treated as PSUs in PSU_VAR.

Because of the limited PSU sample size, CRSS data is mainly for national or major domain estimates. For other smaller analysis domains, the point estimates may have large standard errors.

Please refer to the NHTSA Technical Report [Crash Report Sampling System: Design Overview, Analytic Guidance, and FAQs](#) for more detailed information on CRSS estimation and examples.

CRSS Imputation

CRSS data are obtained either directly from an item on the police crash report or by interpreting the information provided in the crash report through a review of the crash diagrams, the police officer's written summary of the crash, or combinations of data elements on the report. During this process of data acquisition, some records of the data elements are found missing or entered as "unknown" or "not reported" resulting in incomplete data for analysis. To offer more complete CRSS data for analysis, NHTSA imputes selected data elements from the Accident, Vehicle, and Person files as follows:

- ***Accident file:*** Alcohol Involved in Crash, Atmospheric Conditions, Crash Date (Day of Week), Crash time (Hour), Crash Time (Minute), First Harmful Event, Light Condition, Manner of Collision, Maximum Injury Severity in Crash, Number of Injured in Crash, Relation to Junction – Within Interchange Area, Relation to Junction – Specific Location;
- ***Vehicle file:*** Areas of Impact- Initial Contact Point, Body Type, Driver Drinking in Vehicle, Number of Injured in Vehicle, Maximum Injury Severity in Vehicle, Most Harmful Event, Vehicle Model Year, Movement Prior to Critical Event;
- ***Person file:*** Age, Police-Reported Alcohol Involvement, Ejection, Injury Severity, Seating Position, Sex.

The above data elements are consistent with the ones imputed in the corresponding three files of NASS GES data from 2010 to 2015. More details about GES data imputation in 2015 and earlier years are available in the [1988-2015 NASS GES Analytical User's Manual](#).

The imputation process for CRSS data imputes a single value for each unknown or not reported value. In other words, instead of filling in an unknown or not reported value with a set of plausible values, a single estimated value is used to replace the unknown or not reported value. The procedure is a multivariate imputation of each selected data element by means of its covariates. If this process produces inconsistent imputed values, a separate univariate imputation is conducted to impute the inconsistent imputed values. In the case of "Body Type," however, imputation is done by univariate imputation only.

The multivariate imputation is carried out by sequential regression modeling in which logistic regression models estimate unknown or not reported values for the categorical data elements, and linear regression models for the continuous data elements. In each case, the stepwise regression algorithm automatically selects the covariates and computes the imputed (predicted) values of the data element. This process is done using the SAS callable software "IVEware" developed at the University of Michigan (<http://www.isr.umich.edu/src/smp/ive/>). This multivariate imputation procedure may produce imputed values inconsistent with other observed values or may terminate prematurely because of the number of iterations or other convergence criteria provisioned in the software. Then the univariate imputation procedure will be used to impute the inconsistent values or the remaining unknown or not reported values. All data elements, except "Body Type," are first imputed by the multivariate regression method.

It should be noted that the data elements produced by the imputation do not replace the originals; all original data elements are kept intact in the CRSS data files. Rather, new imputed data elements are created from the original data elements having each unknown or not reported value substituted by the estimated value. The imputed data elements, identified by the suffix `_IM` (e.g.

AGE_IM, WEATHER_IM for the data elements AGE and WEATHER, respectively) are added as additional data elements to their respective files. It is also worth noting that:

- the imputed maximum severity MAXSEV_IM and imputed number of injured NO_INJ_IM at the accident level are derived from INJSEV_IM which contains the imputed values of the Injury Severity at the person level;
- the imputed maximum severity MXVSEV_IM and imputed number of injured NUMINJ_IM at the vehicle level are derived from INJSEV_IM that contains the imputed values of the Injury Severity at the person level;
- the imputed police reported alcohol involvement ALCHL_IM at the accident level is derived from PERALCH_IM that contains the imputed values of alcohol involvement at the person level;
- the imputed police reported alcohol involvement V_ALCH_IM at the vehicle level is derived from PERALCH_IM that contains the imputed values of alcohol involvement at the person level.

Overall, the CRSS imputation process employs IVEware software and several other programs written in SAS. Some text files input to this software provide additional controls to accurately and efficiently obtain the best estimates of the unknown or not reported values. In addition, the process makes provision for edit- and consistency-checks on the data to avoid any implausible value that might have been predicted by the applicable regression models. Please refer to the NHTSA Technical Report [Crash Report Sampling System: Imputation](#) for a more in-depth discussion on the CRSS imputation procedure.

The table below shows the SAS names and the corresponding SAS labels of the selected data elements for both the original and imputed versions for the Accident, Vehicle, and Person files.

Data Elements and Their Imputed Counterparts - SAS Names and Labels

SAS Data File	Data Element		<u>Imputed</u> Data Element	
	SAS Name	SAS Label	SAS Name	SAS Label
<i>Accident</i>				
Accident	ALCOHOL	Alcohol Involved in Crash	ALCHL_IM	Imputed Alcohol Involved in Crash
Accident	DAY_WEEK	Crash Date (Day of Week)	WKDY_IM	Imputed Day of Week
Accident	HARM_EV	First Harmful Event	EVENT1_IM	Imputed First Harmful Event
Accident	HOUR	Crash Time (Hour)	HOUR_IM	Imputed Hour
Accident	LGT_COND	Light Condition	LGTCOL_IM	Imputed Light Condition
Accident	MINUTE	Crash Time (Minute)	MINUTE_IM	Imputed Minute
Accident	MAN_COLL	Manner of Collision	MANCOL_IM	Imputed Manner of Collision
Accident	MAX_SEV	Maximum Injury Severity in Crash	MAXSEV_IM	Imputed Maximum Injury Severity in Crash

SAS Data File	Data Element		<u>Imputed Data Element</u>	
	SAS Name	SAS Label	SAS Name	SAS Label
Accident	NUM_INJ	Number Injured in Crash	NO_INJ_IM	Imputed Number Injured in Crash
Accident	RELJCT1	Relation to Junction –	Accident	RELJCT1
Accident	RELJCT2	Relation to Junction –		
Specific Location	RELJCT2_IM	Imputed Relation to Junction – Specific Location		
<i>Vehicle</i>				
Vehicle	IMPACT1	Area of Impact – Initial Contact Point	IMPACT1_IM	Imputed Area of Impact – Initial Contact Point
Vehicle	BODY_TYP	Body Type	BDYTYP_IM	Imputed Body Type
Vehicle	VEH_ALCH	Driver Drinking in Vehicle	V_ALCH_IM	Imputed Driver Drinking in Vehicle
Vehicle	MAX_VSEV	Maximum Injury Severity in Vehicle	MXVSEV_IM	Imputed Maximum Injury Severity in Vehicle
Vehicle	MOD_YEAR	Vehicle Model Year	MDLYR_IM	Imputed Vehicle Model Year
Vehicle	P_CRASH1	Pre-Event Movement	PCRASH1_IM	Imputed Pre-Event Movement
Vehicle	M_HARM	Most Harmful Event	VEVENT_IM	Imputed Most Harmful Event
Vehicle	NUM_INJV	Number Injured in Vehicle	NUMINJ_IM	Imputed Number Injured in Vehicle
<i>Person</i>				
Person	AGE	Age	AGE_IM	Imputed Age
Person	EJECTION	Ejection	EJECT_IM	Imputed Ejection
Person	INJ_SEV	Injury Severity	INJSEV_IM	Imputed Injury Severity
Person	DRINKING	Police-Reported Alcohol Involvement	PERALCH_IM	Imputed Police Rep. Alcohol Inv.
Person	SEAT_POS	Seating Position	SEAT_IM	Imputed Seating Position
Person	SEX	Sex	SEX_IM	Imputed Sex

The following table shows percentages of “Not Reported” and “Reported as Unknown” values for the selected data elements for the Accident, Vehicle, and Person files in CRSS 2020 data.

Data Elements and Percentages of Unknown and Not Reported Values

SAS Data File	Data Element		Unknown/ Not Reported Percentage
	SAS Name	SAS Label	
Accident			
Accident	ALCOHOL	Alcohol Involved in Crash	39.78%
Accident	DAY_WEEK	Crash Date (Day of Week)	0.00%
Accident	HARM_EV	First Harmful Event	0.11%
Accident	HOUR	Crash Time (Hour)	0.61%
Accident	LGT_COND	Light Condition	0.96%
Accident	MINUTE	Crash Time (Minute)	0.61%
Accident	MAN_COLL	Manner of Collision	0.16%
Accident	MAX_SEV	Maximum Injury Severity in Crash	1.86%
Accident	NUM_INJ	Number Injured in Crash	1.86%
Accident	RELJCT1	Relation to Junction – Within Interchange Area	7.28%
Accident	RELJCT2	Relation to Junction – Specific Location	0.16%
Accident	WEATHER	Atmospheric Conditions	5.28%
Vehicle			
Vehicle	IMPACT1	Area of Impact – Initial Contact Point	2.52%
Vehicle	BODY_TYP	Body Type	4.71%
Vehicle	VEH_ALCH	Driver Drinking in Vehicle	35.24%
Vehicle	MAX_VSEV	Maximum Injury Severity in Vehicle	4.33%
Vehicle	MOD_YEAR	Vehicle Model Year	4.65%
Vehicle	P_CRASH1	Pre-Event Movement	1.71%
Vehicle	M_HARM	Most Harmful Event	0.07%
Vehicle	NUM_INJV	Number Injured in Vehicle	4.33%

SAS Data File	Data Element		Unknown/ Not Reported Percentage
	SAS Name	SAS Label	
Person			
Person	AGE	Age	8.12%
Person	EJECTION	Ejection	7.30%
Person	INJ_SEV	Injury Severity	3.66%
Person	DRINKING	Police-Reported Alcohol Involvement	48.55%
Person	SEAT_POS	Seating Position	1.43%
Person	SEX	Sex	4.57%

CRSS SAS Data Files

CRSS data are made available to the public in Statistical Analysis System (SAS) data files as well as comma-separated values (CSV) files. For the current data collection year, there are 28 data files. The current data files are: Accident, Vehicle, Person, Parkwork, Vpicdecode, Vpictrailerdecode, Pdtype, Cevent, Vevent, Vsoe, Crashrf, Weather, Vehiclesf, Pvehiclesf, Driverrf, Damage, Distract, DrimPAIR, Factor, Maneuver, Violatn, Vision, Personrf, Nmcrash, Nmdistract, NmimPAIR, Nmprior, and Safetyeq data files. Seventeen of these data files contain only one data element and the coder can code multiple responses for these elements (i.e., “select all that apply”); thus, there is a record for each response. These data files are: Crashrf, Weather, Vehiclesf, Pvehiclesf, Driverrf, Damage, Distract, DrimPAIR, Factor, Maneuver, Violatn, Vision, Personrf, Nmcrash, Nmdistract, NmimPAIR, and Nmprior. Two data files, Vpicdecode and Vpictrailerdecode, contain elements derived from the vehicle’s and trailer’s VIN, respectively. Details on these elements are found in a separate manual, the *Product Information Catalog and Vehicle Listing (vPIC) Analytical User’s Manual*, found in the [NCSA Publications - Manuals and Documentation](#) section of NHTSA’s website.

The data files are presented with their data elements in the Data Elements Definitions and Codes section. For each of the data elements, a brief definition is provided along with any additional information that could assist analyses. SAS names and values are also provided for the data elements. Discontinued data elements are moved to the end of the data file.

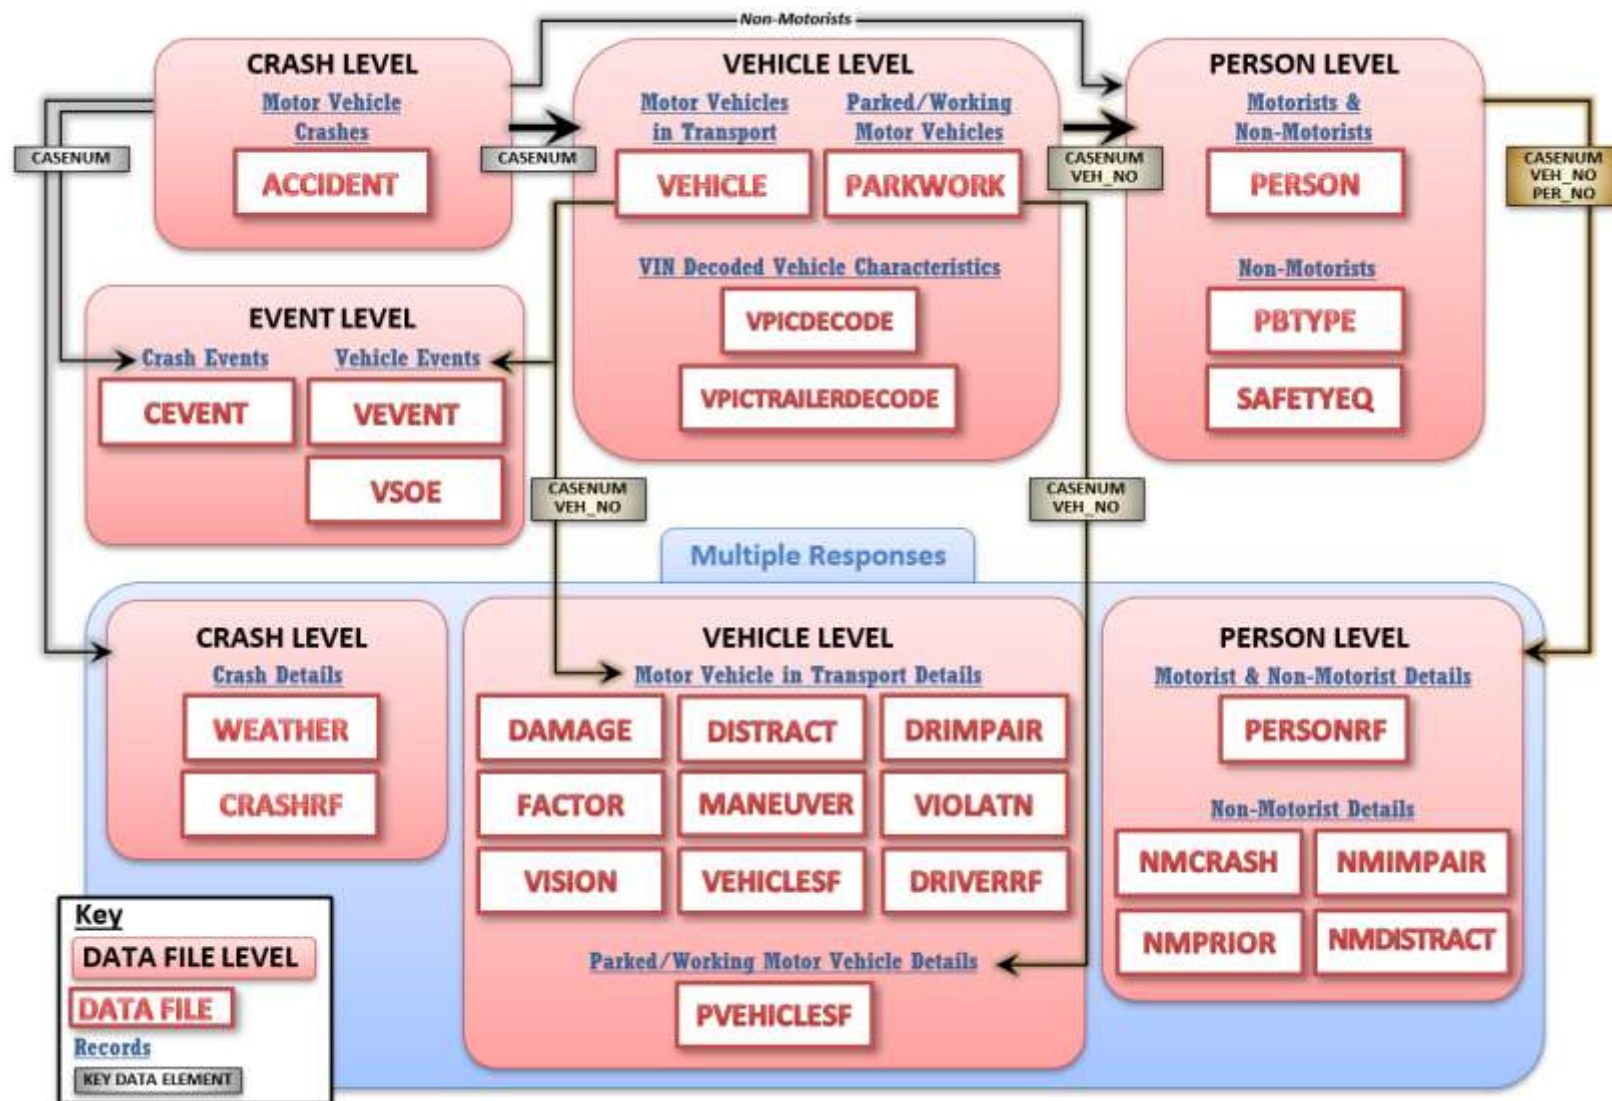

The SAS data files and years of availability are:

- **Accident** – (2016-current): This data file contains information about crash characteristics and environmental conditions at the time of the crash. There is one record per crash.
- **Vehicle** – (2016-current): This data file contains information describing the motor vehicles in transport and the drivers of motor vehicles in transport who are involved in the crash. There is one record per motor vehicle in transport. Parked and working vehicle information is in the Parkwork data file.
- **Person** – (2016-current): This data file contains information describing all people involved in the crash including motorists (i.e., drivers and passengers of motor vehicles in transport) and non-motorists (e.g., pedestrians, pedalcyclists, and occupants of motor vehicles not in transport). It provides information such as age, sex, vehicle occupant restraint use, and injury severity. There is one record per person.
- **Parkwork** – (2016-current): This data file contains information about parked and working vehicles that were involved in CRSS crashes. A parked vehicle is a motor vehicle that is stopped off the roadway. A working vehicle is a motor vehicle involved in trafficway maintenance, construction, or utility activities. It excludes vehicles performing private maintenance, construction, or utility activities. Data users are strongly advised to consult the annual FARS/CRSS Coding and Validation Manuals for a detailed description. There is one record per parked/working vehicle.

- ***Vpicdecode*** – (2016-current): This data file contains vehicle features and specifications based on the vehicle’s VIN that is decoded using NHTSA’s Product Information Catalog and Vehicle Listing, known as vPIC. There is one record per vehicle. First released in 2020 NHTSA also provided this data file for the previous 4 years and plans to release more previous years in the future.
- ***Vpictrailerdecode*** – (2016-current): This data file contains trailer features and specifications based on the trailer’s VIN that is decoded using NHTSA’s Product Information Catalog and Vehicle Listing, known as vPIC. There is one record per trailer. First released in 2020 NHTSA also provided this data file for the previous 4 years and plans to release more previous years in the future.
- ***Pbtype*** – (2016-current): This data file contains information about crashes between motor vehicles and pedestrians, people on personal conveyances, and bicyclists. Data from the crash are enter into the Pedestrian and Bicycle Crash Analysis Tool (PBCAT). The output fields from PBCAT, including the pre-crash actions of the parties involved (crash type), are included in this data file. There is one record for each pedestrian, bicyclist or person on a personal conveyance.
- ***Cevent*** – (2016-current): This data file contains information for all of the qualifying events (both harmful and non-harmful) that occurred in the crash. It details the chronological sequence of events resulting from an unstabilized situation that constitutes a motor vehicle traffic crash. There is one record per event. Included in each record is a description of the event or object contacted (e.g., ran off road-right, crossed center line, guardrail, parked motor vehicle), the vehicles involved, and the vehicles’ area of impact.
- ***Vevent*** – (2016-current): This data file contains the sequence of events for each motor vehicle in transport involved in the crash. This data file has the same data elements as the Cevent data file. In addition, this data file has a data element that records the sequential event number for each vehicle (VEVENTNUM). There is one record for each event for each motor vehicle in transport.
- ***Vsoe*** – (2016-current): This data file contains the sequence of events for each motor vehicle in transport involved in the crash. This data file has a subset of the data elements contained in the Vevent data file (It is a simplified Vevent data file). There is one record for each event for each motor vehicle in transport.
- ***Crashrf*** – (2020-current): This data file contains factors related to the crash based on a list of unusual conditions and special circumstances. Each factor is a separate record and there is at least one record for each crash.
- ***Weather*** – (2020-current): This data file contains information describing the atmospheric conditions at the time of the crash. There is one record per condition and at least one record for each crash.
- ***Vehiclesf*** – (2020-current): This data file contains factors related to the motor vehicles in transport involved in the crash based on a list of special circumstances. There is one record per factor and at least one record for each motor vehicle in transport.

- ***Pvehiclesf*** – (2020-current): This data file contains factors related to parked and working vehicles involved in CRSS crashes based on a list of special circumstances. There is one record per factor and at least one record for each parked and working vehicle.
- ***Driverrf*** – (2020-current): This data file contains factors related to the drivers of motor vehicles in transport involved in the crash based on a list of driver conditions, unusual situations, and special circumstances. There is one record per factor and at least one record for each driver.
- ***Damage*** – (2016-current): This data set contains information about all of the areas on this vehicle that were damaged in the crash. There is one record per damaged area.
- ***Distract*** – (2016-current): This data file contains information about driver distractions. Each distraction is a separate record. There is at least one record for each driver of a motor vehicle in transport.
- ***Drimpair*** – (2016-current): This data file contains information about physical impairments of drivers of motor vehicles. There is one record per impairment and there is at least one record for each driver of a motor vehicle in transport.
- ***Factor*** – (2016-current): This data file contains information about vehicle circumstances that may have contributed to the crash. Each factor is a separate record. There is at least one record per motor vehicle in transport.
- ***Maneuver*** – (2016-current): This data file contains information about actions taken by the driver to avoid something or someone in the road. Each maneuver is a separate record. There is at least one record per motor vehicle in transport.
- ***Violatn*** – (2016-current): This data file contains information about violations that were charged to drivers. Each violation is a separate record. There is at least one record per motor vehicle in transport.
- ***Vision*** – (2016-current): This data file contains information about circumstances that may have obscured the driver's vision. Each obstruction is a separate record. There is at least one record per motor vehicle in transport.
- ***Personrf*** – (2020-current): This data file contains factors related to each person, occupants and non-occupants, involved in the crash based on a list of unusual situations and special circumstances. There is one record per factor and at least one record for each person.
- ***Nmcrash*** – (2016-current): This data file contains information about contributing circumstances or improper actions of people who are not occupants of motor vehicles (e.g., pedestrians and bicyclists) noted on the police report. There is one record per action and there is at least one record for each person who is not an occupant of a motor vehicle.
- ***Nmdistract*** – (2019-current): This data file contains information about non-motorist distractions. Each distraction is a separate record. There is at least one record for each person who is not an occupant of a motor vehicle.

- ***Nmimpair*** – (2016-current): This data file contains information about physical impairments of people who are not occupants of motor vehicles. There is one record per impairment and there is at least one record for each person who is not an occupant of a motor vehicle.
- ***Nmprior*** – (2016-current): This data file contains information about the actions of people who are not occupants of motor vehicles (e.g., pedestrians and bicyclists) at the time of their involvement in the crash. There is one record per action and there is at least one record for each person who is not an occupant of a motor vehicle.
- ***Safetyeq*** – (2016-current): This data file contains information about safety equipment used by people who are not occupants of motor vehicles. In 2016 the file contains a record for each type of safety equipment used by a person who is not an occupant of a motor vehicle. From 2017 onward the file contains multiple safety equipment data elements and only one record for each person who is not an occupant of a motor vehicle.

CRSS Data Element List

The following lists all SAS data elements with their SAS data file locations. Data elements that do not have a Data Element ID at the left side of the list have been discontinued (with the exception of some key data elements).

Key Data Elements.....			44
	Case Number	CASENUM	44
	Primary Sampling Unit (PSU)	PSU	45
	Primary Sampling Unit for Variance Estimation	PSU_VAR	46
	Primary Sampling Unit Stratum	PSUSTRAT	47

Data Element Definitions and Codes

This section represents the majority of the manual. It provides information on each data element, including definitions, SAS names, attribute codes and attribute labels. Over the years changes have been made to the data collected. Some data elements have been dropped, new ones added, and attribute codes of individual data elements have changed. Element changes and the years for which individual attributes are available are shown for each data element.

For a detailed description of each data element including coding instructions and attribute definitions, see the FARS/CRSS Coding and Validation Manual. The Coding Manual is published for each year of data collection and is available at:

[NCSA Publications- Manuals and Documentation- CRSS.](#)

Additionally, a SAS program (format[YY].sas) and SAS catalog (formats.sas7bcat) are provided with the data files each year for applying the labels and formats described in this section to the current year's attributes.

The data elements in this section are listed under the data file in which they are stored. Some data elements are provided in more than one data file to facilitate analyses. For example, Month of Crash (MONTH) is a crash-level data element but for convenience it is also provided in the Vehicle, Parkwork and Person files. For such elements, they are listed under the primary data file only.

All data elements are numeric except the following that are character.

- V13 Vehicle Identification Number (VIN, PVIN) *[12 characters]*
- V16 & V16B Motor Carrier ID (MCARR_ID) *[11]*, (MCARR_I2) *[9 characters]*
- D6 Driver's ZIP Code (DR_ZIP) *[5 characters]*
- NM9-PB37 Pedestrian Scenario (PEDSNR) *[10 characters]*

Key Data Elements

All of the data files contain the following nine crash-level data elements:

Case Number

Definition: This data element is the unique case number assigned to each crash. It appears on each data file and is used to merge information from the data files together.

Additional Information: This data element is assigned by the data entry system to each crash and is the unique identifier for the crash within the year. It is used as the key, when any two of these files from the same year are merged.

SAS Name: CASENUM

Attribute Codes

2016-Later

xx Case Number

Primary Sampling Unit (PSU)

Definition: This data element identifies the general geographic location from where the police report was sampled. A PSU is either a large central city, a county surrounding a city, or a group of counties.

Additional Information: See the section [CRSS Sample Design](#) for more information.

SAS Name: **PSU**

Attribute Codes

2016-Later

10-83 CRSS Primary Sampling Unit Number

Primary Sampling Unit for Variance Estimation

Definition: This data element provides the PSU identifier to be used for variance estimation.

Additional Information: See [Appendix B: Rules for Derived Data Elements](#) for an explanation of this data element and how it is derived.

SAS Name: **PSU_VAR**

Attribute Codes

2016-Later

10 to 206

Primary Sampling Unit Stratum

Definition: The PSUs are grouped into strata to reflect the first stage of the sample selection. This data element is used by statistical software packages that use complex sample design for calculating variances, such as SUDAAN and SAS V9.

Additional Information:

SAS Name: **PSUSTRAT**

Attribute Codes

2016-Later

1 to 25

Region of the Country

Definition: This data element identifies the region of the country where the crash occurred.

Additional Information: This data element is derived based on the State in which the Primary Sampling Unit is located where the crash occurred.

See [Appendix B: Rules for Derived Data Elements](#) for an explanation of this data element and how it is derived.

SAS Name: **REGION**

Attribute Codes

2016-Later

- 1 Northeast (PA, NJ, NY, NH, VT, RI, MA, ME, CT)
- 2 Midwest (OH, IN, IL, MI, WI, MN, ND, SD, NE, IA, MO, KS)
- 3 South (MD, DE, DC, WV, VA, KY, TN, NC, SC, GA, FL, AL, MS, LA, AR, OK, TX)
- 4 West (MT, ID, WA, OR, CA, NV, NM, AZ, UT, CO, WY, AK, HI)

Urbanicity

Definition: This data element describes whether the geographical area of the crash is essentially urban or rural. The area is considered urban if it has a population of 250,000 or greater, otherwise it is rural. Census population data is used to define urbanicity.

Additional Information: See [Appendix B: Rules for Derived Data Elements](#) for an explanation of this data element and how it is derived.

SAS Name: **URBANICITY**

Attribute Codes

2016-Later

- 1 Urban
- 2 Rural

C34 *Stratum*

Definition: This data element identifies the number of the category in which the police report was originally listed in the PARSE Program.

Additional Information: See [CRSS Sample Design](#) for more information.

SAS Name: **STRATUM**

Attribute Codes

2016-Later

- 2 CRSS crashes involving at least one injured (A, B, C, or ISU) or Killed (K) person who was not in a motor vehicle (i.e., non-motorist).
[Not a MV Occupant- Any Injury]
- 3 CRSS crashes not qualifying for Stratum 2 involving at least one injured (A, B, C, or ISU) or Killed (K) occupant of a motorcycle or moped.
[Motorcycle- Any Injury]
- 4 CRSS crashes not qualifying for Strata 2 or 3 involving at least one occupant of a late model year (LMY) passenger vehicle who was injured with a Suspected Serious Injury (A) or Killed (K).
[Late Model Year Passenger Vehicle- Serious Injury]
- 5 CRSS crashes not qualifying for Strata 2, 3, or 4 involving at least one occupant of a non-late model year (NLMY) passenger vehicle who was injured with a Suspected Serious Injury (A) or Killed (K).
[Non-Late Model Year Passenger Vehicle- Serious Injury]
- 6 CRSS crashes not qualifying for Strata 2, 3, 4, or 5 involving at least one occupant of a late model year (LMY) passenger vehicle who was injured (B, C, or ISU).
[Late Model Year Passenger Vehicle- Minor Injury]
- 7 CRSS crashes not qualifying for Strata 2, 3, 4, 5, or 6 involving at least one medium or heavy truck or bus (includes school bus, transit bus, and motor coach) with GVWR equal to or greater than 10,001 pounds.
[Medium/Heavy Truck or Bus]
- 8 CRSS crashes not qualifying for Strata 2, 3, 4, 5, 6, or 7 involving at least one occupant of a non-late model year (NLMY) passenger vehicle who was injured (B, C, or ISU).
[Non-Late Model Year Passenger Vehicle- Minor Injury]
- 9 CRSS crashes not qualifying for Strata 2, 3, 4, 5, 6, 7, or 8 involving at least one late model year (LMY) passenger vehicle AND no one in the crash was injured (A, B, C, or ISU) or Killed (K).
[Late Model Year Passenger Vehicle- No Injuries in Crash]
- 10 CRSS crashes not qualifying for Strata 2, 3, 4, 5, 6, 7, 8, or 9.
[Other]

C35 *Police Jurisdiction (PJ)*

Definition: This data element identifies the number of the police jurisdiction from which the police crash report was originally sampled.

Additional Information:

SAS Name: **PJ**

Attribute Codes

2016-Later

46-4060 CRSS Police Jurisdiction Number

Case Weight

Definition: This data element is used to produce national estimates from the data.

Additional Information: See the section [National Estimates](#) for more information.

SAS Name: **WEIGHT**

All of the vehicle level data files contain the preceding accident level data elements as well as VEH_NO:

V3/D3/PC3/P3/NM4 Vehicle Number

Definition: This data element is the consecutive number assigned to each vehicle in the case. This data element appears on each vehicle level data file and is used in conjunction with the CASENUM data element to merge information from vehicle level data files.

Additional Information: All vehicles (motor vehicles in transport as well as parked/working vehicles) are sequentially ordered starting with 1.

SAS Name: VEH_NO

Attribute Codes

2016-Later

0	Non-Motorist
1-999	Assigned Vehicle Number

All of the person level data files contain the preceding accident level and vehicle level data elements as well as PER_NO:

P4/NM3 Person Number

Definition: This data element is the consecutive number assigned to each person in the case (i.e., each occupant, pedestrian, or non-motorists involved in the crash). This data element appears on each person level data file and is used in conjunction with the CASENUM data element (and sometimes the VEH_NO data element) to merge information from person level data files.

Additional Information: This data element is computer assigned. Each occupant of the vehicle is numbered and each non-occupant is numbered; in the case of a non-occupant the vehicle number is zero. The numbers for occupants are consecutive, for each vehicle, beginning with 1. Numbers are never skipped. Drivers do not have to be coded 1. Non-occupants are identified by vehicle number 0 and are numbered consecutively starting with 1 for each non-motorist. To get drivers see data element PER_TYP, under Person Type.

SAS Name: PER_NO

Attribute Codes

2016-Later

1-999 Assigned Person Number

The CEVENT and VEVENT data files contain the preceding crash level data elements as well as EVENTNUM:

C18 *Event Number*

Definition: This data element is the consecutive number assigned to each harmful and non-harmful event in a crash, in chronological order.

Additional Information: Qualifying events are those that involve a motor vehicle in transport or an object set in motion by a motor vehicle in transport.

SAS Name: **EVENTNUM**

Attribute Codes

2016-Later

1-999 Event Number

The VEVENT and VSOE data files contain the preceding crash level data elements and VEH_NO as well as VEVENTNUM:

C18 *Vehicle Event Number*

Definition: This data element is the consecutive number assigned to each harmful and non-harmful event for this vehicle, in chronological order.

Additional Information: The vehicle's event number shows the chronological sequence of the qualifying harmful and non-harmful events involving a particular vehicle. Qualifying events are those that involve a motor vehicle in transport or an object set in motion by a motor vehicle in transport.

SAS Name: **VEVENTNUM**

Attribute Codes

2016-Later

1-999 Vehicle Event Number

The ACCIDENT Data File

The Accident data file includes crash data. It contains the data elements CASENUM, PSU, PJ, STRATUM, PSUSTRAT, PSU_VAR, REGION, URBANICITY, and WEIGHT, which are described in the Key Data Elements at the beginning of the Data Element Definitions and Codes section. The Accident data file also contains the data elements on the following pages.

CASENUM is the unique case identifier for each record.

C3 *Number of Persons Not in Motor Vehicles*

Definition: This data element is the number of Person Forms (Not a Motor Vehicle Occupant) that are applicable to this case (i.e., non-occupants).

Additional Information: This represents the number of forms created for people *not* in motor vehicles. Prior to 2020 it is the number of people in the crash where “Person Type” is in (4, 5, 6, 7, 8, 10, or 19). Starting in 2020 the attributes are in (4, 5, 6, 7, 10, 11, 12, 13, or 19).

Note: People where “Person Type” = 3 (Occupant of a Motor Vehicle Not in Transport) are *not* included in this data element but are counted in C3A below.

SAS Name: **PEDS**

Attribute Codes

2016-Later

0-99 Number of Persons Not in Motor Vehicles

C3A *Number of Persons Not in Motor Vehicles in Transport (MVIT)*

Definition: This data element is a count of the number of non-motorists in the crash. A non-motorist is defined as a pedestrian, a cyclist, an occupant of a motor vehicle not in transport, a person riding a horse, an occupant of an animal drawn conveyance, person associated with non-motorist conveyance (e.g., baby carriage, skate board, wheelchair), or an other non-motorist (e.g., person outside a trafficway, person in a house).

Additional Information: Prior to 2020 this data element is calculated as the count of all people in the crash where “Person Type” is in (3, 4, 5, 6, 7, 8, 10, or 19). Starting in 2020, the attributes are in (3, 4, 5, 6, 7, 10, 11, 12, 13, or 19).

SAS Name: **PERNOTMVIT**

Attribute Codes

2016-Later

0-98 Number of Persons Not in Motor Vehicles in Transport

C4 *Number of Total Motor Vehicles*

Definition: This data element is the number of contact motor vehicles that the officer reported on the police crash report as a unit involved in the crash.

Additional Information: This number represents all of the motor vehicles in the crash. This includes the vehicles in transport that are documented in the Vehicle data file and the vehicles not in transport that are documented in the Parkwork data file. This data element only appears in the Accident data file.

SAS Name: **VE_TOTAL**

Attribute Codes

2016-Later

1-999 Number of Vehicles in Crash

C4A *Number of Motor Vehicles in Transport (MVIT)*

Definition: This data element is a count of the number of motor vehicles in transport involved in the crash. Legally parked vehicles are not included.

Additional Information: This data element is derived as the count of all vehicles in the crash where “Unit Type” = 1. It is the number of records in the Vehicle data file.

This data element also appears in the Vehicle and Person data files, and in the Parkwork data file as PVE_FORMS.

SAS Name: **VE_FORMS**

Attribute Codes

2016-Later

1-999 Number of Vehicles

C4B Number of Parked/Working Vehicles

Definition: This data element is a count of the number of parked and working motor vehicles involved in the crash.

Additional Information: This data element is derived as the count of all vehicles in the crash where “Unit Type” is in (2, 3, or 4). It is the number of records in the Parkwork data file.

Working vehicles include only vehicles involved in trafficway maintenance, construction, or utility activities. Vehicles performing private maintenance, construction, or utility activities are excluded.

SAS Name: **PVH_INVL**

Attribute Codes

2016-Later

0-999 Number of Parked/Working Vehicles in the Crash

C5A *Number of Persons in Motor Vehicles in Transport (MVIT)*

Definition: This data element is a count of the number of motorists in the crash. A motorist is a driver, passenger or unknown occupant type of a motor vehicle in transport.

Additional Information: This data element is derived as the count of all people in the crash where “Person Type” is in (1, 2, or 9).

Note: People where “Person Type” = 3 (Occupant of a Motor Vehicle Not in Transport) are *not* included in this data element.

SAS Name: PERMVIT

Attribute Codes

2016-Later

0-999 Number of Persons in Motor Vehicles in Transport

C8 *Crash Date*

C8A *Month of Crash*

Definition: This data element records the month in which the crash occurred.

Additional Information: This data element also appears in the Vehicle and Person data files and in the Parkwork data file as PMONTH.

SAS Name: MONTH

Attribute Codes

2016-Later

- | | |
|----|-----------|
| 1 | January |
| 2 | February |
| 3 | March |
| 4 | April |
| 5 | May |
| 6 | June |
| 7 | July |
| 8 | August |
| 9 | September |
| 10 | October |
| 11 | November |
| 12 | December |

C8C Day of Week

Definition: This data element records the day of the week on which the crash occurred.

Additional Information: This data element is derived from the SAS Weekday function. The SAS Weekday function returns the day of the week from a date.

See [Appendix C: Analytical Classification of Select CRSS Data Elements](#) for the standard NCSA classifications for this data element.

SAS Name: DAY_WEEK

Attribute Codes

2016-Later

- 1 Sunday
- 2 Monday
- 3 Tuesday
- 4 Wednesday
- 5 Thursday
- 6 Friday
- 7 Saturday
- 9 Unknown

C8CI Imputed Day of Week

Definition: This imputed data element has the same definition and data element values as Day of Week, excluding value 9 for unknown day of week.

Additional Information: See the [CRSS Imputation](#) section of this manual.

SAS Name: WKDY_IM

C8D Year of Crash

Definition: This data element records the year in which the crash occurred.

Additional Information:

SAS Name: YEAR

Attribute Codes

2016-Later

xxxx Year of the Crash

C9 *Crash Time*

C9A *Hour of Crash*

Definition: This data element records the hour at which the crash occurred.

Additional Information: Military time is used. Noon is coded as "12." Midnight is coded as HOUR=0 and MINUTE=0. Hour is coded 0 for 1 minute after midnight to 59 minutes after midnight.

See [Appendix C: Analytical Classification of Select CRSS Data Elements](#) for the standard NCSA classifications for this data element.

This data element also appears in the Vehicle and Person data files and in the Parkwork data file as PHOUR.

SAS Name: **HOURL**

Attribute Codes

2016-Later

0-23	Hour
99	Unknown

C9AI *Imputed Hour of Crash*

Definition: This imputed data element has the same definition and data element values as Hour of the Crash, excluding value 99 for unknown hour.

Additional Information: See the [CRSS Imputation](#) section of this manual.

SAS Name: **HOURL_IM**

C9B *Minute of Crash*

Definition: This data element records the minutes after the hour at which the crash occurred.

Additional Information: This data element also appears in the Vehicle and Person data files and in the Parkwork data file as PMINUTE.

SAS Name: **MINUTE**

Attribute Codes

2016-Later

0-59	Minute
99	Unknown

C9BI Imputed Minute of Crash

Definition: This imputed data element has the same definition and data element values as Minute of the Crash, excluding value 99 for unknown minutes.

Additional Information: See the [CRSS Imputation](#) section of this manual.

SAS Name: MINUTE_IM

C19 First Harmful Event

Definition: This data element describes the first injury or damage producing event of the crash.

Additional Information: “First Harmful Event” applies to the crash. “Most Harmful Event” (M_HARM) applies to the vehicle. “First Harmful Event,” “Most Harmful Event,” and the “Sequence of Events” data elements have the same harmful event attributes. “Sequence of Events” also has non-harmful event attributes.

This data element is derived from the “Sequence of Events” data element as the first value that is not between codes 60 and 79 (non-harmful events). See [Appendix B: Rules for Derived Data Elements](#) for an explanation of this data element and how it is derived.

This data element also appears in the Vehicle and Person data files and in the Parkwork data file as PHARM_EV.

SAS Name: **HARM_EV**

--	--	98	Harmful Event, Details Not Reported (Since 2019)
99	99	--	Unknown
--	--	99	Reported as Unknown

C19I Imputed First Harmful Event

Definition: This imputed data element has the same definition as First Harmful Event, excluding values 98 and 99 for not reported and unknown first harmful events.

Additional Information: See the [CRSS Imputation](#) section of this manual.

SAS Name: **EVENT1_IM**

C20 Manner of Collision of the First Harmful Event

Definition: This data element describes the orientation of two motor vehicles in transport when they are involved in the “First Harmful Event” of a collision crash. If the “First Harmful Event” is not a collision between two motor vehicles in transport, it is classified as such.

Additional Information: Prior to 2019 this data element’s name was “Manner of Collision.”

This data element also appears in the Vehicle and Person data files and in the Parkwork data file as PMAN_COLL.

SAS Name: MAN_COLL

Attribute Codes

<i>2016- 2017</i>	<i>2018</i>	<i>2019- Later</i>	
0	0	--	Not Collision With Motor Vehicle in Transport
--	--	0	First Harmful Event Was Not a Collision With Motor Vehicle in Transport
1	1	1	Front-to-Rear

98	98	98	Not Reported
99	--	--	Unknown
--	99	99	Reported as Unknown

C20I Imputed Manner of Collision of the First Harmful Event

Definition: This imputed data element has the same definition and data element values as “Manner of Collision of the First Harmful Event,” excluding value 99 for unknown manner of collision and value 98 for not reported manner of collision.

Additional Information: See the [CRSS Imputation](#) section of this manual.

SAS Name: MANCOL_IM

C21 *Relation to Junction*

C21A *Relation to Junction- Within Interchange Area*

Definition: This data element identifies the crash’s location with respect to presence in an interchange area. The coding of this data element is done in two sub-fields (see also C21B) and is based on the location of the “First Harmful Event” of the crash.

Additional Information:

SAS Name: RELJCT1

Attribute Codes

<i>2016- 2017</i>	<i>2018- Later</i>	
0	0	No
1	1	Yes
8	8	Not Reported
9	--	Unknown
--	9	Reported as Unknown

C21AI *Imputed Relation to Junction- Within Interchange Area*

Definition: This imputed data element has the same definition and data element values as Relation to Junction – Within Interchange Area excluding value 8 for not reported and 9 for unknown.

Additional Information: See the [CRSS Imputation](#) section of this manual.

This imputed data element was discontinued in 2019 and added back in 2020.

SAS Name: RELJCT1_IM

C21B Relation to Junction- Specific Location

Definition: This data element identifies the crash’s location with respect to presence in or proximity to components typically in junction or interchange areas. The coding of this data element is done in two sub-fields (see also C21A) and is based on the location of the “First Harmful Event” of the crash.

Additional Information:

SAS Name: RELJCT2

Attribute Codes

2016- 2017	2018- Later	
1	1	Non-Junction
2	2	Intersection
3	3	Intersection Related
4	4	Driveway Access
5	5	Entrance/Exit Ramp Related
6	6	Railway Grade Crossing
7	7	Crossover Related
8	8	Driveway Access Related
16	16	Shared-Use Path Crossing
17	17	Acceleration/Deceleration Lane
18	18	Through Roadway
19	19	Other Location Within Interchange Area
20	20	Entrance/Exit Ramp
98	98	Not Reported
99	--	Unknown
--	99	Reported as Unknown

See [Analysis of Pedestrian and Bicycle Crashes Around Intersections](#) for guidance on analyzing Pedestrian/Bicyclist crash locations.

C21BI Imputed Relation to Junction- Specific Location

Definition: This imputed data element has the same definition and data element values as Relation to Junction – Specific Location, excluding value 98 for not reported and 99 for unknown.

Additional Information: See the [CRSS Imputation](#) section of this manual.

SAS Name: **RELJCT2_IM**

C22 *Type of Intersection*

Definition: This data element identifies and allows separation of various intersection types.

Additional Information:

SAS Name: TYP_INT

Attribute Codes

<i>2016- 2017</i>	<i>2018- 2019</i>	<i>2020- Later</i>	
1	1	1	Not an Intersection
2	2	2	Four-Way Intersection
3	3	3	T-Intersection
4	4	4	Y-Intersection
5	5	5	Traffic Circle
6	6	6	Roundabout
7	7	7	Five-Point, or More
10	10	10	L-Intersection
--	--	11	Other Intersection Type
98	98	98	Not Reported
99	--	--	Unknown
--	99	99	Reported as Unknown

C23 *Relation to Trafficway*

Definition: This data element identifies the location of the crash as it relates to its position within or outside the trafficway based on the “First Harmful Event.”

Additional Information:

SAS Name: **REL_ROAD**

Attribute Codes

<i>2016- 2017</i>	<i>2018- Later</i>	
1	1	On Roadway
2	2	On Shoulder
3	3	On Median
4	4	On Roadside
5	5	Outside Trafficway
6	6	Off Roadway – Location Unknown
7	7	In Parking Lane/Zone
8	8	Gore
10	10	Separator
11	11	Continuous Left Turn Lane
98	98	Not Reported
99	--	Unknown
--	99	Reported as Unknown

C24 Work Zone

Definition: This data element identifies a motor vehicle traffic crash in which the first harmful event occurs within the boundaries of a work zone or on an approach to or exit from a work zone, resulting from an activity, behavior, or control related to the movement of the traffic units through the work zone.

Additional Information: This data element identifies a “Work Zone Accident” as defined in ANSI D16.1, 7th Edition. If the crash qualifies as a "Work Zone Accident" then the type of work activity is identified. Use of the codes does not imply that the crash was caused by the construction, maintenance, or work activity.

SAS Name: **WRK_ZONE**

Attribute Codes

2016-Later

- 0 None
- 1 Construction
- 2 Maintenance
- 3 Utility
- 4 Work Zone, Type Unknown

C25 *Light Condition*

Definition: This data element records the type/level of light that existed at the time of the crash as indicated in the police crash report.

Additional Information:

SAS Name: **LGT_COND**

Attribute Codes

<i>2016- 2017</i>	<i>2018- Later</i>	
1	1	Daylight
2	2	Dark – Not Lighted
3	3	Dark – Lighted
4	4	Dawn
5	5	Dusk
6	6	Dark – Unknown Lighting
7	7	Other
8	8	Not Reported
9	--	Unknown
--	9	Reported as Unknown

C25I *Imputed Light Condition*

Definition: This imputed data element has the same definition and data element values as Light Condition, excluding value 9 for unknown light condition and value 8 for not reported light condition.

Additional Information: See the [CRSS Imputation](#) section of this manual.

SAS Name: **LGTCON_IM**

C26 *Atmospheric Conditions*

Definition: This derived data element records the prevailing atmospheric conditions that existed at the time of the crash as indicated in the police crash report.

Additional Information: Prior to 2020 this data element was derived from up to two conditions that could be selected, WEATHER1 and WEATHER2 based on a hierarchy. The two coded data elements were discontinued after 2019 and moved to the Discontinued Accident Data Elements at the end of the Accident Data File section.

Beginning in 2020 all applicable atmospheric conditions are selected and stored in the Weather data file and this data element is derived from those multiple responses using the same hierarchy.

See [Appendix B: Rules for Derived Data Elements](#) for an explanation of how this data element is derived.

SAS Name: **WEATHER**

Attribute Codes

<i>2016- 2017</i>	<i>2018- Later</i>	
1	1	Clear
2	2	Rain
3	3	Sleet or Hail
4	4	Snow
5	5	Fog, Smog, Smoke
6	6	Severe Crosswinds
7	7	Blowing Sand, Soil, Dirt
8	8	Other
10	10	Cloudy
11	11	Blowing Snow
12	12	Freezing Rain or Drizzle
98	98	Not Reported
99	--	Unknown
--	99	Reported as Unknown

C26I Imputed Atmospheric Conditions

Definition: This imputed data element has the same definition and data element values as Atmospheric Conditions, excluding value 99 for unknown atmospheric conditions and value 98 for not reported atmospheric conditions.

Additional Information: See the [CRSS Imputation](#) section of this manual.

SAS Name: **WEATHR_IM**

C27 *School Bus Related*

Definition: This data element identifies if a school bus, or motor vehicle functioning as a school bus, is related to the crash.

Additional Information: The number of school bus related crashes may not equal the number of crashes with school buses involved. For example, if a vehicle goes around a stopped school bus and hits a pedestrian, the school bus usually will not be coded, but the crash is school bus related.

This data element also appears in the Person data file.

SAS Name: **SCH_BUS**

Attribute Codes

2016-Later

- | | |
|---|-----|
| 0 | No |
| 1 | Yes |

C33 *Interstate Highway*

Definition: This data element identifies whether the crash occurred on an interstate highway. Interstate highway is a Federal Highway Administration classification.

Additional Information:

SAS Name: INT_HWY

Attribute Codes

2016-Later

- | | |
|---|---------|
| 0 | No |
| 1 | Yes |
| 9 | Unknown |

C90 *Maximum Injury Severity in Crash*

Definition: This data element records the single most severe injury of all people involved in the crash, and is derived from “Injury Severity” in the Person data file.

Additional Information: The following order of severity is used.

- 4-Fatal
- 3-Suspected Serious Injury
- 2-Suspected Minor Injury
- 1-Possible Injury
- 5-Injured, Unknown Severity
- 0-No Apparent Injury
- 6-Died Prior
- 9- Unknown/Not Reported
- 8-No Person Involved in Crash

See [Appendix B: Rules for Derived Data Elements](#) for an expanded explanation of this data element and how it is derived.

SAS Name: **MAX_SEV**

Attribute Codes

2016-Later

- | | |
|---|-----------------------------|
| 0 | No Apparent Injury |
| 1 | Possible Injury |
| 2 | Suspected Minor Injury |
| 3 | Suspected Serious Injury |
| 4 | Fatal |
| 5 | Injured, Severity Unknown |
| 6 | Died Prior to Crash |
| 8 | No Person Involved in Crash |
| 9 | Unknown/Not Reported |

C90I Imputed Maximum Injury Severity in Crash

Definition: This imputed data element has the same definition and data element values as Maximum Injury Severity in Crash, excluding value 9 for unknown maximum injury severity.

Additional Information: See the [CRSS Imputation](#) section of this manual.

This data element is derived from “Imputed Injury Severity” in the Person data file.

SAS Name: **MAXSEV_IM**

C91 *Number Injured in Crash*

Definition: This data element records the number of people injured in the crash and is derived by counting all people with “Injury Severity” of (1, 2, 3, 4, or 5) in the crash. This count includes fatally injured occupants.

Additional Information: See [Appendix B: Rules for Derived Data Elements](#) for an expanded explanation of this data element and how it is derived.

SAS Name: **NUM_INJ**

Attribute Codes

2016-Later

- 0 No Person Injured/Property Damage Only Crash
- x Number of Known Injured
- 98 No Person Involved in the Crash
- 99 All Persons in Crash Are Unknown if Injured.

C91I *Imputed Number Injured in Crash*

Definition: This imputed data element has the same definition and data element values as Number Known Injured in Crash, excluding value 99 for unknown number injured, which is imputed, and the attribute code 98, which is converted to code 0.

Additional Information: See the [CRSS Imputation](#) section of this manual.

This data element is derived from “Imputed Injury Severity” in the Person data file.

SAS Name: **NO_INJ_IM**

C92 *Alcohol Involved in Crash*

Definition: This data element records alcohol use for drivers, pedestrians, cyclists and other types of non-motorists (except occupants of motor vehicles not in transport) involved in the crash. The data element is derived from “Police-Reported Alcohol Involvement” in the Person data file.

Additional Information: 8 (No Applicable Person) is coded if the crash involved only passengers of motor vehicles in transport, occupants of motor vehicles not in transport or unknown occupant types who are in a motor vehicle in transport where there is no driver present.

See [Appendix B: Rules for Derived Data Elements](#) for an expanded explanation of this data element and how it is derived.

SAS Name: **ALCOHOL**

Attribute Codes

2016-Later

- 1 Alcohol Involved
- 2 No Alcohol Involved
- 8 No Applicable Person
- 9 Unknown

C92I *Imputed Alcohol Involved in Crash*

Definition: This data element has the same definition and data element values as Alcohol Involved in Crash, excluding value 9 for unknown alcohol involvement, which is imputed, and the value 8, which is converted to attribute code 2.

Additional Information: See the [CRSS Imputation](#) section of this manual.

This imputed data element is derived from “Imputed Police-Reported Alcohol Involvement” in the Person data file.

SAS Name: **ALCHL_IM**

Discontinued ACCIDENT Data Elements

Definition: This data element records the prevailing atmospheric conditions that existed at the time of the crash as indicated in the police crash report.

Additional Information: This data element identifies up to two values. If more than two atmospheric conditions were reported, the two conditions that most affect visibility were selected. Accident.WEATHER1 and Accident.WEATHER2 were the coded data elements, and Accident.WEATHER was derived from these two.

The two coded data elements were discontinued after 2019. Beginning in 2020 all applicable atmospheric conditions are selected and stored in the Weather data file. Only the derived data element WEATHER is still stored in the Accident data file. It is now derived from the multiple responses in the Weather data file using the same hierarchy.

SAS Name: WEATHER1, WEATHER2

Attribute Codes

2016- 2017	2018- 2019	
0	0	No Additional Atmospheric Conditions
1	1	Clear
2	2	Rain
3	3	Sleet or Hail
4	4	Snow
5	5	Fog, Smog, Smoke
6	6	Severe Crosswinds
7	7	Blowing Sand, Soil, Dirt
8	8	Other
10	10	Cloudy
11	11	Blowing Snow
12	12	Freezing Rain or Drizzle
98	98	Not Reported
99	--	Unknown
--	99	Reported as Unknown

Definition: This data element records factors related to the crash expressed in the case materials.

Additional Information: There are also vehicle-level-related factors in the Vehicle data file, VEH_SC1 and VEH_SC2 and driver-related factors, also in the Vehicle data file, namely DR_SF1, DR_SF2, DR_SF3, and DR_SF4. In addition there are person-related factors P_SF1, P_SF2, and P_SF3 in the Person data file.

The CRSS coder may have used any of the three data elements to code a related factor. One must test all three data elements to insure that the selected related factor is included.

Beginning in 2020 this data element was no longer collected at the Accident level. It is now collected in the Crashrf data file as CRASHRF.

SAS Name: CF1, CF2, CF3

The VEHICLE Data File

The Vehicle data file includes motor vehicle in transport data as well as driver and precrash data. It contains the data elements CASENUM, PSU, PJ, STRATUM, PSUSTRAT, PSU_VAR, REGION, URBANICITY, WEIGHT, and VEH_NO, which are described in the Key Data Elements at the beginning of the Data Element Definitions and Codes section. The Vehicle data file also contains the data elements on the following pages.

CASENUM and VEH_NO are the unique identifiers for each record. CASENUM should be used to merge the Vehicle data file with the Accident data file. CASENUM and VEH_NO should be used to merge the Vehicle data file with other vehicle-level data files and the Person data file.

V4 *Number of Occupants*

Definition: This data element is a count of the number of occupants in this vehicle.

Additional Information: This data element also appears in the Parkwork data file as PNUMOCCS.

SAS Name: NUMOCCS

Attribute Codes

2016-Later

0	None
1-98	Number of Occupants
99	Unknown

V5 *Unit Type*

Definition: This data element identifies the type of unit that applies to this motor vehicle at the time it became an involved vehicle in the crash and was reported as a unit on the police crash report.

Additional Information: This data element also appears in the Parkwork data file as PTYPE. The valid attributes for PTYPE are:

- 2 Motor Vehicle Not in Transport Within the Trafficway
- 3 Motor Vehicle Not in Transport Outside the Trafficway
- 4 Working Motor Vehicle (Highway Construction, Maintenance, Utility Only)

SAS Name: **UNITTYPE**

Attribute Codes

2016-Later

- 1 Motor Vehicle in Transport (Inside or Outside the Trafficway)

V6 *Hit and Run*

Definition: This data element identifies whether this vehicle was a contact vehicle in the crash that did not stop to render aid (this can include drivers who flee the scene on foot). Hit and run is coded when a motor vehicle in transport, or its driver, departs from the scene; motor vehicles not in transport are excluded. It does not matter whether the hit-and-run vehicle was striking or struck.

Additional Information: This data element also appears in the Parkwork data file as PHIT_RUN.

SAS Name: HIT_RUN

Attribute Codes

<i>2016- 2017</i>	<i>2018- 2019</i>	<i>2020- Later</i>	
0	0	0	No
1	1	1	Yes
9	--	--	Unknown
--	9	--	Reported as Unknown

V9 *Vehicle Identification Number (VIN)*

Definition: This data element records the vehicle identification number (VIN) of this vehicle assigned by the vehicle manufacturer. The VIN contains information on the vehicle such as: manufacturer, model year, model, body type, restraint type, etc.

Additional Information: The vehicle manufacturers use the VIN to describe certain characteristics of a vehicle and to assign a serial number to the vehicle.

Prior to 2018 if a character of the VIN is missing or undecipherable, the VIN length will be less than 12 characters. Starting in 2018 an asterisk (*) is used for missing or undecipherable VIN characters. Prior to 2020 the Data Element ID was V13.

This data element also appears in the Parkwork data file as PVIN.

SAS Name: VIN

Attribute Codes

<i>2016-2017</i>	<i>2018-Later</i>	
000000000000	000000000000	No VIN Required
xxxxxxxxxxxx	xxxxxxxxxxxx	First 12 Characters of the VIN
888888888888	888888888888	Not Reported
999999999999	--	Unknown
--	999999999999	Reported as Unknown
--	*	VIN Character Missing or Not Decipherable

V10 Vehicle Model Year

Definition: This data element identifies the manufacturer's model year of this vehicle.

Additional Information: Prior to 2020 the Data Element ID was V12.

This data element also appears in the Person data file and in the Parkwork data file as PMODYEAR.

SAS Name: MOD_YEAR

Attribute Codes

2016-Later

xxxx	Actual Model Year
9998	Not Reported
9999	Unknown

V10I Imputed Vehicle Model Year

Definition: This imputed data element has the same definition and data element values as Model Year, excluding value 9999 for unknown model year and value 9998 for not reported.

Additional Information: Prior to 2020 the Data Element ID was V12I.

See the [CRSS Imputation](#) section of this manual.

SAS Name: MDLYR_IM

V11 vPIC Make

Definition: This element identifies the Make (manufacturer brand name) of this vehicle as per NHTSA vPIC submissions.

Additional Information: For more information on NHTSA's Product Information Catalog and Vehicle Listing (vPIC), go to <https://vpic.nhtsa.dot.gov/>.

A complete listing of vPIC Makes can be downloaded using the following URL:
<https://vpic.nhtsa.dot.gov/api/vehicles/getallmakes?format=csv>.

The vPIC Make Name (make_name) and vPIC Make ID (make_id) in the listing can be used to download the vPIC Models for a particular vPIC Make. (See [vPIC Model](#) for more details.)

This data element also appears in the Person data file and in the Parkwork data file as PVPICMAKE.

SAS Name: **VPICMAKE**

Attribute Codes

2020- Later

xxxxx	Actual 5-Digit Make
99997	Other
99998	Not Reported
99999	Unknown

V12 vPIC Model

Definition: This element identifies the Model of this vehicle using NHTSA’s VIN decoder application, vPIC.

Additional Information: For more information on NHTSA’s Product Information Catalog and Vehicle Listing (vPIC), go to <https://vpic.nhtsa.dot.gov/>.

A complete listing of vPIC Models for a particular vPIC Make can be downloaded using the following URLs as a guide. The first uses vPIC Make ID (make_id) as a search parameter and the second uses vPIC Make Name (make_name). (See [vPIC Make](#) for obtaining vPIC Make Names and IDs.)

- Replace * in the URL with vPIC Make ID:
https://vpic.nhtsa.dot.gov/api/vehicles/GetModelsForMakeId/*?format=csv
- Replace * in the URL with vPIC Make Name:
https://vpic.nhtsa.dot.gov/api/vehicles/getmodelsformake/*?format=csv

Example 1: Use the following URLs to download all the Models for **Buick**:

Use **Buick** Make ID **468** as parameter:

<https://vpic.nhtsa.dot.gov/api/vehicles/GetModelsForMakeId/468?format=csv>

Use the Make Name “**Buick**” as parameter:

<https://vpic.nhtsa.dot.gov/api/vehicles/getmodelsformake/Buick?format=csv>

Example 2: Use the following URLs to download all the Models for **Toyota**

Use **Toyota** Make ID **448** as parameter:

<https://vpic.nhtsa.dot.gov/api/vehicles/GetModelsForMakeId/448?format=csv>

Use the Make Name “**Toyota**” as parameter:

<https://vpic.nhtsa.dot.gov/api/vehicles/getmodelsformake/Toyota?format=csv>

This data element also appears in the Person data file and in the Parkwork data file as PVPICMODEL.

SAS Name: **VPICMODEL**

Attribute Codes

**2020-
Later**

xxxxx	Actual 5-Digit Model
99997	Other
99998	Not Reported
99999	Unknown

V13 vPIC Body Class

Definition: This element identifies a classification of this vehicle based on its general body configuration, size, shape, doors, etc. as defined by the manufacturer.

Additional Information: For more information on NHTSA's Product Information Catalog and Vehicle Listing (vPIC), go to <https://vpic.nhtsa.dot.gov/>.

See [Appendix C: Analytical Classification of Select CRSS Data Elements](#) for standard classifications for this data element.

Attributes with an asterisk (*) have the finished body class for an incomplete vehicle captured under Final Stage Body Class.

This data element also appears in the Person data file and in the Parkwork data file as PVPICBODYCLASS.

SAS Name: **VPICBODYCLASS**

V15 NCSA Model

Definition: This data element identifies the NCSA model of this vehicle within a given NCSA make.

Additional Information: Prior to 2020 this data element's name was "Vehicle Model" and the Data Element ID was V10.

This data element also appears in the Person data file and in the Parkwork data file as PMODEL.

SAS Name: **MODEL**

Attribute Codes

2016-Later

See the current [FARS/CRSS Coding and Validation Manual](#) for vehicle model codes.

V16 NCSA Body Type

Definition: This data element identifies a classification of this vehicle based on its general body configuration, size, shape, doors, etc. as defined by NCSA.

Additional Information: Prior to 2020 this data element's name was "Body Type" and the Data Element ID was V11.

See [Appendix C: Analytical Classification of Select CRSS Data Elements](#) for the standard NCSA classifications for this data element.

This data element also appears in the Person data file and in the Parkwork data file as PBODYTYP.

SAS Name: BODY_TYP

V16I Imputed NCSA Body Type

Definition: The attributes for this imputed data element have changed over the years to mirror the values for “NCSA Body Type,” excluding values 49, 79, and 99 for unknown light vehicle type, unknown truck type (light/medium/heavy), and unknown body type, respectively, and value 98 for not reported body type.

Additional Information: Prior to 2020 this data element’s name was "Imputed Body Type" and the Data Element ID was V11I.

See the [CRSS Imputation](#) section of this manual.

SAS Name: **BDYTYP_IM**

V17 *Final Stage Body Class*

Definition: This element captures the completed/finished body class for an Incomplete Vehicle. An incomplete vehicle is completed by a final stage manufacturer. The intent of this data element is to capture the body class for incomplete vehicles when they are finished for road-use.

Additional Information: This data element is only applicable to incomplete vehicles under vPIC Body Class, and the attributes are a subset of the vPIC Body Class attributes. Information captured in this data element is based on the police crash report.

This data element also appears in the Person data file and in the Parkwork data file as PICFINALBODY.

SAS Name: **ICFINALBODY**

V18 Power Unit Gross Vehicle Weight Rating (GVWR)

Definition: This element identifies the range of Gross Vehicle Weight Rating of the power unit as identified by the manufacturer through the vehicle's VIN submission. GVWR_FROM defines the lowest value and GVWR_TO defines the highest value for the range of the GVWR specified by the manufacturer as the recommended loaded weight for a vehicle.

Additional Information: These data elements also appear in the Parkwork data file as PGVWR_FROM and PGVWR_TO.

SAS Name: **GVWR_FROM, GVWR_TO**

Attribute Codes

2020- Later

- 11 Class 1: 6,000 lbs or less (2,722 kg or less)
- 12 Class 2: 6,001 - 10,000 lbs (2,722 - 4,536 kg)
- 13 Class 3: 10,001 - 14,000 lbs (4,536 - 6,350 kg)
- 14 Class 4: 14,001 - 16,000 lbs (6,350 - 7,258 kg)
- 15 Class 5: 16,001 - 19,500 lbs (7,258 - 8,845 kg)
- 16 Class 6: 19,501 - 26,000 lbs (8,845 - 11,794 kg)
- 17 Class 7: 26,001 - 33,000 lbs (11,794 - 14,969 kg)
- 18 Class 8: 33,001 lbs and above (14,969 kg and above)
- 98 Not Reported
- 99 Reported as Unknown

V19 Vehicle Trailing

Definition: This data element identifies whether this vehicle had any attached trailing units or was towing another motor vehicle. A trailing unit can be a horse trailer, fifth wheel trailer, camper, boat, truck trailer, towed vehicle or any other trailer.

Additional Information: Prior to 2020 the Data Element ID was V14.

This data element also appears in the Person data file and in the Parkwork data file as PTRAILER.

SAS Name: **TOW_VEH**

Attribute Codes

2016-Later

- 0 No Trailing Units
- 1 Yes, One Trailing Unit
- 2 Yes, Two Trailing Units
- 3 Yes, Three or More Trailing Units
- 4 Yes, Number of Trailing Units Unknown
- 5 Vehicle Towing Another Motor Vehicle – Fixed Linkage
- 6 Vehicle Towing Another Motor Vehicle – Non-fixed Linkage
- 9 Unknown

V20 *Trailer Vehicle Identification Number*

Definition: This data element records the vehicle identification number (VIN) of any trailing units of a combination vehicle.

Additional Information: Prior to 2018 if a character of the VIN is missing or undecipherable, the VIN length will be less than 12 characters. Starting in 2018 an asterisk (*) is used for missing or undecipherable VIN characters. Prior to 2020 the Data Element ID was V15.

These data elements also appear in the Parkwork data file as PTRLR1VIN, PTRLR2VIN, and PTRLR3VIN.

SAS Name: **TRLR1VIN, TRLR2VIN, TRLR3VIN**

V21 Trailer Gross Vehicle Weight Rating (GVWR)

Definition: This element identifies the Gross Vehicle Weight Rating of any trailing units as identified by the manufacturer in the vehicle's VIN.

Additional Information: These data elements also appear in the Parkwork data file as PTRLR1GVWR, PTRLR2GVWR, and PTRLR3GVWR.

SAS Name: **TRLR1GVWR, TRLR2GVWR, TRLR3GVWR**

Attribute Codes

2020-

Later

- 0 No Trailer GVWR Required
- 11 Class 1: 6,000 lbs or less (2,722 kg or less)
- 12 Class 2: 6,001 - 10,000 lbs (2,722 - 4,536 kg)
- 13 Class 3: 10,001 - 14,000 lbs (4,536 - 6,350 kg)
- 14 Class 4: 14,001 - 16,000 lbs (6,350 - 7,258 kg)
- 15 Class 5: 16,001 - 19,500 lbs (7,258 - 8,845 kg)
- 16 Class 6: 19,501 - 26,000 lbs (8,845 - 11,794 kg)
- 17 Class 7: 26,001 - 33,000 lbs (11,794 - 14,969 kg)
- 18 Class 8: 33,001 lbs and above (14,969 kg and above)
- 77 No Trailing Units
- 98 Not Reported
- 99 Reported as Unknown

V22 *Jackknife*

Definition: This data element identifies whether this vehicle experienced a jackknife anytime during the unstabilized situation.

Additional Information: Jackknife applies to a condition that occurs to a “semi” truck (i.e., cab and one or more trailers) while in motion. The condition reflects a loss of control of the truck by the driver in which the trailer yaws more than 15 degrees from its normal straight line path behind the cab. If the final resting configuration of the vehicle is in the jackknife position, it does not necessarily mean that the vehicle has jackknifed (such as, a crash occurring while the vehicle is backing up or parking).

Prior to 2020 the Data Element ID was V16.

SAS Name: **J_KNIFE**

Attribute Codes

2016-Later

- 0 Not an Articulated Vehicle
- 1 No
- 2 Yes, First Event
- 3 Yes, Subsequent Event

V23 *Motor Carrier Identification Number (MCID)*

Definition: This data element records the issuing authority and motor carrier identification number (if applicable) to this vehicle.

Additional Information: This 11-character data element is the combination of two data elements, the 2-digit “Motor Carrier Issuing Authority” code (MCARR_I1) followed by the 9-character “Identification Number” (MCARR_I2).

The Carrier Identification Number is found only on vehicles of interstate for-hire or private carriers in the transportation business. It is the unique number assigned to the Carrier by the United States Department of Commerce Commission, or the State. The number can be either a U.S. DOT number (on interstate private carriers) or an ICC MC number (interstate for-hire carriers). Collected only for buses and trucks over 4,500 kg GVWR (Body type = 60, 64, 66-79), this data element is applicable to the following vehicles:

- Medium/Heavy Trucks: vehicles with two axles/six tires and/or gross weight greater than 10,000 pounds.
- Buses with 16 or more seats (including the driver)
- Trucks and Vans of any size carrying hazardous cargo.
- Light commercial trucks pulling a trailer with gross combination weight rating (GCWR) greater than 10,000 pounds.

Prior to 2020 the Data Element ID was V17.

This data element also appears in the Parkwork data file as PMCARR_ID.

SAS Name: **MCARR_ID**

V23A MCID Issuing Authority

Definition: This data element records the issuing authority if applicable to this vehicle.

Additional Information: This data element is only applicable for the following vehicles:

- Medium/Heavy Trucks: vehicles with two axles/six tires and/or gross weight greater than 10,000 pounds.
- Buses with 16 or more seats (including the driver)
- Trucks and Vans of any size carrying hazardous cargo.
- Light commercial trucks pulling a trailer with gross combination weight rating (GCWR) greater than 10,000 pounds.

Prior to 2020 the Data Element ID was V17A.

This data element also appears in the Parkwork data file as PMCARR_I1.

V23B MCID Identification Number

Definition: This data element records the motor carrier identification number if applicable to this vehicle.

Additional Information: The Carrier Identification Number is found only on vehicles of interstate for-hire or private carriers in the transportation business. It is the unique number assigned to the Carrier by the United States Department of Commerce Commission, or the State. The number can be either a U.S. DOT number (on interstate private carriers) or an ICC MC number (interstate for-hire carriers). Collected only for buses and trucks over 4,500 kg GVWR (Body type = 60, 64, 66-79), this data element is applicable to the following vehicles:

- Medium/Heavy Trucks: vehicles with two axles/six tires and/or gross weight greater than 10,000 pounds.
- Buses with 16 or more seats (including the driver).
- Trucks and Vans of any size carrying hazardous cargo.
- Light commercial trucks pulling a trailer with gross combination weight rating (GCWR) greater than 10,000 pounds.

Prior to 2020 the Data Element ID was V17B.

This data element also appears in the Parkwork data file as PMCARR_I2.

SAS Name: MCARR_I2

V24 Vehicle Configuration

Definition: This data element describes the general configuration of this vehicle if applicable.

Additional Information: Not Applicable is used for automobiles, motorcycles, passenger vans (with less than 9 seats, including driver) and single-unit light trucks or cargo vans (10,000 lbs or less GVWR), not carrying hazardous cargo.

Prior to 2020 the Data Element ID was V19.

This data element also appears in the Parkwork data file as PV_CONFIG.

SAS Name: **V_CONFIG**

V25 *Cargo Body Type*

Definition: This data element describes the primary cargo carrying capability of this vehicle if applicable.

Additional Information: Passenger vehicles and light trucks that display a hazardous cargo placard are coded “No Cargo Body,” as are medium/heavy trucks with no cargo carrying capability. “Not Applicable” is coded only for passenger vehicles and light trucks and vans that do not display a hazardous cargo placard.

Prior to 2020 the Data Element ID was V20.

This data element also appears in the Parkwork data file as PCARGTYP.

99	--	--	Unknown
99	99	99	Reported as Unknown (Since 2018)

V29 *Emergency Motor Vehicle Use*

Definition: This data element identifies whether this vehicle was engaged in emergency use. Emergency Motor Vehicle Use indicates operation of any motor vehicle that is legally authorized by a government authority to respond to emergencies with or without the use of emergency warning equipment, such as a police vehicle, fire truck or ambulance while actually engaged in such response.

Additional Information: Prior to 2020 the Data Element ID was V24.

This data element also appears in the Person data file and in the Parkwork data file as PEM_USE.

SAS Name: **EMER_USE**

Attribute Codes

<i>2016- 2017</i>	<i>2018- Later</i>	
0	0	Not Applicable
2	2	Non-Emergency, Non-Transport

8	8	Not Reported
9	--	Unknown
--	9	Reported as Unknown

V30 *Travel Speed*

Definition: This data element records the speed the vehicle was traveling prior to the occurrence of the crash as reported by the investigating officer.

Additional Information: Prior to 2020 the Data Element ID was V25.

SAS Name: **TRAV_SP**

Attribute Codes

<i>2016- 2017</i>	<i>2018- Later</i>	
0	0	Stopped Motor Vehicle in Transport
1-151	1-151	Reported Speed up to 151 mph
997	997	Speed Greater Than 151 mph
998	998	Not Reported
999	--	Unknown
--	999	Reported as Unknown

V32 *Rollover*

Definition: This data element identifies this vehicle's involvement in a rollover or overturn during the crash. Rollover is defined as any vehicle rotation of 90 degrees or more about any true longitudinal or lateral axis. Rollover can occur at any time during the crash.

Additional Information: Prior to 2020 the Data Element ID was V27.

This data element also appears in the Person data file.

SAS Name: **ROLLOVER**

Attribute Codes

2016-Later

- 0 No Rollover
- 1 Rollover, Tripped By Object/Vehicle
- 2 Rollover, Untripped
- 9 Rollover, Unknown Type

V33 *Location of Rollover*

Definition: This data element identifies the location of the trip point or start of this vehicle's roll.

Additional Information: Prior to 2020 the Data Element ID was V28.

SAS Name: ROLINLOC

Attribute Codes

2016-Later

- 0 No Rollover
- 1 On Roadway
- 2 On Shoulder
- 3 On Median/Separator
- 4 In Gore
- 5 On Roadside
- 6 Outside of Trafficway
- 7 In Parking Lane/Zone
- 9 Unknown

V34A Area of Impact – Initial Contact Point

Definition: This data element identifies the area on this vehicle that produced the first instance of injury to non-motorists or occupants of this vehicle, or that resulted in the first instance of damage to other property or to this vehicle.

Additional Information: This data element is derived from the crash events for the vehicle. It is the first recorded “Area of Impact (This Vehicle)” value for this vehicle. See [Appendix B: Rules for Derived Data Elements](#) for an explanation of this data element and how it is derived.

Prior to 2020 the Data Element ID was V29A.

This data element also appears in the Person data file and in the Parkwork data file as PIMPACT1.

SAS Name: **IMPACT1**

Attribute Codes

<i>2016</i>	<i>2017</i>	<i>2018</i>	<i>2019- Later</i>

V34AI Imputed Area of Impact – Initial Contact Point

Definition: This imputed data element has the same definition and data element values as Initial Contact Point, excluding value 99 for unknown initial contact point and value 98 for not reported initial contact point.

Additional Information: Prior to 2020 the Data Element ID was V29AI.

See the [CRSS Imputation](#) section of this manual.

SAS Name: **IMPACT1_IM**

V35 *Extent of Damage*

Definition: This data element records the amount of damage sustained by this vehicle as indicated on the police crash report based on an operational damage scale.

Additional Information: Prior to 2020 the Data Element ID was V30.

This data element also appears in the Parkwork data file as PVEH_SEV.

SAS Name: **DEFORMED**

Attribute Codes

<i>2016- 2017</i>	<i>2018- Later</i>	
0	0	No Damage
2	2	Minor Damage
4	4	Functional Damage
6	6	Disabling Damage
8	8	Not Reported
9	--	Unknown
--	9	Reported as Unknown

V36 Vehicle Removal

Definition: This data element describes the mode by which this vehicle left the scene of the crash.

Additional Information: Prior to 2020 the Data Element ID was V31.

This data element also appears in the Parkwork data file as PTOWED.

SAS Name: **TOWED**

Attribute Codes

<i>2016- 2017</i>	<i>2018- 2019</i>	<i>2020- Later</i>	
2	2	2	Towed Due to Disabling Damage
3	3	--	Towed Not Due to Disabling Damage
--	--	3	Towed But Not Due to Disabling Damage
5	5	5	Not Towed
--	7	7	Towed, Unknown Reason
8	8	8	Not Reported
9	--	--	Unknown
--	9	9	Reported as Unknown

V38 *Most Harmful Event*

Definition: This data element describes the event that resulted in the most severe injury or, if no injury, the greatest property damage involving this vehicle.

Additional Information: “First Harmful Event” applies to the crash (HARM_EV). “Most Harmful Event” applies to the vehicle. “First Harmful Event,” “Most Harmful Event,” and the “Sequence of Events” data elements have the same harmful event attributes. “Sequence of Events” also has non-harmful event attributes.

Prior to 2020 the Data Element ID was V33.

This data element also appears in the Parkwork data file as PM_HARM.

SAS Name: **M_HARM**

V38I Imputed Most Harmful Event

Definition: This imputed data element has the same data element values as Most Harmful Event, excluding values 98 and 99 for not reported and unknown most harmful events.

Additional Information: Prior to 2020 the Data Element ID was V33I.

See the [CRSS Imputation](#) section of this manual.

SAS Name: **VEVENT_IM**

V39 *Fire Occurrence*

Definition: This data element identifies whether a fire in any way related to the crash occurred in this vehicle.

Additional Information: Prior to 2020 the Data Element ID was V34.

This data element also appears in the Person data file and in the Parkwork data file as PFIRE.

SAS Name: **FIRE_EXP**

Attribute Codes

2016-Later

- 0 No or Not Reported
- 1 Yes

V40A Automation System or Systems Present in Vehicle

Definition: This data element indicates the presence of an Automation System or Systems in this vehicle.

Additional Information: An automation system is the hardware and software that are collectively capable of performing part of or all the dynamic driving task on a sustained basis. Automated Driving System (ADS), is used generically to describe any system capable of level 1-5 driving automation.

Prior to 2020 the Data Element ID was V35A.

SAS Name: **ADS_PRES**

Attribute Codes

2019-Later

- 0 No
- 1 Yes
- 98 Not Reported
- 99 Reported as Unknown

V40B Highest Automation System Level Present in Vehicle

Definition: This data element indicates the highest level of automation present in this vehicle.

Additional Information: These systems do not have to be engaged in this vehicle at the time of the crash.

Prior to 2020 the Data Element ID was V35B.

SAS Name: **ADS_LEV**

Attribute Codes

2019-Later

- 0 Level 0 – No Automation
- 1 Level 1 – Driver Assistance Present
- 2 Level 2 – Partial Automation Present
- 3 Level 3 – Conditional Automation Present
- 4 Level 4 – High Automation Present
- 5 Level 5 – Full Automation Present
- 9 Automation Present, Level Unknown
- 98 Not Reported
- 99 Reported as Unknown

V40C Highest Automation System Level Engaged at Time of Crash

Definition: This data element indicates the highest level of automation that was known to have been engaged in this vehicle at the time of the crash.

Additional Information: Prior to 2020 the Data Element ID was V35C.

SAS Name: **ADS_ENG**

Attribute Codes

2019-Later

- 0 Level 0 – No Automation
- 1 Level 1 – Driver Assistance Engaged
- 2 Level 2 – Partial Automation Engaged
- 3 Level 3 – Conditional Automation Engaged
- 4 Level 4 – High Automation Engaged
- 5 Level 5 – Full Automation Engaged
- 6 Automation Systems Engaged, Level Unknown
- 9 Automation Systems Present, Unknown if Any Engaged
- 90 Automation Systems Present, Not Engaged
- 98 Not Reported
- 99 Reported as Unknown

V90 *Maximum Injury Severity in Vehicle*

Definition: This data element records the single most severe injury level reported for any occupant in this vehicle. This data element is derived by comparing “Injury Severity” from the Person data file for each occupant record in this vehicle. The following is the order of severity codes.

- 4-Fatal
- 3-Suspected Serious Injury
- 2-Suspected Minor Injury
- 1-Possible Injury
- 5-Injured, Unknown Severity
- 0-No Apparent Injury
- 6-Died Prior
- 9- Unknown/Not Reported
- 8-No Person in Vehicle

Additional Information: See [Appendix B: Rules for Derived Data Elements](#) for an expanded explanation of this data element and how it is derived.

SAS Name: **MAX_VSEV**

Attribute Codes

2016-Later

- | | |
|---|---------------------------|
| 0 | No Apparent Injury |
| 1 | Possible Injury |
| 2 | Suspected Minor Injury |
| 3 | Suspected Serious Injury |
| 4 | Fatal |
| 5 | Injured, Severity Unknown |
| 6 | Died Prior to Crash |
| 8 | No Person in Vehicle |
| 9 | Unknown/Not Reported |

V90I Imputed Maximum Injury Severity in Vehicle

Definition: This imputed data element has the same definition and data element values as Maximum Injury Severity in Vehicle, excluding value 9 for unknown maximum injury severity.

Additional Information: See the [CRSS Imputation](#) section of this manual.

The data element is derived from “Imputed Injury Severity” in the Person data file.

SAS Name: **MXVSEV_IM**

V91 Number Injured in Vehicle

Definition: This data element records the number of people injured in the vehicle and is derived by counting all the people with “Injury Severity” of (1, 2, 3, 4, or 5) in a vehicle. This count includes fatally injured occupants.

Additional Information: See [Appendix B: Rules for Derived Data Elements](#) for an expanded explanation of this data element and how it is derived.

SAS Name: **NUM_INJV**

Attribute Codes

2016-Later

- 0 No Person Injured in Vehicle
- 1-97 Actual Number
- 98 No Person in the Vehicle
- 99 All Persons in the Vehicle Are Unknown if Injured

V91I Imputed Number Injured in Vehicle

Definition: This imputed data element has the same definition and data element values as “Number Injured in Vehicle,” excluding value 99 for unknown number injured, which is imputed, and the attribute code 98, which is converted to code 0.

Additional Information: See the [CRSS Imputation](#) section of this manual.

This data element is derived from “Imputed Injury Severity” in the Person data file.

SAS Name: **NUMINJ_IM**

V92 *Driver Drinking in Vehicle*

Definition: This data element records alcohol use by the driver of the vehicle. The data element is derived from “Police-Reported Alcohol Involvement” in the Person data file.

Additional Information: See [Appendix B: Rules for Derived Data Elements](#) for an expanded explanation of this data element and how it is derived.

SAS Name: **VEH_ALCH**

Attribute Codes

2016-Later

- 1 Alcohol Involved
- 2 No Alcohol Involved
- 8 No Driver Present/Unknown if Driver Present
- 9 Unknown

V92I *Imputed Driver Drinking in Vehicle*

Definition: This data element has the same definition and data element values as Driver “Drinking in Vehicle,” excluding value 9 for unknown alcohol involvement, which is imputed, and value 8, which is converted to attribute code 2.

Additional Information: See the [CRSS Imputation](#) section of this manual.

This imputed data element is derived from “Imputed Police-Reported Alcohol Involvement” in the Person data file.

SAS Name: **V_ALCH_IM**

V100 NCSA Make Model Combined

Definition: This derived data element represents the 5-digit combination of two data elements, the 2-digit “NCSA Make” code (MAKE) followed by the 3-digit “NCSA Model” code (MODEL).

Additional Information: Prior to 2020 this data element’s name was “Make Model Combined.”

This data element also appears in the Person data file and in the Parkwork data file as PMAK_MOD.

SAS Name: MAK_MOD

Attribute Codes

2016-Later

See the current [FARS/CRSS Coding and Validation Manual](#) for vehicle make and model codes.

D4 Driver Presence

Definition: This data element identifies whether a driver was present in this vehicle at the onset of the unstabilized situation.

Additional Information:

SAS Name: **DR_PRES**

Attribute Codes

2016-Later

- 0 No Driver Present/Not Applicable
- 1 Yes
- 9 Unknown

D6 Driver's ZIP Code

Definition: This data element records the ZIP Code of the driver's address as listed on the police crash report.

Additional Information:

SAS Name: **DR_ZIP**

Attribute Codes

2016- 2019	2020- Later	
00000	00000	Not Resident of U.S. or Territories
xxxxx	xxxxx	Actual ZIP Code
99997	99997	No Driver Present/Unknown if Driver Present
--	99998	Not Reported
99999	--	Unknown
--	99999	Reported as Unknown

D22 Speeding Related

Definition: This data element identifies if the driver was speeding and it was related to the crash as identified by law enforcement.

Additional Information:

SAS Name: **SPEEDREL**

Attribute Codes

<i>2016- 2017</i>	<i>2018- Later</i>	
0	0	No
2	2	Yes, Racing
3	3	Yes, Exceeded Speed Limit
4	4	Yes, Too Fast for Conditions
5	5	Yes, Specifics Unknown
8	8	No Driver Present/Unknown if Driver Present
9	--	Unknown
--	9	Reported as Unknown

PC5 Trafficway Description

Definition: This data element identifies the attribute that best describes the trafficway flow just prior to this vehicle's critical precrash event.

Additional Information:

SAS Name: **VTRAFWAY**

Attribute Codes

<i>2016- 2017</i>	<i>2018- Later</i>	
0	0	Non-Trafficway or Driveway Access
1	1	Two-Way, Not Divided
2	2	Two-Way, Divided, Unprotected Median
3	3	Two-Way, Divided, Positive Median Barrier
4	4	One-Way Trafficway
5	5	Two-Way, Not Divided With a Continuous Left-Turn Lane
6	6	Entrance/Exit Ramp
8	8	Not Reported
9	--	Unknown
--	9	Reported as Unknown

PC6 Total Lanes in Roadway

Definition: This data element identifies the attribute that best describes the number of travel lanes just prior to this vehicle's critical precrash event.

Additional Information: The number of lanes refers to the number of lanes of a continuous cross-section of roadway. For example, a local roadway with one lane going north and one lane going south would be coded as two lanes. However, if a trafficway is a divided highway with two lanes going north, a median, and two lanes going south, then the number of lanes is coded as two. If a trafficway has two lanes going north immediately adjacent to two lanes going south, one continuous cross-section of roadway, then the number of lanes is coded as four. This data element can be used with the Trafficway Description data element VTRAFWAY to determine the trafficway geometry. For example: If (VNUM_LAN=2) AND (VTRAFWAY=1), then one has a two-lane roadway that is not physically divided, which is what most people think of as a two-lane road (i.e., one lane going in each direction).

If the roadway is a divided trafficway, the number of travel lanes counts only lanes in the direction of travel of the first harmful event. If the roadway is an undivided trafficway, the number of travel lanes are all the lanes regardless of their direction of travel.

SAS Name: **VNUM_LAN**

Attribute Codes

2016- 2017	2018- Later	
0	0	Non-Trafficway or Driveway Access
1	1	One Lane
2	2	Two Lanes
3	3	Three Lanes
4	4	Four Lanes
5	5	Five Lanes
6	6	Six Lanes
7	7	Seven or More Lanes
8	8	Not Reported
9	--	Unknown
--	9	Reported as Unknown

PC7 *Speed Limit*

Definition: This data element records the posted speed limit in miles per hour.

Additional Information:

SAS Name: **VSPD_LIM**

Attribute Codes

***2016- 2018-
2017 Later***

0	0	No Statutory Limit/Non-Trafficway or Driveway Access
5-95	5-95	Speed Limit (in 5 mph Increments)
98	98	Not Reported
99	--	Unknown
--	99	Reported as Unknown

PC8 Roadway Alignment

Definition: This data element identifies the attribute that best represents the roadway alignment prior to this vehicle's critical precrash event.

Additional Information:

SAS Name: VALIGN

Attribute Codes

2016- 2017	2018- Later	
0	0	Non-Trafficway or Driveway Access
1	1	Straight
2	2	Curve Right
3	3	Curve Left
4	4	Curve – Unknown Direction
8	8	Not Reported
9	--	Unknown
--	9	Reported as Unknown

PC9 Roadway Grade

Definition: This data element identifies the attribute that best represents the roadway grade prior to this vehicle's critical precrash event.

Additional Information:

SAS Name: **VPROFILE**

Attribute Codes

2016- 2017	2018- Later	
0	0	Non-Trafficway or Driveway Access
1	1	Level
2	2	Grade, Unknown Slope
3	3	Hillcrest
4	4	Sag (Bottom)
5	5	Uphill
6	6	Downhill
8	8	Not Reported
9	--	Unknown
--	9	Reported as Unknown

PC11 Roadway Surface Condition

Definition: This data element identifies the attribute that best represents the roadway surface condition prior to this vehicle's critical precrash event.

Additional Information:

SAS Name: VSURCOND

Attribute Codes

<i>2016- 2017</i>	<i>2018- Later</i>	
0	0	Non-Trafficway or Driveway Access
1	1	Dry
2	2	Wet
3	3	Snow
4	4	Ice/Frost
5	5	Sand
6	6	Water (Standing or Moving)
7	7	Oil
8	8	Other
10	10	Slush
11	11	Mud, Dirt, Gravel
98	98	Not Reported
99	--	Unknown
--	99	Reported as Unknown

PC12 Traffic Control Device

Definition: This data element identifies the attribute that best describes the traffic controls in the vehicle's environment just prior to this vehicle's critical precrash event.

Additional Information: If a vehicle is controlled by more than one device, the device coded is based on the following priority:

- 51 - Officer, Crossing Guard, Flagman, etc.
- The lowest numbered device shown below.
- 0 - No traffic control device.

SAS Name: **VTRAFCON**

Attribute Codes

**2016- 2018-
2017 Later**

0 0 No Controls

TRAFFIC SIGNALS

1	1	Traffic Control Signal (on Colors) Without Pedestrian Signal
2	2	Traffic Control Signal (on Colors) With Pedestrian Signal
3	3	Traffic Control Signal (on Colors) Not Known if Pedestrian Signal
4	4	Flashing Traffic Control Signal
7	7	Lane Use Control Signal
8	8	Other Highway Traffic Signal
9	9	Unknown Highway Traffic Signal

REGULATORY SIGNS

20	20	Stop Sign
21	21	Yield Sign
23	23	School Zone Sign/Device
28	28	Other Regulatory Sign
29	29	Unknown Regulatory Sign

OTHER SIGNS AND SIGNALS

40	40	Warning Sign
50	50	Person
65	65	Railway Crossing Device
98	98	Other

NOT REPORTED AND UNKNOWN

97	97	Not Reported
99	--	Unknown
--	99	Reported as Unknown

PC13 Traffic Control Device Functioning

Definition: This data element identifies the functionality of the traffic control device recorded for this vehicle in the data element “Traffic Control Device.”

Additional Information:

SAS Name: VTCONT_F

Attribute Codes

<i>2016- 2017</i>	<i>2018</i>	<i>2019- Later</i>	
0	0	0	No Controls
1	1	1	Device Not Functioning
2	2	2	Device Functioning – Functioning Improperly

--	--	4	Device Not Functioning or Device Functioning Improperly, Specifics Unknown
8	8	8	Not Reported
9	--	--	Unknown
--	9	9	Reported as Unknown

PC17 Pre-Event Movement (Prior to Recognition of Critical Event)

Definition: This data element identifies the attribute that best describes this vehicle's activity prior to the driver's realization of an impending critical event or just prior to impact if the driver took no action or had no time to attempt any evasive maneuvers.

Additional Information: These data elements were designed to identify: (1) what the vehicle was doing just prior to the critical precrash event, (2) what made the vehicle's situation critical, (3) what was the corrective action made, if any, to this critical situation, and what was the (4) location and (5) stability of the vehicle just prior to impact.

SAS Name: **P_CRASH1**

Attribute Codes

2016-Later

- 0 No Driver Present/Unknown if Driver Present
- 1 Going Straight
- 2 Decelerating in Road
- 3 Accelerating in Road
- 4 Starting in Road
- 5 Stopped in Roadway
- 6 Passing or Overtaking Another Vehicle
- 7 Disabled or "Parked" in Travel Lane
- 8 Leaving a Parking Position
- 9 Entering a Parking Position
- 10 Turning Right
- 11 Turning Left
- 12 Making a U-turn
- 13 Backing Up (Other Than for Parking Position)
- 14 Negotiating a Curve
- 15 Changing Lanes
- 16 Merging
- 17 Successful Corrective Action to a Previous Critical Event
- 98 Other
- 99 Unknown

PC17I Imputed Pre-Event Movement (Prior to Recognition of Critical Event)

Definition: This imputed data element has the same definition and data element values as Movement Prior to Critical Event, excluding value 99 for unknown movement prior to critical event.

Additional Information: See the [CRSS Imputation](#) section of this manual.

SAS Name: **PCRASH1_IM**

PC19 Critical Event- Precrash

Definition: This data element identifies the attribute that best describes the critical event that made this crash imminent (i.e., something occurred that made the collision possible).

Additional Information: A critical event is coded for each vehicle and identifies the circumstances leading to the vehicle's first impact in the crash.

These data elements were designed to identify: (1) what the vehicle was doing just prior to the critical precrash event, (2) what made the vehicle's situation critical, (3) what was the corrective action made, if any, to this critical situation, and what was the (4) location and (5) stability of the vehicle just prior to impact.

SAS Name: **P_CRASH2**

Attribute Codes

----	----	-------------------------------

UNKNOWN

99	99	Unknown
----	----	---------

PC20 Attempted Avoidance Maneuver

Definition: This data element identifies the attribute that best describes the movements/actions taken by this driver, within a critical crash envelope, in response to the “Critical Precrash Event.”

Additional Information: This data element identifies the actions taken by the driver in response to the impending danger. Because this data element focuses upon the driver’s action just prior to the first harmful event it is coded independently of any maneuvers associated with this vehicle’s “Crash Type.”

These data elements were designed to identify: (1) what the vehicle was doing just prior to the critical precrash event, (2) what made the vehicle’s situation critical, (3) what was the corrective action made, if any, to this critical situation, and what was the (4) location and (5) stability of the vehicle just prior to impact.

SAS Name: **P_CRASH3**

Attribute Codes

2016-Later

- 0 No Driver Present/Unknown if Driver Present
- 1 No Avoidance Maneuver
- 5 Releasing Brakes
- 6 Steering Left
- 7 Steering Right
- 8 Braking and Steering Left
- 9 Braking and Steering Right
- 10 Accelerated
- 11 Accelerating and Steering Left
- 12 Accelerating and Steering Right
- 15 Braking and Unknown Steering Direction
- 16 Braking
- 98 Other Actions
- 99 Unknown/Not Reported

PC21 Pre-Impact Stability

Definition: This data element identifies the attribute that best describes the stability of this vehicle after the “Critical Precrash Event,” but before the impact.

Additional Information: These data elements were designed to identify: (1) what the vehicle was doing just prior to the critical precrash event, (2) what made the vehicle’s situation critical, (3) what was the corrective action made, if any, to this critical situation, and what was the (4) location and (5) stability of the vehicle just prior to impact.

SAS Name: **PCRASH4**

Attribute Codes

2016-Later

- 0 No Driver Present/Unknown if Driver Present
- 1 Tracking
- 2 Skidding Longitudinally – Rotation Less Than 30 Degrees
- 3 Skidding Laterally – Clockwise Rotation
- 4 Skidding Laterally – Counterclockwise Rotation
- 5 Skidding Laterally – Rotation Direction Unknown
- 7 Other Vehicle Loss-of-Control
- 9 Precrash Stability Unknown

PC22 Pre-Impact Location

Definition: This data element identifies the attribute that best describes the location of this vehicle after the “Critical Precrash Event,” but before the impact.

Additional Information: These data elements were designed to identify: (1) what the vehicle was doing just prior to the critical precrash event, (2) what made the vehicle’s situation critical, (3) what was the corrective action made, if any, to this critical situation, and what was the (4) location and (5) stability of the vehicle just prior to impact.

SAS Name: **PCRASH5**

Attribute Codes

2016-Later

- 0 No Driver Present/Unknown if Driver Present
- 1 Stayed in Original Travel Lane
- 2 Stayed on Roadway But Left Original Travel Lane
- 3 Stayed on Roadway, Not Known if Left Original Travel Lane
- 4 Departed Roadway
- 5 Remained off Roadway
- 6 Returned to Roadway
- 7 Entered Roadway
- 9 Unknown

PC23 Crash Type

Definition: This data element identifies the attribute that best describes the type of crash this vehicle was involved in based on the “First Harmful Event” and the precrash circumstances. For graphic descriptions of possible values see [Appendix A: PC23 Crash Type Diagram](#).

Additional Information:

SAS Name: ACC_TYPE

Attribute Codes

2016-Later

0 No Impact

CATEGORY I: SINGLE DRIVER

CONFIGURATION A: RIGHT ROADSIDE DEPARTURE

- 1 Drive off Road
- 2 Control/Traction Loss

- 66 Specifics Other
- 67 Specifics Unknown

CATEGORY IV: CHANGING TRAFFICWAY, VEHICLE TURNING

CONFIGURATION J: TURN ACROSS PATH

- 68 Initial Opposite Directions (Left/Right)
- 69 Initial Opposite Directions (Going Straight)
- 70 Initial Same Directions (Turning Right)
- 71 Initial Same Directions (Going Straight)
- 72 Initial Same Directions (Turning Left)
- 73 Initial Same Directions (Going Straight)

- 74 Specifics Other
- 75 Specifics Unknown

CONFIGURATION K: TURN INTO PATH

- 76 Turn Into Same Direction (Turning Left)
- 77 Turn Into Same Direction (Going Straight)
- 78 Turn Into Same Direction (Turning Right)
- 79 Turn Into Same Direction (Going Straight)
- 80 Turn Into Opposite Directions (Turning Right)
- 81 Turn Into Opposite Directions (Going Straight)
- 82 Turn Into Opposite Directions (Turning Left)
- 83 Turn Into Opposite Directions (Going Straight)
- 84 Specifics Other
- 85 Specifics Unknown

CATEGORY V: INTERSECTING PATHS (VEHICLE DAMAGE)

CONFIGURATION L: STRAIGHT PATHS

- 86 Striking from the Right
- 87 Struck on the Right
- 88 Striking from the Left
- 89 Struck on the Left
- 90 Specifics Other
- 91 Specifics Unknown

CATEGORY VI: MISCELLANEOUS

CONFIGURATION M: BACKING, ETC.

- 92 Backing Vehicle
- 93 Other Vehicle or Object
- 93 Other Vehicle
- 97 Untripped Rollover
- 98 Other Crash Type
- 99 Unknown Crash Type

Discontinued VEHICLE Data Elements

Gross Vehicle Weight Rating (discontinued)

Definition: This data element identifies the gross vehicle weight rating of this vehicle if applicable.

Additional Information: The Gross Vehicle Weight Rating (GVWR) or Gross Combination Weight Rating (GCWR) is a value specified by the manufacturer for a single-unit truck, truck tractor, or trailer. In the absence of a gross vehicle weight rating, an estimate of the gross weight of a fully loaded unit can be substituted.

This data element is the gross vehicle weight of the Power Unit only. The weight of trailers is not added. Beginning in 2020 this data element is replaced by two data elements, Power Unit GVWR and Trailer GVWR, which are derived from their VINs.

This data element also appears in the Parkwork data file as PGVWR.

SAS Name: GVWR

Attribute Codes

<i>2016- 2017</i>	<i>2018- 2019</i>	
0	0	Not Applicable
1	1	10,000 lbs or Less
2	2	10,001 lbs - 26,000 lbs
3	3	26,001 lbs or More
8	8	Not Reported
9	--	Unknown
--	9	Reported as Unknown

Imputed Hit and Run (discontinued)

Definition: This imputed data element has the same definition and data element values as “Hit and Run,” excluding value 9 for unknown hit and run.

Additional Information: See the [CRSS Imputation](#) section of this manual.

SAS Name: **HITRUN_IM** (2016-2019)

Related Factors- Driver Level (discontinued)

Definition: This data element records factors related to this driver expressed in the case materials.

Additional Information: There are also crash-level-related factors in the Accident data file, CF1, CF2, and CF3; vehicle-related factors, namely VEH_SC1 and VEH_SC2 in the Vehicle data file; and person-related factors P_SF1, P_SF2, and P_SF3 in the person data file.

The CRSS coder may have used any of the four data elements to code a related factor. One must test all four data elements to insure that the selected related factor is included.

The person-related factors P_SF1, P_SF2, and P_SF3 are all set to 0 for drivers.

Beginning in 2020 this data element was no longer collected at the Vehicle level. It is now collected in the Driverrf data file as DRIVERRF.

SAS Name: DR_SF1, DR_SF2, DR_SF3, DR_SF4

Attribute Codes

2016	2017	2018	2019	
0	0	0	0	None

99	99	--	--	Unknown
--	--	99	99	Reported as Unknown

Related Factors- Vehicle Level (discontinued)

Definition: This data element records factors related to this vehicle expressed in the case materials.

Additional Information: There are also crash-level-related factors in the Accident data file, CF1, CF2, and CF3; driver-related factors in the Vehicle data file, namely DR_SF1, DR_SF2, DR_SF3, and DR_SF4; and person-related factors P_SF1, P_SF2, and P_SF3 in the Person data file.

The CRSS coder may have used either of the two data elements to code a related factor. One must test both data elements to insure that the selected related factor is included.

These data elements also appear in the Parkwork data file as PVEH_SC1 and PVEH_SC2.

Prior to 2019 the Data Element ID was V34. Beginning in 2020 this data element was no longer collected at the Vehicle level. It is now collected in the Vehiclesf data file as VEHICLESF.

SAS Name: **VEH_SC1, VEH_SC2**

Attribute Codes

<i>2016- 2017</i>	<i>2018</i>	<i>2019</i>	
0	0	0	None
--	--	29	Default Code Used for Vehicle Numbering

39	39	39	Highway Construction, Maintenance or Utility Vehicle, in Transport (Inside or Outside Work Zone)
40	40	--	Highway Incident Response Vehicle
41	41	41	Police Fire or EMS Vehicle Working at the Scene of an Emergency or Performing Other Traffic Control Activities
42	42	42	Other Working Vehicle (Not Construction, Maintenance, Utility, Police, Fire, or EMS Vehicle)
44	44	44	Adaptive Equipment
--	45	45	Slide-in Camper
99	--	--	Unknown
--	99	99	Reported as Unknown

The PERSON Data File

The Person data file includes motorist and non-motorist data. It contains the data elements CASENUM, PSU, PJ, STRATUM, PSUSTRAT, PSU_VAR, REGION, URBANICITY, WEIGHT, VEH_NO, and PER_NO, which are described in the Key Data Elements at the beginning of the Data Element Definitions and Codes section. The Person data file also contains the data elements on the following pages.

CASENUM, VEH_NO, and PER_NO are the unique identifiers for each record. CASENUM should be used to merge the Person data file with the Accident data file for a set of all motorists and non-motorists. CASENUM and VEH_NO should be used to merge the Person data file with the Vehicle and Parkwork data files for a set of all motor vehicle occupants. CASENUM and PER_NO should be used to merge the Person data file with non-motorist person-level data files.

In the Person data file, motor vehicle occupants are PER_TYPE = 1, 2, 3, 9. Motor vehicle occupants have assigned vehicle numbers starting with 1. When PER_TYPE = 3, the occupied vehicle will be found in the PARKWORK data file. Non-motor vehicle occupants are PER_TYPE = 4, 5, 6, 7, 8, 10, 11, 12, 13, or 19. VEH_NO = 0 for non-motor vehicle occupants.

P5/NM5 Age

Definition: This data element identifies this person's age at the time of the crash, in years, with respect to their last birthday.

Additional Information:

SAS Name: AGE

Attribute Codes

<i>2016- 2017</i>	<i>2018- Later</i>	
0	0	Less Than One Year
1-120	1-120	Years of Age
998	998	Not Reported
999	--	Unknown
--	999	Reported as Unknown

P5/NM5I Imputed Age

Definition: This imputed data element has the same definition and data element values as Age, excluding the value 999 for unknown age and value 998 for not reported age.

Additional Information: See the [CRSS Imputation](#) section of this manual.

SAS Name: AGE_IM

P6/NM6 Sex

Definition: This data element identifies the sex of this person involved in the crash.

Additional Information:

SAS Name: SEX

Attribute Codes

<i>2016- 2017</i>	<i>2018- Later</i>	
1	1	Male
2	2	Female
8	8	Not Reported
9	--	Unknown
--	9	Reported as Unknown

P6/NM6I Imputed Sex

Definition: This imputed data element has the same definition and data element values as Sex, excluding value 9 for unknown sex and value 8 for not reported sex.

Additional Information: See the [CRSS Imputation](#) section of this manual.

SAS Name: **SEX_IM**

P7/NM7 Person Type

Definition: This data element describes the role of this person involved in the crash.

Additional Information: See [Appendix C: Analytical Classification of Select CRSS Data Elements](#) for the standard NCSA classifications for this data element.

SAS Name: **PER_TYP**

Attribute Codes

***2016- 2020-
2019 Later***

MOTORISTS

- | | | |
|---|---|---|
| 1 | 1 | Driver of a Motor Vehicle in Transport |

| -- | 12 | Person on Non-Motorized Personal Conveyance |
| -- | 13 | Person on Personal Conveyance, Unknown if Motorized or Non-Motorized |
| 19 | 19 | Unknown Type of Non-Motorist |

P8/NM8 Injury Severity

Definition: This data element describes the severity of the injury to this person in the crash using the KABCO scale.

Additional Information: See the Accident data file for C90 Maximum Injury Severity in Crash and the Vehicle data file for V90 Maximum Injury Severity in Vehicle, both of which are derived from this data element.

See [Appendix C: Analytical Classification of Select CRSS Data Elements](#) for the standard NCSA classifications for this data element.

SAS Name: INJ_SEV

Attribute Codes

2016-Later

- 0 No Apparent Injury (O)
- 1 Possible Injury (C)
- 2 Suspected Minor Injury (B)
- 3 Suspected Serious Injury (A)
- 4 Fatal Injury (K)
- 5 Injured, Severity Unknown (U)
- 6 Died Prior to Crash
- 9 Unknown/Not Reported

P8/NM8I Imputed Injury Severity

Definition: This imputed data element has the same definition and data element values as Injury Severity, excluding value 9 for unknown if injured or not reported if injured.

Additional Information: See the [CRSS Imputation](#) section of this manual.

SAS Name: INJSEV_IM

P9 Seating Position

Definition: This data element identifies the location of this person in or on the vehicle.

Additional Information: More than one person can be assigned the same seat position, however this is coded only when a person is sitting on someone's lap.

SAS Name: SEAT_POS

Attribute Codes

2016- 2018	2019- Later	
0	0	Not a Motor Vehicle Occupant
11	11	Front Seat – Left Side (Driver's Side)
12	12	Front Seat – Middle
13	13	Front Seat – Right Side

49	49	Fourth Seat – Unknown
50	50	Sleeper Section of Cab (Truck)
51	51	Other Passenger in Enclosed Passenger or Cargo Area
52	52	Other Passenger in Unenclosed Passenger or Cargo Area
53	53	Other Passenger in Passenger or Cargo Area, Unknown Whether or Not Enclosed

54	54	Trailing Unit
55	55	Riding on Exterior of Vehicle
--	56	Appended to a Motor Vehicle for Motion
98	98	Not Reported
99	99	Unknown/Reported as Unknown (Since 2018)

P9I Imputed Seating Position

Definition: This imputed data element has the same definition and data element values as Seating Position, excluding values 19, 29, 39, 49, and 99 for unknown seating position and values 98 for not reported seating position.

Additional Information: See the [CRSS Imputation](#) section of this manual.

SAS Name: **SEAT_IM**

P10A Restraint System Use

Definition: This data element records the restraint equipment in use by this occupant at the time of the crash.

Additional Information: Prior to 2019 this data element's name was "Restraint System/Helmet Use" that included helmet use, and the Data Element ID was P10. Starting in 2019 helmet use is captured as part of the data element "Helmet Use."

See [Appendix C: Analytical Classification of Select CRSS Data Elements](#) for the standard NCSA classifications for this data element.

SAS Name: **REST_USE**

Attribute Codes

2016	2018	2019- Later	
0	--	--	Not Applicable
1	1	1	Shoulder Belt Only Used
2	2	2	Lap Belt Only Used
3	3	3	Shoulder and Lap Belt Used
4	4	4	Child Restraint – Type Unknown
5	5	--	DOT-Compliant Motorcycle Helmet
--	--	6	Racing-Style Harness Used
7	--	--	None Used
8	8	8	Restraint Used – Type Unknown
10	10	10	Child Restraint System – Forward Facing
11	11	11	Child Restraint System – Rear Facing
12	12	12	Booster Seat
16	16	--	Helmet, Other Than DOT-Compliant Motorcycle Helmet
17	17	--	No Helmet
19	19	--	Helmet, Unknown if DOT-Compliant
--	20	20	None Used/Not Applicable
29	29	--	Unknown if Helmet Worn
96	96	96	Not a Motor Vehicle Occupant
97	97	97	Other
98	98	98	Not Reported
99	99	99	Unknown/Reported as Unknown (Since 2018)

P10B Indication of Restraint System Misuse

Definition: This data element identifies any mis-use of the available restraint system used by this person.

Additional Information: Prior to 2019 this data element's name was "Indication of Misuse of Restraint System/Helmet" that included helmet misuse, and the Data Element ID was P11. Starting in 2019 helmet misuse is captured as part of the data element "Indication of Helmet Misuse."

SAS Name: REST_MIS

Attribute Codes

<i>2016- 2018</i>	<i>2019- Later</i>	
0	--	No
--	0	No Indication of Misuse
1	--	Yes
--	1	Yes, Indication of Misuse
--	7	None Used/Not Applicable
8	8	Not a Motor Vehicle Occupant

P11A Helmet Use

Definition: This data element records the helmet use by this occupant at the time of the crash.

Additional Information: This data element is applicable to occupants of body types 80-91, 96, and 97. (See [NCSA Body Type](#))

See [Appendix C: Analytical Classification of Select CRSS Data Elements](#) for the standard NCSA classifications for this data element.

Prior to 2019 this data was collected as part of the data element “Restraint System/Helmet Use,” and the Data Element ID was P10.

SAS Name: **HELM_USE**

Attribute Codes

2019-Later

- 5 DOT-Compliant Motorcycle Helmet
- 16 Helmet, Other Than DOT-Compliant Motorcycle Helmet
- 17 No Helmet
- 19 Helmet, Unknown if DOT-Compliant
- 20 Not Applicable
- 96 Not a Motor Vehicle Occupant
- 98 Not Reported
- 99 Unknown/Reported as Unknown

P11B Indication of Helmet Misuse

Definition: This data element identifies any mis-use of the helmet used by this person.

Additional Information: This data element is applicable to occupants of body types 80-91, 96, and 97.

Prior to 2019 this data was collected as part of the data element “Indication of Misuse of Restraint System/Helmet,” and the Data Element ID was P11.

SAS Name: **HELM_MIS**

Attribute Codes

2019-Later

- 0 No Indication of Misuse
- 1 Yes, Indication of Misuse
- 7 None Used/Not Applicable
- 8 Not a Motor Vehicle Occupant

P12 Air Bag Deployed

Definition: This data element records air bag availability and deployment for this person as reported in the police crash report.

Additional Information: This data element is designed to collect both air bag availability and deployment for each occupied seat position. Variation in the presentation of the source data on the State crash report forms and the selections coded on the police report may produce unlikely combinations or missing data. For example:

1. If the seat position does not have an air bag at the time of manufacture, but the information on the police report indicates an air bag was available or deployed, the information on the police report takes precedence.
2. If the seat position has an air bag installed at the time of manufacture and the police report indicates there is no air bag available, then the police report information takes precedence.

SAS Name: AIR_BAG

Attribute Codes

<i>2016</i>	<i>2017</i>	<i>2018- Later</i>	
0	--	--	Not Applicable
1	1	1	Deployed – Front
2	2	2	Deployed – Side (Door, Seat Back)
3	3	3	Deployed – Curtain (Roof)
7	7	7	Deployed – Other (Knee, Air Belt, etc.)
8	8	8	Deployed – Combination
9	9	9	Deployment – Unknown Location
20	20	20	Not Deployed
28	--	--	Switched off
97	97	97	Not a Motor Vehicle Occupant
98	98	98	Not Reported
99	99	--	Deployment Unknown
--	--	99	Reported as Deployment Unknown

P13 Ejection

Definition: This data element describes the ejection status and the degree of ejection for this person, excluding motorcycle occupants.

Additional Information:

SAS Name: **EJECTION**

Attribute Codes

<i>2016- 2017</i>	<i>2018- Later</i>	
0	0	Not Ejected
1	1	Totally Ejected
2	2	Partially Ejected
3	3	Ejected – Unknown Degree
7	7	Not Reported
8	8	Not Applicable
9	--	Unknown
--	9	Reported as Unknown if Ejected

P13I Imputed Ejection

Definition: This imputed data element had the same definition and data element values as Ejection, excluding 9 (Unknown) and 7 (Not Reported).

Additional Information: See the [CRSS Imputation](#) section of this manual.

SAS Name: **EJECT_IM**

P16/NM16 Police-Reported Alcohol Involvement

Definition: This data element records whether alcohol was involved for this person and reflects the judgment of law enforcement.

Additional Information: This data element does not indicate that alcohol was a cause of the crash. If a police crash report indicates that opened or unopened alcohol bottles were found in the vehicle, then this information does not by itself constitute involvement.

Prior to 2019 the Data Element ID was P16/NM15.

SAS Name: **DRINKING**

Attribute Codes

<i>2016- 2017</i>	<i>2018- Later</i>	
0	0	No (Alcohol Not Involved)
1	1	Yes (Alcohol Involved)
8	8	Not Reported
9	--	Unknown (Police Reported)
--	9	Reported as Unknown

P16/NM16I Imputed Police-Reported Alcohol Involvement

Definition: The definition and data element values are the same as Police-Reported Alcohol Involvement, excluding 8 for not reported and 9 for unknown alcohol involvement.

Additional Information: See the [CRSS Imputation](#) section of this manual.

SAS Name: **PERALCH_IM**

P18/NM18 Alcohol Test**P18A/NM18A Alcohol Test Status**

Definition: This data element identifies whether an alcohol test was given to this person.

Additional Information: Prior to 2019 the Data Element ID was P18A/NM17A.

SAS Name: **ALC_STATUS**

Attribute Codes

<i>2016</i>	<i>2017</i>	<i>2018- Later</i>	
0	0	0	Test Not Given
1	--	--	Test Refused
2	2	2	Test Given
8	8	8	Not Reported
9	9	--	Unknown if Tested
--	--	9	Reported as Unknown if Tested

P18B/NM18B Alcohol Test Type

Definition: This data element identifies the type of alcohol test that was given to this person.

Additional Information: If a valid blood test is administered along with another type of test then blood test is coded.

Prior to 2019 the Data Element ID was P18B/NM17B.

SAS Name: **ATST_TYP**

Attribute Codes

<i>2016- 2017</i>	<i>2018- Later</i>	
0	0	Test Not Given
1	1	Blood
2	2	Breath Test (AC)
3	3	Urine
8	8	Other Test Type
10	10	Preliminary Breath Test (PBT)
--	11	Breath Test, Unknown Type
95	95	Not Reported
98	98	Unknown Test Type

99	--	Unknown if Tested
--	99	Reported as Unknown if Tested

P18C/NM18C Alcohol Test Result

Definition: This data element identifies the alcohol test result for this person.

Additional Information: A BAC of .10 is coded as 100. The decimal is implied. The BAC is expressed in grams per deciliter (g/dL) or a clinical evaluation of the same.

See [Appendix C: Analytical Classification of Select CRSS Data Elements](#) for the standard NCSA classifications for this data element.

Prior to 2019 the Data Element ID was P18C/NM17C.

SAS Name: **ALC_RES**

Attribute Codes

<i>2016- 2017</i>	<i>2018- Later</i>	
0-939	0-939	Actual Value
940	940	0.94 or Greater
995	995	Not Reported
996	996	Test Not Given
997	997	Test Performed, Results Unknown
998	998	Positive Reading With No Actual Value
999	--	Unknown if Tested
--	999	Reported as Unknown if Tested

P19/NM19 Police Reported Drug Involvement

Definition: This data element records whether drugs were involved for this person and reflects the judgment of law enforcement.

Additional Information: Involvement is not an indication that drugs were in any way cause of the crash, even though it may have been. If the police crash report indicates that drugs were found in the vehicle, then this information does not by itself constitute involvement.

Prior to 2019 the Data Element ID was P19/NM18.

SAS Name: **DRUGS**

Attribute Codes

<i>2016- 2017</i>	<i>2018- Later</i>	
0	0	No (Drugs Not Involved)
1	1	Yes (Drugs Involved)
8	8	Not Reported
9	--	Unknown (Police Reported)
--	9	Reported as Unknown

P22/NM22 Transported to First Medical Facility By

Definition: This data element identifies the mode of transportation to a hospital or medical facility provided for this person.

Additional Information: Prior to 2019 the Data Element ID was P22/NM21.

SAS Name: **HOSPITAL**

Attribute Codes

2016- 2017	2018- 2019	2020- Later	
0	0	--	Not Transported
--	--	0	Not Transported for Treatment
1	1	1	EMS Air
2	2	2	Law Enforcement
3	3	3	EMS Unknown Mode
4	4	4	Transported Unknown Source
5	5	5	EMS Ground
6	6	6	Other
8	8	8	Not Reported
9	--	--	Unknown
--	9	9	Reported as Unknown

NM4 Vehicle Number of Motor Vehicle Striking Non-Motorist

Definition: This data element identifies the “Vehicle Number” (VEH_NO) of the motor vehicle in transport that made contact with this non-motorist.

Additional Information: This data element applies only to non-motorists/non-occupants and reflects the vehicle that made contact with the non-motorist/non-occupant being coded.

The number must match the vehicle number of the striking vehicle. This number is similar to VEH_NO, except that the non-motorist/non-occupant was struck by the vehicle, rather than being within the vehicle.

SAS Name: **STR_VEH**

Attribute Codes

<i>2016- 2017</i>	<i>2018- Later</i>	
0	0	Occupant of Motor Vehicle
1-998	1-998	Vehicle Number of Striking Vehicle
999	--	Unknown

NM10 Non-Motorist Location at Time of Crash

Definition: This data element identifies the attribute that best describes the location of this non-motorist with respect to the roadway at the time of the crash.

Additional Information: Non-motorists who are occupants of motor vehicles not in transport are coded with respect to the location of the vehicle.

SAS Name: **LOCATION**

Attribute Codes

<i>2016- 2017</i>	<i>2018- Later</i>	
0	0	Not Applicable-Motor Vehicle Occupant
1	1	At Intersection-In Marked Crosswalk
2	2	At Intersection-Unmarked/Unknown if Marked Crosswalk
3	3	At Intersection-Not in Crosswalk
9	9	At Intersection-Unknown Location
10	10	Not at Intersection-In Marked Crosswalk
11	11	Not at Intersection-On Roadway, Not in Marked Crosswalk Unknown
13	13	Not at Intersection-On Roadway, Crosswalk Availability Unknown
14	14	Parking Lane/Zone
16	16	Bicycle Lane
20	20	Shoulder/Roadside
21	21	Sidewalk
22	22	Median/Crossing Island
23	23	Driveway Access
24	24	Shared-Use Path
25	25	Non-Trafficway Area
28	28	Other
98	98	Not Reported
99	--	Unknown Location
--	99	Reported as Unknown Location

See [Analysis of Pedestrian and Bicycle Crashes Around Intersections](#) for guidance on analyzing Pedestrian/Bicyclist crash locations.

Discontinued PERSON Data Elements

Drug Test Status (discontinued)

Definition: This data element identifies whether a drug test was given to this person.

Additional Information:

SAS Name: **DSTATUS**

Attribute Codes

<i>2016</i>	<i>2017</i>	
0	0	Test Not Given
1	--	Test Refused
2	2	Test Given
8	8	Not Reported
9	9	Unknown if Tested

Drug Test Type (discontinued)

Definition: This data element identifies the type of drug test that was given to this person.

Additional Information:

SAS Name: **DRUGTST1, DRUGTST2, DRUGTST3**

Attribute Codes

<i>2016-2017</i>	
0	Test Not Given
1	Blood
2	Urine
3	Both Blood and Urine Tests
6	Not Reported
7	Unknown Test Type
8	Other Test Type
9	Unknown if Tested

Drug Test Result (discontinued)

Definition: This data element identifies the drug test result for this person.

SAS Name: DRUGRES1, DRUGRES2, DRUGRES3

Attribute Codes***2016-2017***

- 0 Test Not Given
- 1 Tested for Drugs, No Drugs Found/Negative
- 95 Not Reported
- 997 Tested for Drugs, Result Unknown
- 998 Tested for Drugs, Drugs Found, Type Unknown/Positive
- 999 Unknown if Tested

Related Factors- Person Level (discontinued)

Definition: This data element records factors related to motor vehicle occupants other than drivers and people not in motor vehicles as expressed in the case materials.

Additional Information: There are also vehicle-level-related factors in the Vehicle data file, VEH_SC1 and VEH_SC2 and driver-related factors, also in the Vehicle data file, namely DR_SF1, DR_SF2, DR_SF3, and DR_SF4. There are also crash-related factors CF1, CF2, and CF3 in the Accident data file.

Any of the three data elements may have been used to code a related factor. One must test all three data elements to insure that the selected related factor is included.

Person-related factors for all drivers are coded 0. Person-related factors for non-drivers can have non-zero values as listed below.

Prior to 2019 the Data Element ID was P26/NM25. Beginning in 2020 this data element was no longer collected at the Person level. It is now collected in the Personrf data file as PERSONRF.

SAS Name: P_SF1, P_SF2, P_SF3

Attribute Codes

* Attribute is only applicable to occupants (other than drivers) of motor vehicles.

- ** Attribute is only applicable to people not in motor vehicles.

The PARKWORK Data File

The Parkwork data file includes Vehicle data elements applicable to Parked and Working Vehicles. It contains the data elements CASENUM, PSU, PJ, STRATUM, PSUSTRAT, PSU_VAR, REGION, URBANICITY, WEIGHT, and VEH_NO, which are described in the Key Data Elements at the beginning of the Data Element Definitions and Codes section. The Parkwork data file also contains the data elements on the following pages.

CASENUM and VEH_NO are the unique identifiers for each record. CASENUM should be used to merge the Parkwork data file with the Accident data file. CASENUM and VEH_NO should be used to merge the Parkwork data file with the Person data file.

C4A Number of Motor Vehicles in Transport (MVIT)

Definition: This data element is a count of the number of motor vehicles in transport involved in the crash. Legally parked vehicles are not included.

Additional Information: See this data element in the Accident data file section for more information.

SAS Name: PVE_FORMS

Attribute Codes

2016-Later

1-100 Number of Vehicles

C8 *Crash Date*

C8A *Month of Crash*

Definition: This data element records the month in which the crash occurred.

Additional Information: See this data element in the Accident data file section for more information.

SAS Name: **PMONTH**

Attribute Codes

V4 *Number of Occupants*

Definition: This data element is a count of the number of occupants in this vehicle.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: PNUMOCCS

Attribute Codes

2016-Later

0	None
1-98	Number of Occupants
99	Unknown

V5 *Unit Type*

Definition: This data element identifies the type of unit that applies to this motor vehicle at the time it became an involved vehicle in the crash and was reported as a unit on the police crash report.

Additional Information: This data element also appears in the Vehicle data file as UNITTYPE. The only valid attribute for UNITTYPE is 1 (Motor Vehicle in Transport [Inside or Outside the Trafficway]).

SAS Name: **PTYPE**

Attribute Codes

2016-Later

- 2 Motor Vehicle Not in Transport Within the Trafficway
- 3 Motor Vehicle Not in Transport Outside the Trafficway
- 4 Working Motor Vehicle (Highway Construction, Maintenance, Utility Only)

V6 *Hit and Run*

Definition: This data element identifies whether this vehicle was a contact vehicle in the crash that did not stop to render aid (this can include drivers who flee the scene on foot). Hit and run is coded when a motor vehicle in transport, or its driver, departs from the scene; motor vehicles not in transport are excluded. It does not matter whether the hit-and-run vehicle was striking or struck.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: **PHIT_RUN**

| 98 | Not Reported |
| 99 | Reported as Unknown |

V19 Vehicle Trailing

Definition: This data element identifies whether this vehicle had any attached trailing units or was towing another motor vehicle. A trailing unit can be a horse trailer, fifth wheel trailer, camper, boat, truck trailer, towed vehicle or any other trailer.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: PTRAILER

Attribute Codes

2016-Later

- 0 No Trailing Units
- 1 Yes, One Trailing Unit
- 2 Yes, Two Trailing Units
- 3 Yes, Three or More Trailing Units
- 4 Yes, Number of Trailing Units Unknown
- 5 Vehicle Towing Another Motor Vehicle – Fixed Linkage
- 6 Vehicle Towing Another Motor Vehicle – Non-fixed Linkage
- 9 Unknown

V20 Trailer Vehicle Identification Number

Definition: This data element records the vehicle identification number (VIN) of any trailing units of a combination vehicle.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: PTRLR1VIN, PTRLR2VIN, PTRLR3VIN

Attribute Codes

2016-2017

2018-Later

000000000000	000000000000	No VIN Required
xxxxxxxxxxxx	xxxxxxxxxxxx	First 12 Characters of the VIN
777777777777	777777777777	No Trailing Units

--	999999999999	Reported as Unknown
--	*	VIN Character Missing or Not Decipherable

V21 Trailer Gross Vehicle Weight Rating (GVWR)

Definition: This element identifies the Gross Vehicle Weight Rating of any trailing units as identified by the manufacturer in the vehicle's VIN.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: PTRLR1GVWR, PTRLR2GVWR, PTRLR3GVWR

Attribute Codes

**2020-
Later**

- 0 No Trailer GVWR Required
- 11 Class 1: 6,000 lbs or less (2,722 kg or less)
- 12 Class 2: 6,001 - 10,000 lbs (2,722 - 4,536 kg)
- 13 Class 3: 10,001 - 14,000 lbs (4,536 - 6,350 kg)
- 14 Class 4: 14,001 - 16,000 lbs (6,350 - 7,258 kg)
- 15 Class 5: 16,001 - 19,500 lbs (7,258 - 8,845 kg)
- 16 Class 6: 19,501 - 26,000 lbs (8,845 - 11,794 kg)
- 17 Class 7: 26,001 - 33,000 lbs (11,794 - 14,969 kg)
- 18 Class 8: 33,001 lbs and above (14,969 kg and above)
- 77 No Trailing Units
- 98 Not Reported
- 99 Reported as Unknown

V23 *Motor Carrier Identification Number (MCID)*

Definition: This data element records the issuing authority and motor carrier identification number if applicable to this vehicle.

Additional Information: This 11-character data element is the combination of two data elements, the 2-digit Motor Carrier Issuing Authority code (MCARR_I1) followed by the 9-character Identification Number (MCARR_I2).

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: **PMCARR_ID**

Attribute Codes

V26A/HM1 Hazardous Materials Involvement

Definition: This data element identifies whether this vehicle was carrying hazardous materials.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: PHAZ_INV

Attribute Codes***2016-Later***

- 1 No
- 2 Yes

V26B/HM2 Hazardous Materials Placard

Definition: This data element identifies the presence of hazardous materials for this vehicle and whether this vehicle displayed a hazardous materials placard.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: PHAZPLAC

Attribute Codes***2016-Later***

- 0 Not Applicable
- 1 No
- 2 Yes
- 8 Not Reported

V26C/HM3 *Hazardous Material Identification Number*

Definition: This data element identifies the 4-digit hazardous material identification number for this vehicle.

Additional Information: In 2018 this data element was changed to alphanumeric to retain all four digits.

See this data element in the Vehicle data file section for more information.

SAS Name: **PHAZ_ID**

Attribute Codes

2016-Later

- 0 Not Applicable
- xxxx Actual 4-Digit Number
- 8888 Not Reported

V26D/HM4 *Hazardous Material Class Number*

Definition: This data element identifies the single-digit hazardous material class number for this vehicle.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: **PHAZ_CNO**

Attribute Codes

2016-Later

- 0 Not Applicable
- 1 Explosives
- 2 Gases
- 3 Flammable/Combustible Liquid
- 4 Flammable Solid, Spontaneously Combustible, and Dangerous When Wet
- 5 Oxidizer and Organic Peroxide
- 6 Poison and Poison Inhalation Hazard
- 7 Radioactive
- 8 Corrosive
- 9 Miscellaneous
- 88 Not Reported

V26E/HM5 *Release of Hazardous Material from the Cargo Compartment*

Definition: This data element identifies whether any hazardous cargo was released from the cargo tank or compartment of this vehicle.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: **PHAZ_REL**

Attribute Codes

2016-Later

- 0 Not Applicable
- 1 No
- 2 Yes
- 8 Not Reported

V27 *Bus Use*

Definition: This data element describes the common type of bus service this vehicle was being used as at the time of the crash or the primary use for the bus if not in service at the time of the crash.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: **PBUS_USE**

Attribute Codes

<i>2016- 2017</i>	<i>2018- Later</i>

V39 *Fire Occurrence*

Definition: This data element identifies whether a fire in any way related to the crash occurred in this vehicle.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: **PFIRE**

Attribute Codes

2016-Later

- 0 No or Not Reported
- 1 Yes

V100 NCSA Make Model Combined

Definition: This derived data element represents the 5-digit combination of two data elements, the 2-digit “NCSA Make” code (MAKE) followed by the 3-digit “NCSA Model” code (MODEL).

Additional Information: Prior to 2020 this data element’s name was “Make Model Combined.”

See this data element in the Vehicle data file section for more information.

SAS Name: PMAK_MOD

Attribute Codes

2016-Later

See the current [FARS/CRSS Coding and Validation Manual](#) for vehicle make and model codes.

Discontinued PARKWORK Data Elements

Gross Vehicle Weight Rating (discontinued)

Definition: This data element identifies the gross vehicle weight rating of this vehicle if applicable.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: **PGVWR**

Attribute Codes

<i>2016- 2017</i>	<i>2018- 2019</i>	
0	0	Not Applicable
1	1	10,000 lbs or Less
2	2	10,001 lbs - 26,000 lbs
3	3	26,001 lbs or More
8	8	Not Reported
9	--	Unknown
--	9	Reported as Unknown

Related Factors- Vehicle Level (discontinued)

Definition: This data element records factors related to this vehicle expressed in the case materials.

Additional Information: Beginning in 2020 this data element was no longer collected at the Vehicle level. It is now collected in the Pvehiclesf data file as PVEHICLESF.

SAS Name: PVEH_SC1, PVEH_SC2

Attribute Codes

<i>2016- 2017</i>	<i>2018</i>	<i>2019</i>

The PBTYPY Data File

The Pdtype data file includes data on pedestrians, bicyclists, and people on personal conveyances. It contains the data elements CASENUM, PSU, PJ, STRATUM, PSUSTRAT, PSU_VAR, REGION, URBANICITY, WEIGHT, VEH_NO, and PER_NO, which are described in the Key Data Elements at the beginning of the Data Element Definitions and Codes section. The Pdtype data file also contains the data elements on the following pages.

CASENUM, VEH_NO, and PER_NO are the unique identifiers. CASENUM should be used to merge the Pdtype data file with the Accident data file.

P5/NM5 Age

Definition: This data element identifies the person's age, in years, with respect to the person's last birthday.

Additional Information:

SAS Name: PBAGE

Attribute Codes

<i>2016- 2017</i>	<i>2018- Later</i>	
0	0	Less Than One Year
1-120	1-120	Age in Years
998	998	Not Reported
999	--	Unknown
--	999	Reported as Unknown

P6/NM6 Sex

Definition: This data element identifies the sex of the person involved in the crash

Additional Information:

SAS Name: PBSEX

Attribute Codes

<i>2016- 2017</i>	<i>2018- Later</i>	
1	1	Male
2	2	Female
8	8	Not Reported
9	--	Unknown
--	9	Reported as Unknown

P7/NM7 Person Type

Definition: This data element describes the role of this person involved in the crash.

Additional Information:

SAS Name: PBPTYPE

Attribute Codes

<i>2016- 2019</i>	<i>2020- Later</i>	
5	5	Pedestrian

The CEVENT Data File

The Cevent data file includes harmful and non-harmful events in the crash. It contains the data elements CASENUM, PSU, PJ, STRATUM, PSUSTRAT, PSU_VAR, REGION, URBANICITY, WEIGHT, and EVENTNUM, which are described in the Key Data Elements at the beginning of the Data Element Definitions and Codes section. The Cevent data file also contains the data elements on the following pages.

CASENUM and EVENTNUM are the unique identifiers for each record. CASENUM should be used to merge the Cevent data file with the Accident data file.

C18A Vehicle Number (This Vehicle)

Definition: This data element identifies the “Vehicle Number” (VEH_NO) of this motor vehicle in transport described in this event.

Additional Information: This is the vehicle described in “Sequence of Events” for this event.

SAS Name: **VNUMBER1**

Attribute Codes***2016-Later***

1-999 Vehicle Number

C18B Area of Impact (This Vehicle)

Definition: This data element identifies the impact point, if any, on this motor vehicle in transport that produced property damage or personal injury in this event.

Additional Information: This is the impact area of the vehicle recorded in “Vehicle Number (This Vehicle)” and described in “Sequence of Events.”

SAS Name: **AOI1**

Attribute Codes

V37 Sequence of Events

Definition: This data element describes this event. A motor vehicle traffic crash is a series of events resulting from an unstabilized situation. This series of harmful and non-harmful events is recorded in chronological order based on the police crash report narrative and diagram.

Additional Information: “First Harmful Event, Most Harmful Event,” and the “Sequence of Events” data elements have the same harmful event attributes. “Sequence of Events” also has non-harmful event attributes. Prior to 2020 the Data Element ID was V32.

C18C Vehicle Number (Other Vehicle)

Definition: This data element identifies the “Vehicle Number” (VEH_NO) of the other motor vehicle, if any, in this event.

Additional Information: This is the vehicle contacted by the motor vehicle in transport recorded in “Vehicle Number (This Vehicle).” Another vehicle must have been involved in this event for this data element to be a valid vehicle number (i.e., “Sequence of Events” for this event must be 12, 14, 45, 54, or 55).

SAS Name: **VNUMBER2**

Attribute Codes

2016-Later

1-999	Vehicle Number
5555	Non-Harmful Event
9999	Not a Motor Vehicle

C18D Area of Impact (Other Vehicle)

Definition: This data element identifies the impact point on the other motor vehicle, if any, in this event.

Additional Information: This is the impact area of the vehicle recorded in “Vehicle Number (Other Vehicle).” Another vehicle must have been involved in this event for this data element to be a valid impact location (i.e., “Sequence of Events” for this event must be 12, 14, 45, 54, or 55).

The VEVENT Data File

The Vevent data file includes harmful and non-harmful events for each motor vehicle in transport. It contains the data elements CASENUM, PSU, PJ, STRATUM, PSUSTRAT, PSU_VAR, REGION, URBANICITY, WEIGHT, VEH_NO, EVENTNUM, and VEVENTNUM, which are described in the Key Data Elements at the beginning of the Data Element Definitions and Codes section. The Vevent data file also contains the data elements on the following pages.

CASENUM, VEH_NO, and VEVENTNUM are the unique identifiers for each record. CASENUM and VEH_NO should be used to merge the Vevent data file with the Vehicle data file.

C18A Vehicle Number (This Vehicle)

Definition: This data element identifies the “Vehicle Number” (VEH_NO) of the motor vehicle in transport described in this event.

Additional Information: This is the vehicle described in “Sequence of Events” for this event.

If Vehicle #1 (V1) impacts Vehicle #2 (V2), then we have at least 2 Vevent records.

Example:

<u>VEH_NO</u>	<u>EVENTNUM</u>	<u>VNUMBER1</u>	<u>SOE</u>	<u>VNUMBER2</u>
1	1	1	12	2
2	1	1	12	2

The explanation of these 2 records is as follows:

V1 was involved in event 1 where V1 impacts V2.

V2 was involved in event 1 where V1 impacts V2.

SAS Name: **VNUMBER1**

Attribute Codes

1-999 Vehicle Number

C18B Area of Impact (This Vehicle)

Definition: This data element identifies the impact point, if any, on this motor vehicle in transport that produced property damage or personal injury in this event.

Additional Information: This is the impact area of the vehicle recorded in “Vehicle Number (This Vehicle)” and described in “Sequence of Events.”

SAS Name: **AOI1**

V37 Sequence of Events

Definition: This data element describes this event. A motor vehicle traffic crash is a series of events resulting from an unstabilized situation. This series of harmful and non-harmful events is recorded in chronological order based on the police crash report narrative and diagram.

Additional Information: “First Harmful Event, Most Harmful Event,” and the “Sequence of Events” data elements have the same harmful event attributes. “Sequence of Events” also has non-harmful event attributes. Prior to 2020 the Data Element ID was V32.

The CRASHRF Data File

The Crashrf data file identifies each crash related factor as a separate record. That is, there can be more than one record for each crash. It contains the data elements CASENUM, PSU, PJ, STRATUM, PSUSTRAT, PSU_VAR, REGION, URBANICITY, and WEIGHT, which are described in the Key Data Elements at the beginning of the Data Element Definitions and Codes section. The data file also contains CRASHRF that is described below.

CASENUM and CRASHRF are the unique identifiers for each record. CASENUM should be used to merge the Crashrf data file with the Accident data file.

C32 *Related Factors- Crash Level*

Definition: This data element records factors related to the crash expressed in the case materials.

Additional Information: There are also vehicle related factors in the Vehiclesf and Pvehiclesf data files, driver related factors in the Driverrf data file, and person related factors in the Personrf data file.

Prior to 2020 this data element was collected at the Crash level and up to three factors could be selected. These three elements were discontinued and moved to the Discontinued Accident Data Elements at the end of the Accident Data File section. Refer to the discontinued element for a history of this data element's attributes.

SAS Name: **CRASHRF**

The WEATHER Data File

The Weather data file identifies each atmospheric condition as a separate record. That is, there can be more than one record for each crash. It contains the data elements CASENUM, PSU, PJ, STRATUM, PSUSTRAT, PSU_VAR, REGION, URBANICITY, and WEIGHT, which are described in the Key Data Elements at the beginning of the Data Element Definitions and Codes section. The data file also contains WEATHER that is described below.

CASENUM and WEATHER are the unique identifiers for each record. CASENUM should be used to merge the Weather data file with the Accident data file.

C26 *Atmospheric Conditions*

Definition: This data element records the prevailing atmospheric conditions that existed at the time of the crash as indicated in the police crash report.

Additional Information: Prior to 2020 this data element identified up to two values. If more than two atmospheric conditions were reported, the two conditions that most affect visibility were selected. Accident.WEATHER1 and Accident.WEATHER2 were the coded data elements, and Accident.WEATHER was derived from these two. The two coded data elements were discontinued after 2019 and moved to the Discontinued Accident Data Elements at the end of the Accident Data File section.

Beginning in 2020 all applicable atmospheric conditions are selected and stored in this data file. Only the derived data element WEATHER is still stored in the Accident data file and is now derived from the multiple responses in this data file using the same hierarchy.

The VEHICLESF Data File

The Vehiclesf data file identifies each vehicle related factor for a motor vehicle in transport as a separate record. That is, there can be more than one record for each vehicle. It contains the data elements CASENUM, PSU, PJ, STRATUM, PSUSTRAT, PSU_VAR, REGION, URBANICITY, WEIGHT, and VEH_NO, which are described in the Key Data Elements at the beginning of the Data Element Definitions and Codes section. The data file also contains VEHICLESF that is described below.

CASENUM, VEH_NO, and VEHICLESF are the unique identifiers for each record. CASENUM and VEH_NO should be used to merge the Vehiclesf data file with vehicles from the Vehicle data file.

V41 *Related Factors- Vehicle Level (Motor Vehicles in Transport)*

Definition: This data element records factors related to this motor vehicle in transport expressed in the case materials.

Additional Information: There are also crash related factors in the Crashrf data file, vehicle related factors in the Pvehiclesf data file (for parked/working vehicles), driver related factors in the Driverrf data file, and person related factors in the Personrf data file.

Pre-existing vehicle defects are captured in the data element “Contributing Circumstances, Motor Vehicle” (Factor.MFACTOR).

Prior to 2020 this data element’s ID was V36 and it was collected at the Vehicle level with up to two factors being selected. These two elements were discontinued and moved to the Discontinued Vehicle Data Elements at the end of the Vehicle Data File section. Refer to the discontinued element for a history of this data element’s attributes.

The PVEHICLESF Data File

The Pvehiclesf data file identifies each vehicle related factor for a parked/working motor vehicle as a separate record. That is, there can be more than one record for each vehicle. It contains the data elements CASENUM, PSU, PJ, STRATUM, PSUSTRAT, PSU_VAR, REGION, URBANICITY, WEIGHT, and VEH_NO, which are described in the Key Data Elements at the beginning of the Data Element Definitions and Codes section. The data file also contains PVEHICLESF that is described below.

CASENUM, VEH_NO, and PVEHICLESF are the unique identifiers for each record. CASENUM and VEH_NO should be used to merge the Pvehiclesf data file with vehicles from the Vehicle data file.

V41 *Related Factors- Vehicle Level (Parked/Working Vehicles)*

Definition: This data element records factors related to this parked/working motor vehicle expressed in the case materials.

Additional Information: There are also crash related factors in the Crashrf data file, vehicle related factors in the Vehiclesf data file (for motor vehicles in transport), driver related factors in the Driverrf data file, and person related factors in the Personrf data file.

Prior to 2020 this data element's ID was V36 and it was collected at the Vehicle level with up to two factors being selected. These two elements were discontinued and moved to the Discontinued Parkwork Data Elements at the end of the Parkwork Data File section. Refer to the discontinued element for a history of this data element's attributes.

The DRIVERRF Data File

The Driverrf data file identifies each driver related factor as a separate record. That is, there can be more than one record for each driver. It contains the data elements CASENUM, PSU, PJ, STRATUM, PSUSTRAT, PSU_VAR, REGION, URBANICITY, WEIGHT, and VEH_NO, which are described in the Key Data Elements at the beginning of the Data Element Definitions and Codes section. The data file also contains DRIVERRF that is described below.

CASENUM, VEH_NO, and DRIVERRF are the unique identifiers for each record. CASENUM and VEH_NO should be used to merge the Driverrf data file with drivers from the Vehicle data file.

D24 *Related Factors- Driver Level*

Definition: This data element records factors related to this driver expressed in the case materials.

Additional Information: There are also crash related factors in the Crashrf data file, vehicle related factors in the Vehiclesf and Pvehiclesf data files, and person related factors in the Personrf data file.

Person related factors are all set to 0 for drivers.

Prior to 2020 this data element was collected at the Vehicle level and up to four factors could be selected. These four elements were discontinued and moved to the Discontinued Vehicle Data Elements at the end of the Vehicle Data File section. Refer to the discontinued element for a history of this data element's attributes.

94	Emergency Medical Service Personnel
95	Fire Personnel
96	Tow Operator
97	Transportation (Maintenance Workers, Safety Service Patrol Operators, etc.)
999	Reported as Unknown

The DAMAGE Data File

The Damage data file identifies each area of damage as a separate record. That is, there can be more than one damage record for each vehicle. It contains the data elements CASENUM, PSU, PJ, STRATUM, PSUSTRAT, PSU_VAR, REGION, URBANICITY, WEIGHT, and VEH_NO, which are described in the Key Data Elements at the beginning of the Data Element Definitions and Codes section. The data file also contains DAMAGE that is described below.

CASENUM, VEH_NO, and DAMAGE are the unique identifiers for each record. CASENUM and VEH_NO should be used to merge the Damage data file with vehicles from the Vehicle data file.

V34B Area of Impact – Damaged Areas

Definition: This data element identifies all the areas on this vehicle that were damaged in the crash as reflected in the case materials.

Additional Information: Prior to 2020 the Data Element ID was V29B.

SAS Name: **MDAREAS** *2016-2019*
DAMAGE *2020-Later*

Attribute Codes

2016-Later

1-12	Clock Points
13	Top
14	Undercarriage
15	No Damage
99	Damage Areas Unknown

The DISTRACT Data File

The Distract data file identifies each driver distraction as a separate record. That is, there can be more than one distraction record for each driver. It contains the data elements CASENUM, PSU, PJ, STRATUM, PSUSTRAT, PSU_VAR, REGION, URBANICITY, WEIGHT, and VEH_NO, which are described in the Key Data Elements at the beginning of the Data Element Definitions and Codes section. The data file also contains DRDISTRACT that is described below.

CASENUM, VEH_NO, and DRDISTRACT are the unique identifiers for each record.

CASENUM and VEH_NO should be used to merge the Distract data file with drivers from the Vehicle data file.

PC16 Driver Distracted By

Definition: This data element identifies the attributes that best describe this driver's attention to driving prior to the driver's realization of an impending critical event or just prior to impact if realization of an impending critical event does not occur. This element reports on the presence of any distractions that may or may not have contributed to the crash.

Additional Information: Distraction from the primary task of driving occurs when drivers divert their attention from the driving task to some other activity. Also, driving while daydreaming or lost in thought is identified as distracted driving by NHTSA. Physical conditions/impairments (fatigue, alcohol, medical condition, etc.) or psychological states (anger, emotional, depressed, etc.) are not identified as distractions by NHTSA.

SAS Name: **MDRDSTRD** 2016-2019

The DRIMPAIR Data File

The Drimpair data file identifies each driver impairment as a separate record. That is, there can be more than one impairment record for each driver. It contains the data elements CASENUM, PSU, PJ, STRATUM, PSUSTRAT, PSU_VAR, REGION, URBANICITY, WEIGHT, and VEH_NO, which are described in the Key Data Elements at the beginning of the Data Element Definitions and Codes section. The data file also contains DRIMPAIR that is described below.

CASENUM, VEH_NO, and DRIMPAIR are the unique identifiers for each record. CASENUM and VEH_NO should be used to merge the Drimpair data file with drivers from the Vehicle data file.

D23 Condition (Impairment) at Time of Crash- Driver

Definition: This data element identifies physical impairments to this driver that may have contributed to the crash as identified by law enforcement.

Additional Information:

SAS Name: DRIMPAIR

Attribute Codes

<i>2016</i>	<i>2017</i>	<i>2018- Later</i>

The MANEUVER Data File

The Maneuver data file identifies each avoidance attempt as a separate record. That is, there can be more than one maneuver record for each driver. It contains the data elements CASENUM, PSU, PJ, STRATUM, PSUSTRAT, PSU_VAR, REGION, URBANICITY, WEIGHT, and VEH_NO, which are described in the Key Data Elements at the beginning of the Data Element Definitions and Codes section. The data file also contains MANEUVER that is described below.

CASENUM, VEH_NO, and MANEUVER are the unique identifiers for each record.

CASENUM and VEH_NO should be used to merge the Maneuver data file with vehicles from the Vehicle data file.

PC15 Driver Maneuvered to Avoid

Definition: This data element identifies the things this driver attempted to avoid while the vehicle was on the road portion of the trafficway, just prior to the first harmful event for this vehicle.

Additional Information:

SAS Name: **MDRMANAV** *2016-2019*
MANEUVER *2020-Later*

7	7	Hit-And-Run, Fail to Stop After Crash
8	8	Fail to Give Aid, Information, Wait for Police After Crash
9	9	Serious Violation Resulting in Death
10	10	Use of Telecommunications Device

IMPAIRMENT OFFENSES

11	11	Driving While Intoxicated (Alcohol or Drugs) or BAC Above Limit (Any Detectable BAC for CDLs)
12	12	Driving While Impaired
13	13	Driving Under Influence of Substance Not Intended to Intoxicate
14	14	Drinking While Operating
15	15	Illegal Possession of Alcohol or Drugs
16	16	Driving With Detectable Alcohol
18	18	Refusal to Submit to Chemical Test
19	19	Alcohol, Drug or Impairment Violations Generally

SPEED-RELATED OFFENSES

21	21	Racing
22	22	Speeding (Above the Speed Limit)

23	23	Speed Greater Than Reasonable and Prudent (Not Necessarily Over the Limit)
24	24	Exceeding Special Limit (for Trucks, Buses, Cycles, or on Bridge, in School Zone, etc.)
25	25	Energy Speed (Exceeding 55 mph, Non-Pointable)
26	26	Driving Too Slowly
29	29	Speed Related Violations, Generally

RULES OF THE ROAD – TRAFFIC SIGN & SIGNALS

31	31	Fail to Stop for Red Signal
32	32	Fail to Stop for Flashing Red
33	33	Violation of Turn on Red (Fail to Stop and Yield, Yield to Pedestrians Before Turning)
34	34	Fail to Obey Flashing Signal (Yellow or Red)
35	35	Fail to Obey Signal, Generally
36	36	Violate RR Grade Crossing Device/Regulations
37	37	Fail to Obey Stop Sign
38	38	Fail to Obey Yield Sign
39	39	Fail to Obey Traffic Control Device

RULES OF THE ROAD – TURNING, YIELDING, SIGNALING

41	41	Turn in Violation of Traffic Control (Disobey Signs, Turn Arrow or Pavement Markings; This Is Not a Right-on-Red Violation)
42	42	Improper Method and Position of Turn (Too Wide, Wrong Lane)
43	43	Fail to Signal for Turn or Stop
45	45	Fail to Yield to Emergency Vehicle
46	46	Fail to Yield, Generally
48	48	Enter Intersection When Space Insufficient
49	49	Turn, Yield, Signaling Violations, Generally

RULES OF THE ROAD – WRONG SIDE, PASSING & FOLLOWING

51	51	Driving Wrong Way on One-Way Road
52	52	Driving on Left, Wrong Side of Road, Generally
53	53	Improper, Unsafe Passing
54	54	Pass on Right (Drive off Pavement to Pass)
55	55	Pass Stopped School Bus
56	56	Fail to Give Way When Overtaken
58	58	Following Too Closely

59 59 Wrong Side, Passing, Following Violations, Generally

RULES OF THE ROAD – LANE USAGE

61 61 Unsafe or Prohibited Lane Change

62 62 Improper Use of Lane (Enter of 3-Lane Road, HOV Designated Lane)

63 63 Certain Traffic to Use Right Lane (Trucks, Slow-Moving, etc.)

66 66 Motorcycle Lane Violations (More Than Two per Lane, Riding Between Lanes, etc.)

67 67 Motorcyclist Attached to Another Vehicle

69 69 Lane Violations, Generally

NON-MOVING – LICENSE AND REGISTRATION VIOLATIONS

71 71 Driving While License Withdrawn

72 72 Other Driver License Violations

73 73 Commercial Driver Violations (Log Book, Hours, Permits Carried)

74 74 Vehicle Registration Violations

75 78 Fail to Carry Insurance Card

76 76 Driving Uninsured Vehicle

79 79 Non-Moving Violations, Generally

EQUIPMENT

81 81 Lamp Violations

82 82 Brake Violations

83 83 Failure to Require Restraint Use (By Self or Passengers)

84 84 Motorcycle Equipment Violations (Helmet, Special Equipment)

85 85 Violation of Hazardous Cargo Regulations

86 86 Size, Weight, Load Violations

89 89 Equipment Violations, Generally

LICENSE, REGISTRATION & OTHER VIOLATIONS

91 91 Parking

92 92 Theft, Unauthorized Use of Motor Vehicle

93 93 Driving Where Prohibited (Sidewalk, Limited Access, off Truck Route)

95 95 No Driver Present/Unknown if Driver Present

97 97 Not Reported

98 98 Other Moving Violation (Coasting, Backing, Opening Door)

99 99 Unknown Violations

The VISION Data File

The Vision data file identifies each visual obstruction as a separate record. That is, there can be more than one vision record for each driver. It contains the data elements CASENUM, PSU, PJ, STRATUM, PSUSTRAT, PSU_VAR, REGION, URBANICITY, WEIGHT, and VEH_NO, which are described in the Key Data Elements at the beginning of the Data Element Definitions and Codes section. The data file also contains VISION that is described below.

CASENUM, VEH_NO, and VISION are the unique identifiers for each record. CASENUM and VEH_NO should be used to merge the Vision data file with drivers from the Vehicle data file.

PC14 Driver's Vision Obscured By

Definition: This data element records impediments to this driver's visual field that were noted in the police crash report.

Additional Information:

SAS Name: **MVISOBSC** 2016-2019
VISION 2020-Later

Attribute Codes

2016- 2017	2018- Later	
0	0	No Obstruction Noted

The PERSONRF Data File

The Personrf data file identifies each person related factor for motorists and non-motorists as a separate record. That is, there can be more than one record for each person. It contains the data elements CASENUM, PSU, PJ, STRATUM, PSUSTRAT, PSU_VAR, REGION, URBANICITY, WEIGHT, VEH_NO, and PER_NO, which are described in the Key Data Elements at the beginning of the Data Element Definitions and Codes section. The data file also contains PERSONRF that is described below.

CASENUM, VEH_NO, PER_NO, and PERSONRF are the unique identifiers for each record. CASENUM, VEH_NO, and PER_NO should be used to merge the Personrf data file with motorists and non-motorists from the Person data file. VEH_NO equals 0 for non-motorists in this data file.

P26/NM26 Related Factors- Person Level

Definition: This data element records factors related to motor vehicle occupants (other than drivers) and people not in motor vehicles as expressed in the case materials.

Additional Information: There are also crash related factors in the Crashrf data file, vehicle related factors in the Vehiclesf and Pvehiclesf data files, and driver related factors in the Driverrf data file.

Person related factors are all set to 0 for drivers.

Attributes with a single asterisk (*) are only applicable to occupants (other than drivers) of motor vehicles. Attributes with a double asterisk (**) are only applicable to people not in motor vehicles.

Prior to 2020 this data element was collected at the Person level and up to three factors could be selected. These three elements were discontinued and moved to the Discontinued Person Data Elements at the end of the Person Data File section. Refer to the discontinued element for a history of this data element's attributes.

The NMCRASH Data File

The Nmcraash data file identifies each non-motorist action or circumstance that may have contributed to the crash as a separate record. That is, there can be more than one contributing circumstance record for each non-motorist. It contains the data elements CASENUM, PSU, PJ, STRATUM, PSUSTRAT, PSU_VAR, REGION, URBANICITY, WEIGHT, VEH_NO, and PER_NO, which are described in the Key Data Elements at the beginning of the Data Element Definitions and Codes section. The data file also contains NMCC that is described below.

CASENUM, PER_NO, and NMCC are the unique identifiers for each record. CASENUM, VEH_NO, and PER_NO should be used to merge the Nmcraash data file with non-motorists from the Person data file. VEH_NO equals 0 for all records in this data file.

NM12 Non-Motorist Contributing Circumstances

Definition: This data element describes the actions and/or circumstances of this non-motorist that law enforcement indicated may have contributed to the crash.

Additional Information: It selects all that apply. This data element is based on the judgment of the law enforcement officer investigating the crash.

SAS Name: **MTM_CRSH** 2016-2019

The NMDISTRACT Data File

The Nmdistract data file identifies each non-motorist distraction as a separate record. That is, there can be more than one distraction record for each non-motorist. It contains the data elements CASENUM, PSU, PJ, STRATUM, PSUSTRAT, PSU_VAR, REGION, URBANICITY, WEIGHT, VEH_NO, and PER_NO, which are described in the Key Data Elements at the beginning of the Data Element Definitions and Codes section. The data file also contains NMDISTRACT that is described below.

CASENUM, PER_NO, and NMDISTRACT are the unique identifiers for each record. CASENUM, VEH_NO, and PER_NO should be used to merge the Nmdistract data file with non-motorists from the Person data file. VEH_NO equals 0 for all records in this data file.

NM13 Non-Motorist Distracted By

Definition: This data element identifies the attributes that best describe this non-motorist's attention prior to the non-motorist's involvement in this crash. This element reports on the presence of any distractions that may or may not have contributed to the crash.

Additional Information: Distraction, for a non-motorist, occurs when a non-motorist's attention is diverted from the task of navigating in public to some other activity. Also, daydreaming or lost in thought are identified as distractions by NHTSA. Physical conditions/impairments (fatigue, alcohol, medical condition, etc.) or psychological states (anger, emotional, depressed, etc.) are not identified as distractions by NHTSA.

SAS Name: **MNMDSTRD** 2019

12	12	Disabled Vehicle Related (Working on, Pushing, Leaving/Approaching)
14	14	Other
16	16	Movement Along Roadway – Direction Unknown
98	98	Not Reported
99	--	Unknown
--	99	Reported as Unknown

The SAFETYEQ Data File

The Safetyeq data file includes non-motorist safety equipment. It contains the data elements CASENUM, PSU, PJ, STRATUM, PSU_VAR, REGION, URBANICITY, WEIGHT, VEH_NO, and PER_NO, which are described in the Key Data Elements at the beginning of the Data Element Definitions and Codes section. The data file also contains the data elements on the following pages.

CASENUM and PER_NO are the unique identifiers for each record. CASENUM, VEH_NO, and PER_NO should be used to merge the Safetyeq data file with non-motorists from the Person data file. VEH_NO equals 0 for all records in this data file.

Prior to 2017 the Safetyeq data file identified each item of safety equipment as a separate record. That is, there could be more than one safety equipment record for each non-motorist. The data element that captured each item of safety equipment is MSAFEQMT. This element has been moved to the Discontinued Safetyeq Data Elements.

NM14 Non-Motorist Safety Equipment Use

NM14A Non-Motorist Helmet Use

Definition: This data element indicates if the non-motorist was wearing a safety helmet.

Additional Information: This includes all helmets (e.g., bicycle helmet, motorcycle helmet, racing helmets).

Prior to 2019 the Data Element ID was NM13A.

SAS Name: NMHELMET

Attribute Codes

<i>2017</i>	<i>2018- Later</i>	
1	1	No
2	2	Yes
8	8	Not Reported
9	--	Unknown
--	9	Reported as Unknown

NM14B Non-Motorist Use of Protective Pads

Definition: This data element indicates if the non-motorist was wearing padded, shaped attachments to protect specific areas of the body (e.g., elbows, knees, shins) from injury.

Additional Information: Prior to 2019 the Data Element ID was NM13B.

SAS Name: **NMPROPAD**

Attribute Codes

<i>2017</i>	<i>2018- Later</i>	
1	1	No
2	2	Yes
8	8	Not Reported
9	--	Unknown
--	9	Reported as Unknown

NM14C Non-Motorist Use of Other Protective Safety Equipment

Definition: This data element indicates if the non-motorist was using protective safety equipment other than a helmet or pads (e.g., eye wear/face shields, gloves, wrist guards).

Additional Information: Prior to 2019 the Data Element ID was NM13C.

SAS Name: **NMOTHPRO**

Attribute Codes

<i>2017</i>	<i>2018- Later</i>	
1	1	No
2	2	Yes
8	8	Not Reported
9	--	Unknown
--	9	Reported as Unknown

NM14D Non-Motorist Use of Reflective Clothing/Carried Item

Definition: This data element indicates if the non-motorist was wearing or carrying some type of reflective item (e.g., jacket, backpack, vest).

Additional Information: Prior to 2019 the Data Element ID was NM13D.

SAS Name: NMREFCLO

Attribute Codes

	2017	2018- Later	
	1	1	No
	2	2	Yes
	8	8	Not Reported
	9	--	Unknown
	--	9	Reported as Unknown

NM14E Non-Motorist Use of Lighting

Definition: This data element indicates if the non-motorist was using a light on his/her person or on a pedalcycle or personal conveyance for safety purposes, to include flashlights.

Additional Information: Prior to 2019 the Data Element ID was NM13E.

SAS Name: NMLIGHT

Attribute Codes

	2017	2018- Later	
	1	1	No
	2	2	Yes
	8	8	Not Reported
	9	--	Unknown
	--	9	Reported as Unknown

NM14F Non-Motorist Use of Other Preventive Safety Equipment

Definition: This data element indicates if the non-motorist was using preventive safety equipment other than a reflective clothing/carried item or light (e.g., bicycle reflectors and flags, reflectors and triangles on a buggy, hi-glo orange clothing, rollerblade stoppers).

Additional Information: Prior to 2019 the Data Element ID was NM13F.

SAS Name: NMOTHPRE

Attribute Codes

<i>2017</i>	<i>2018- Later</i>	
1	1	No
2	2	Yes
8	8	Not Reported
9	--	Unknown
--	9	Reported as Unknown

Discontinued SAFETYEQ Data Elements

Non-Motorist Safety Equipment Use (discontinued)

Definition: This data element indicates the safety equipment that was used by this non-motorist involved in the crash.

Additional Information: There can be one or more safety equipment responses for each non-motorist.

SAS Name: MSAFEQMT

Attribute Codes

2016

- 1 None Used
- 2 Helmet
- 3 Reflective Clothing (Jacket, Backpack, etc.)
- 4 Protective Pads (Elbows, Knees, Shins, etc.)
- 5 Lighting
- 7 Other Safety Equipment
- 8 Not Reported
- 9 Unknown if Used

The VPICDECODE Data File

The Vpicdecode data file provides specification data for all vehicles derived from the VIN. It contains the data elements CASENUM and VEH_NO, which are described in the Key Data Elements at the beginning of the Data Element Definitions and Codes section. CASENUM and VEH_NO are the unique identifiers for each record. CASENUM and VEH_NO should be used to merge the Vpicdecode data file with the Vehicle or Parkwork data file.

The Vpicdecode data file contains approximately 200 data elements derived from the VIN using NHTSA's Product Information Catalog and Vehicle Listing, known as vPIC. There is one record for each VIN that can be cleanly decoded. If a VIN has issues and cannot be decoded cleanly, there will not be a record. For the definition of clean decoding, and descriptions of the data elements, see the *Product Information Catalog and Vehicle Listing (vPIC) Analytical User's Manual* found in the [NCSA Publications- Manuals and Documentation](#) section of NHTSA's website.

The VINs decoded in CRSS Vpicdecode file are based on two sources:

- The VINs from the police crash report that are coded by CRSS coding staff;
- The VINs that NHTSA obtains from third parties: each year, after CRSS cases are coded, NHTSA uses the license plate number and vehicle registration information to find missing VINs or incomplete VINs in the vehicle records. Once these additional VINs are obtained, the vPICDecode file is created using both sets of VINs.

The VPICTRAILERDECODE Data File

The Vpictrailerdecode data file provides specification data for all trailers derived from the VIN. It contains the data elements CASENUM and VEH_NO, which are described in the Key Data Elements at the beginning of the Data Element Definitions and Codes section. CASENUM, VEH_NO, and TRAILER_NO are the unique identifiers for each record. CASENUM and VEH_NO should be used to merge the Vpictrailerdecode data file with the Vehicle or Parkwork data file.

The Vpictrailerdecode data file contains approximately forty data elements derived from the VIN using NHTSA's Product Information Catalog and Vehicle Listing, known as vPIC. There is one record for each trailer VIN that can be cleanly decoded. If a VIN has issues and cannot be decoded cleanly, there will not be a record. For the definition of clean decoding, and descriptions of the data elements, see the *Product Information Catalog and Vehicle Listing (vPIC) Analytical User's Manual* found in the [NCSA Publications- Manuals and Documentation](#) section of NHTSA's website.

Appendix B: Rules for Derived Data Elements

Rules for Derived Data Elements

Several derived data elements are included in the data files. A derived data element is any element that is not coded (i.e., not directly entered into the system) but translated from existing data. Derived data elements include:

- translations from coded data elements (e.g., “Driver Drinking in Vehicle”);
- translations from collected information (e.g., “Urbanicity”);
- records counted from vehicle and person levels as crash level counters (e.g., “Number of Parked/Working Vehicles”);
- data extracted across several records (e.g., “First Harmful Event”); and
- element combinations (e.g., “Motor Carrier Issuing Authority and ID Number”).

The derived data elements are provided to facilitate analyses and as a common platform for presenting findings. These elements and the translations used to derive them are described in this Appendix.

Crash Level Counts

Number of Motor Vehicles in Transport (MVIT)

Accident. VE_FORMS

(also provided as Vehicle.VE_FORMS, Parkwork.PVE_FORMS, Person.VE_FORMS)

Logic of Derivation

All Vehicle records linked to the crash are used. This data element is derived as the count of all vehicles in the crash where “Unit Type” = 1. It is the number of records in the Vehicle data file.

Number of Parked/Working Vehicles

Accident. PVH_INVL

Logic of Derivation

All Vehicle records linked to the crash are used. This data element is derived as the count of all vehicles in the crash where “Unit Type” is in (2, 3, or 4). It is the number of records in the Parkwork data file.

Number of Persons in Motor Vehicles in Transport (MVIT)

Accident. PERMVIT

Logic of Derivation

All Person records linked to the crash are used. This data element is derived as the count of all people in the crash where “Person Type” is in (1, 2, or 9).

Number of Persons Not in Motor Vehicles in Transport (MVIT)

Accident. PERNOTMVIT

Logic of Derivation

All Person records linked to the crash are used. Prior to 2020 this data element is derived as the count of all people in the crash where “Person Type” is in (3, 4, 5, 6, 7, 8, 10, or 19). Starting in 2020 the attributes are in (3, 4, 5, 6, 7, 10, 11, 12, 13, or 19).

Crash and Vehicle Level Derived Data Elements

Maximum Injury Severity in Crash

Accident.MAX_SEV

Attribute Labels	2016- Later
No Apparent Injury	0
Possible Injury	1
Suspected Minor Injury	2
Suspected Serious Injury	3
Fatal	4
Injured, Severity Unknown	5
Died Prior to Crash	6
No person involved in the Crash	8
Unknown if Injured/Not Reported	9

Logic of Derivation

All Person records linked to the crash are used. If there are no records, then the value 8 is assigned. If there is a single record, then the SAS code for Person.INJ_SEV is used. If there are multiple records, all SAS codes for Person.INJ_SEV are obtained and prioritized. Follow the priority ranking of each attribute as follows: 4, 3, 2, 1, 5, 0, 6, 9.

Maximum Injury Severity in Vehicle
Vehicle.MAX_VSEV

Attribute Labels	2016- Later
No Apparent Injury	0
Possible Injury	1
Suspected Minor Injury	2
Suspected Serious Injury	3
Fatal	4
Injured, Severity Unknown	5
Died Prior to Crash	6
No person in Vehicle	8
Unknown if Injured/Not Reported	9

Logic of Derivation

All Person records linked to the vehicle are used. If there are no records, then the value 8 is assigned. If there is a single record, then the SAS code for Person.INJ_SEV is used. If there are multiple records, all SAS codes for Person.INJ_SEV are obtained and prioritized. Follow the priority ranking of each attribute as follows: 4, 3, 2, 1, 5, 0, 6, 9.

Number Injured in Crash

Accident.NUM_INJ

Attribute Labels	2016- Later
No Person Injured/Property Damage Only Crash	0
Number of Known Injured	x
No Person involved in the Crash	98
All Persons in Crash Are Unknown if Injured	99

Logic of Derivation

All Person records linked to the crash are used. If there are no records, then the value 98 is assigned. If the SAS code for Person.INJ_SEV is 9 for all people in the crash, then the value is 99. If not, the value assigned is the number (count) of Person records where the SAS code for Person.INJ_SEV is between 1 and 5.

Number Injured in Vehicle

Vehicle.NUM_INJV

Attribute Labels	2016- Later
No Person Injured in Vehicle	0
Number of Known Injured	1-97
No Person involved in the Vehicle	98
All Persons in Vehicle Are Unknown if Injured	99

Logic of Derivation

All Person records linked to the vehicle are used. If there are no records, then the value 98 is assigned. If the SAS code for Person.INJ_SEV is 9 for all people in the vehicle, then the value is 99. If not, the value assigned is the number (count) of Person records where the SAS code for Person.INJ_SEV is between 1 and 5.

Alcohol Involved in Crash
Accident.ALCOHOL

Attribute Labels	2016- Later
Alcohol Involved	1
No Alcohol involved	2
No applicable person	8
Unknown	9

Alcohol Involved in Crash is derived based on Police-Reported Alcohol Involvement from the Person data file as follows:

Police Reported Alcohol Involvement

Attribute Labels	2016- Later
No (Alcohol Not Involved)	0
Yes (Alcohol Involved)	1
Not Reported	8
Reported as Unknown	9

Logic of Derivation

Alcohol Involved in Crash is calculated based on drivers and non-motorists [except occupants of motor vehicles not in transport] in the crash and are referred to here as “involved active participants.” This translates to Person Type NOT in 2, 3, or 9.

The following order of alcohol involvement is used. The SAS value for the case was determined by:

- 1 (Alcohol Involved)
 - If “Police Reported Alcohol Involvement” is Yes for any of the involved active participants in the crash,
 - Then Alcohol Involved in Crash should be 1 (Alcohol Involved).
- 2 (No Alcohol Involved)
 - If “Police Reported Alcohol Involvement” is No for ALL of the involved active participants in the crash,
 - Then Alcohol Involvement in Crash should be 2 (No Alcohol Involved).

- 9 (Unknown)

If NOT #1 (Alcohol Involved) and “Police Reported Alcohol Involvement” is Unknown or Not Reported for ANY of the involved active participants,

Then Alcohol Involvement in Crash should be 9 (Unknown).

- 8 (No Applicable Person)

Default value if no active participants coded for this case.

Examples:

Case 1: V1 Driver- alcohol is No, V2 Driver- alcohol is Unknown, one non-motorist- alcohol is No, V3 with the situation that three unknown occupants with none coded the role of driver- alcohol for occ1 is Yes, alcohol for occ2 is No, alcohol for occ3 is Unknown.

Alcohol Involved in Crash is 9 (Unknown).

Case 2: V1 driver, alcohol is Unknown, one non-motorist, alcohol is No,

Alcohol Involved in Crash is 9 (Unknown).

Case 3: V1 driver, alcohol is No, one non-motorist, alcohol is unknown,

Alcohol Involved in Crash is 9 (Unknown).

Note: For a single vehicle crash, if a motor vehicle in transport is listed as having a driver present, but no occupant is coded with the role of driver, then Alcohol Involved in Crash equals 9 (Unknown) unless all occupants are coded No (Alcohol Not involved) or all the occupants are coded Yes (Alcohol Involved). In the case where all occupants are coded No (Alcohol Not Involved) then Alcohol Involved in Crash is 2 (No Alcohol Involved). In the case where all occupants are coded Yes (Alcohol Involved), then Alcohol Involved in Crash is 1 (Alcohol Involved). In the case where not all occupants are coded Yes or No, then Alcohol Involved in Crash equals 9 (Unknown). For a multi-vehicle crash or a crash having non-motorists, the highest priority alcohol value in each vehicle in the case and each applicable non-motorist is taken.

Driver Drinking in Vehicle

Vehicle.VEH_ALCH

Attribute Labels	2016-Later
Alcohol Involved	1
No Alcohol involved	2
No Driver Present/Unknown if Driver Present	8
Unknown	9

Logic of Derivation

- If “Driver Presence” equals 0 (No Driver Present/Not Applicable) or 9 (Unknown), Then “Driver Drinking in Vehicle” is set to 8 (No Driver Present/Unknown if Driver Present).
- If “Driver Presence” equals 1 (Yes) and there is a person in the vehicle where “Person Type” equals 1 (Driver of a Motor Vehicle in Transport), Then “Police-Reported Alcohol Involvement” for the driver is used for the derivation of “Driver Drinking in Vehicle” as follows:

<u>Police-Reported Alcohol Involvement</u>			<u>Driver Drinking in Vehicle</u>	
▪ 0	No (Alcohol Not Involved)	→	2	No Alcohol Involved
▪ 1	Yes (Alcohol Involved)	→	1	Alcohol Involved
▪ 8	Not Reported	→	9	Unknown
▪ 9	Unknown (Police-Reported)	→	9	Unknown

- If “Driver Presence” equals 1 (Yes) and there is **not** a person in the vehicle where “Person Type” equals 1 (Driver of a Motor Vehicle in Transport), Then
 - If “Police Reported Alcohol Involvement” is the same for the occupants of the vehicle where “Person Type” equals 9 (Unknown Occupant Type in a Motor Vehicle in Transport), Then “Driver Drinking in Vehicle” is derived from “Police Reported Alcohol Involvement” as shown above,
 - Else “Driver Drinking in Vehicle” is set to 9 (Unknown).

Example:

V1 Driver- alcohol is No, V2 Driver- alcohol is unknown, one non-motorist- alcohol is No, V3 (driver present) with the situation that three unknown occupants with none coded the role of driver- alcohol for occ1 is Yes, alcohol for occ2 is No, occ3 for alcohol is Unknown.

Driver Drinking in Vehicle for V1 is 2 (No Alcohol Involved), for V2 is 9 (Unknown), for V3 is 9 (Unknown).

Note: If a motor vehicle in transport is listed as having a driver present, but no occupant is coded with the role of driver, then Driver Drinking in Vehicle equals 9 (Unknown) unless all the unknown occupant types (PER_TYP=9) are coded No (Alcohol Not Involved) or all the unknown occupant types are coded Yes (Alcohol Involved). In the case where all the unknown occupant types are coded Yes (Alcohol Involved) then Driver Drinking in Vehicle is 2 (No Alcohol Involved). In the case where all the unknown occupant types are coded Yes (Alcohol Involved) then Driver Drinking in Vehicle is 1 (Alcohol Involved). For example, if there is a vehicle where there is a driver present and there are two unknown occupant types, both coded Yes (Alcohol Involved) but neither is coded as the driver; then Driver Drinking in Vehicle equals 1 (Alcohol Involved). Another example: if there is a vehicle where there is a driver present and there are two unknown occupant types (neither coded as the driver--that is, the police report indicates it is unknown who was actually driving), and one is coded Yes (Alcohol Involved) and the other is coded No (Alcohol Not Involved); then Driver Drinking in Vehicle equals 9 (Unknown).

Atmospheric Conditions
Accident.WEATHER

Attribute Labels	2016-2019	2020-Later
No Additional Atmospheric Conditions	0	--
Clear	1	1
Rain	2	2
Sleet or Hail	3	3
Snow	4	4
Fog, Smog, Smoke	5	5
Severe Crosswinds	6	6
Blowing Sand, Soil, Dirt	7	7
Other	8	8
Cloudy	10	10
Blowing Snow	11	11
Freezing Rain or Drizzle	12	12
Not Reported	98	98
Unknown/Reported as Unknown	99	99

Logic of Derivation

Prior to 2020 this data element is derived from the coded data elements, Accident.WEATHER1 and Accident.WEATHER2. Beginning in 2020 this data element is derived from Weather.WEATHER that allows the coding of all applicable attributes.

The following priority ranking of the attributes is used to derive Accident.WEATHER:

- Snow
- Blowing Snow
- Sleet or Hail
- Freezing Rain or Drizzle
- Rain
- Fog, Smog, Smoke
- Severe Crosswinds
- Blowing Sand, Soil, Dirt
- Other
- Cloudy
- Clear
- Not Reported
- Unknown
- No Additional Atmospheric Conditions

Region of the Country

Accident.REGION

Logic of Derivation

This element is derived from the data element “Primary Sampling Unit (PSU)” where the crash occurred. The country is divided into four regions with each of the 50 States and the District of Columbia falling into one of the regions. Region of the Country, therefore, is based on the State in which the Primary Sampling Unit is located.

Urbanicity

Accident.URBANICITY

Logic of Derivation

This element is derived from the data element “Primary Sampling Unit (PSU)” where the crash occurred. A PSU is considered Urban if the county (or counties) in the PSU has a population of 250,000 or greater, otherwise it is Rural.

Primary Sampling Unit for Variance Estimation

Accident.PSU_VAR

Logic of Derivation

This element is derived from the data elements “Primary Sampling Unit (PSU)” and “Police Jurisdiction” where the crash occurred.

First Harmful Event

Accident.HARM_EV

(also provided as Vehicle.HARM_EV, Parkwork.PHARM_EV, Person.HARM_EV)

Logic of Derivation

This data element is derived from the set of all crash events. Each event in a crash is recorded in chronological order. The data element that records the event is “Sequence of Events” and includes both harmful and non-harmful events. First Harmful Event, therefore, is the first “Sequence of Events” value that is not between codes 60 and 79 (non-harmful events).

Initial Contact Point

Vehicle. IMPACT1, Parkwork.PIMPACT1

(also provided as Person.IMPACT1)

Logic of Derivation

This data element is derived from the set of all crash events for a vehicle. Each event in a crash is recorded in chronological order. The data element that records each impact for a vehicle is “Area of Impact (This Vehicle)” or “Area of Impact (Other Vehicle).” The area of impact is only coded for harmful events, that is “Sequence of Events” values that are not between codes 60 and 79. Initial Contact Point, therefore, is the vehicle’s first recorded Area of Impact value for a harmful event. Note that the vehicle may be “This Vehicle” or the “Other Vehicle” in the crash event.

NCSA Make Model Combined

Vehicle. MAK_MOD, Parkwork. PMAK_MOD

(also provided as Person. MAK_MOD)

Logic of Derivation

This 5-digit data element is the combination of two data elements, the 2-digit “Vehicle Make” code followed by the 3-digit “Vehicle Model” code.

Motor Carrier Identification Number

Vehicle. MCARR_ID, Parkwork. PMCARR_ID

Logic of Derivation

This 11-character data element is the combination of two data elements, the 2-digit “Motor Carrier Issuing Authority” code followed by the 9-character “Identification Number.”

Appendix C: Analytical Classification of Select CRSS Data Elements

Analytical Classification of Select CRSS Data Elements

Several data elements in the CRSS are classified or collapsed according to analytical needs. In various NCSA's published reports and analysis, select CRSS data elements have been given a standard classification. This section shows how CRSS data elements are classified, assisting users in understanding and duplicating statistics presented in NCSA's published reports.

For analytical purposes, fatal crashes and fatalities are extracted from the Fatality Analysis Reporting System (FARS), not CRSS. FARS contains data on a census of fatal traffic crashes within the 50 States, the District of Columbia, and Puerto Rico. To be included in FARS, a crash must involve a motor vehicle traveling on a trafficway customarily open to the public and result in the death of a person (occupant of a vehicle or non-motorist) within 30 days of the crash. Since FARS contains records on all fatal crashes, it is a more accurate representation of fatal crashes and fatalities than the sample contained in CRSS.

It is important to note that these are NCSA's classifications and are subject to modification.

The following tables show the specific coding schemes of select CRSS data elements that are used in NCSA's publications and analysis:

Time of Day/Day of Week

Classification	Data Year and Code
	2016-Later
Time of Day	HOURL (Military)
Daytime (6:00 a.m. – 5:59 p.m.)	6-17
Nighttime (6:00 p.m. – 5:59 a.m.)	0-5, 18-23
Unknown	99
Day of Week	WKDY_I with HOURL_I
Weekday 6 a.m. Monday thru 5:59 p.m. Friday	(WKDY_I =2 and 6<=HOURL_I<=23) or (WKDY_I in (3,4,5)) or (WKDY_I =6 and (0<= HOURL_I <=17)
Weekend 6 p.m. Friday thru 5:59 a.m. Monday	(WKDY_I =6 and 18<= HOURL_I <=23) or (WKDY_I in (1,7)) or (WKDY_I =2 and (0<= HOURL_I <=5))

Vehicle Classification by vPIC Data Elements

Classification	Description	2020-Later
Passenger Cars	<p>Vehicles with VPIC Body Class in the following list:</p> <ul style="list-style-type: none"> • 1 (Convertible/Cabriolet) • 3 (Coupe) • 5 (Hatchback/Liftback/Notchback) • 10 (Roadster) • 13 (Sedan/Saloon) • 15 (Wagon) 	[VPICBODYCLASS] IN (1, 3, 5, 10, 13, 15)
Light Trucks, Vans, and Multi-Purpose Vehicle	<p>Vehicles with VPIC Body Class or Final Stage Body Class⁽¹⁾ in the following list with a GVWR range in Class 1 or 2 (GVWR of 10K lbs or less):</p> <ul style="list-style-type: none"> • 2 (Minivan) • 7 (Sport Utility Vehicle/Multi-Purpose Vehicle) • 8 (Crossover Utility Vehicle) • 9 (Van) • 11 (Truck) • 60 (Pickup) • 95 (Cargo Van) • 111 (Step Van/Walk-in Van) • 119 (Sport Utility Truck) 	<p>([VPICBODYCLASS] IN (2, 7, 8, 9, 11, 60, 95, 111, 119) OR [ICFINALBODY] IN (2, 7, 8, 9, 11, 60, 95, 111, 119)) AND ([GVWR_FROM] IN (11,12) AND [GVWR_TO] IN (11,12))</p>
Light Utility Vehicles	<p>Vehicles with VPIC Body Class or Final Stage Body Class in the following list with a GVWR range in Class 1 or 2 (GVWR of 10K lbs or less):</p> <ul style="list-style-type: none"> • 7 (Sport Utility Vehicle/Multi-Purpose Vehicle) • 8 (Crossover Utility Vehicle) 	<p>([VPICBODYCLASS] IN (7, 8) OR [ICFINALBODY] IN (7, 8)) AND ([GVWR_FROM] IN (11,12) AND [GVWR_TO] IN (11,12))</p>

Classification	Description	2020-Later
Light Pickups/Trucks	<p>Vehicles with VPIC Body Class or Final Stage Body Class in the following list with a GVWR range in Class 1 or 2 (GVWR of 10K lbs or less):</p> <ul style="list-style-type: none"> • 11 (Truck) • 60 (Pickup) • 119 (Sport Utility Truck) 	<p>([VPICBODYCLASS] IN (11, 60, 119) OR [ICFINALBODY] IN (11, 60, 119)) AND ([GVWR_FROM] IN (11,12) AND [GVWR_TO] IN (11,12))</p>
Light Vans	<p>Vehicles with VPIC Body Class or Final Stage Body Class in the following list with a GVWR range in Class 1 or 2 (GVWR of 10K lbs or less):</p> <ul style="list-style-type: none"> • 2 (Minivan) • 9 (Van) • 95 (Cargo Van) • 111 (Step Van/Walk-in Van) 	<p>([VPICBODYCLASS] IN (2, 9, 95, 111) OR [ICFINALBODY] IN (2, 9, 95, 111)) AND ([GVWR_FROM] IN (11,12) AND [GVWR_TO] IN (11,12))</p>
Large Trucks	<p>Vehicles with VPIC Body Class or Final Stage Body Class in the following list with a GVWR range of Class 3 or higher (GVWR greater than 10K lbs) :</p> <ul style="list-style-type: none"> • 7 (Sport Utility Vehicle/Multi-Purpose Vehicle) • 8 (Crossover Utility Vehicle) • 9 (Van) • 11 (Truck) • 60 (Pickup) • 66 (Truck-Tractor) • 95 (Cargo Van) • 111 (Step Van/Walk-in Van) • 119 (Sport Utility Truck) 	<p>([VPICBODYCLASS] IN (7, 8, 9, 11, 60, 66, 95, 111, 119) OR [ICFINALBODY] IN (7, 8, 9, 11, 60, 66, 95, 111, 119)) AND ([GVWR_FROM] IN (13,14,15,16,17,18) AND [GVWR_TO] IN (13,14,15,16,17,18,98,99))</p>

Classification	Description	2020-Later
Medium-Duty Trucks	<p>Vehicles with VPIC Body Class or Final Stage Body Class in the following list with a GVWR range in Classes 3 to 6 (GVWR between 10K and 26K lbs):</p> <ul style="list-style-type: none"> • 7 (Sport Utility Vehicle/Multi-Purpose Vehicle) • 8 (Crossover Utility Vehicle) • 9 (Van) • 11 (Truck) • 60 (Pickup) • 66 (Truck-Tractor) • 95 (Cargo Van) • 111 (Step Van/Walk-in Van) • 119 (Sport Utility Truck) 	<p>([VPICBODYCLASS] IN (7, 8, 9, 11, 60, 66, 95, 111, 119) OR [ICFINALBODY] IN (7, 8, 9, 11, 60, 66, 95, 111, 119)) AND ([GVWR_FROM] IN (13,14,15,16) AND [GVWR_TO] IN (13,14,15,16) >)</p>
Heavy-Duty Trucks	<p>Vehicles with VPIC Body Class or Final Stage Body Class in the following list with a GVWR range in Class 7 or 8 (GVWR greater than 26K lbs):</p> <ul style="list-style-type: none"> • 7 (Sport Utility Vehicle/Multi-Purpose Vehicle) • 8 (Crossover Utility Vehicle) • 9 (Van) • 11 (Truck) • 60 (Pickup) • 66 (Truck-Tractor) • 95 (Cargo Van) • 111 (Step Van/Walk-in Van) • 119 (Sport Utility Truck) 	<p>([VPICBODYCLASS] IN (7, 8, 9, 11, 60, 66, 95, 111, 119) OR [ICFINALBODY] IN (7, 8, 9, 11, 60, 66, 95, 111, 119)) AND ([GVWR_FROM] IN (17,18) AND [GVWR_TO] IN (17,18) >)</p>
Buses	<p>Vehicles with VPIC Body Class or Final Stage Body Class in the following list:</p> <ul style="list-style-type: none"> • 16 (Bus) • 68 (Streetcar/Trolley) • 73 (Bus - School Bus) 	<p>[VPICBODYCLASS] IN (16, 68, 73) OR [ICFINALBODY] IN (16, 68, 73)</p>

Classification	Description	2020-Later
Motorcycles	<p>Vehicles with VPIC Body Class in the following list:</p> <ul style="list-style-type: none"> • 6 (Motorcycle – Standard) • 12 (Motorcycle – Scooter) • 80 (Motorcycle – Sport) • 81 (Motorcycle – Touring/Sport Touring) • 82 (Motorcycle – Cruiser) • 83 (Motorcycle – Trike) • 85 (Motorcycle – Dual Sport/Adventure/Supermoto/On/Off-Road) • 87 (Motorcycle – Small/Minibike) • 90 (Motorcycle – Side Car) • 94 (Motorcycle – Custom) • 98 (Motorcycle – Street) • 100 (Motorcycle – Enclosed Three Wheeled/Enclosed Autocycle) • 103 (Motorcycle – Unenclosed Three Wheeled/Open Autocycle) • 104 (Motorcycle – Moped) • 109 (Motorcycle – Cross County) • 110 (Motorcycle – Underbone) • 114 (Motorcycle – Competition) • 125 (Motorcycle – Unknown Body Class) • 996 (Motorized Bicycle) 	[VPICBODYCLASS] IN (6, 12, 80, 81, 82, 83, 85, 87, 90, 94, 98, 100, 103, 104, 109, 110, 114, 125, 996)
Off-Road Vehicles	<p>Vehicles with VPIC Body Class in the following list:</p> <ul style="list-style-type: none"> • 69 (Off-Road Vehicle – All Terrain Vehicle (ATV) [Motorcycle-style]) • 84 (Off-Road Vehicle – Dirt Bike/Off-Road) • 86 (Off-Road Vehicle – Enduro [off-road long distance racing]) • 88 (Off-Road Vehicle – Go Kart) • 97 (Off-Road Vehicle – Snowmobile) • 105 (Off-Road Vehicle – Recreational Off-Road Vehicle [ROV]) • 113 (Off-Road Vehicle – Motocross [off-road short distance, closed track racing]) • 124 (Off-Road Vehicle – Golf Cart) • 126 (Off-Road Vehicle – Farm Equipment) • 127 (Off-Road Vehicle – Construction Equipment) 	[VPICBODYCLASS] IN (69, 84, 86, 88, 97, 105, 113, 124, 126, 127)

Classification	Description	2020-Later
Low-Speed Vehicles	Vehicles with VPIC Body Class as 4 (Low-Speed Vehicle)	[VPICBODYCLASS]=4
Other	Vehicles with VPIC Body Class or Final Stage Body Class in the following list: <ul style="list-style-type: none"> • 108 (Motorhome) • 117 (Limousine) • 997 (Other, Specify) 	[VPICBODYCLASS] IN (108, 117) OR [ICFINALBODY] IN (108, 117, 997)
Unknown	Vehicles not meeting the criteria specified above.	

⁽¹⁾ Final Stage Body Class is only applicable to vPIC Body Classes that belong to one of the incomplete vehicle classes. See [vPIC Body Class](#) for applicable incomplete body classes.

Vehicle Classification by NCSA Data Elements

Classification	Data Year and Code
	2016-Later
	(BODY_TYP)
Passenger Cars	01-11, 17
Light Trucks & Vans	14-16, 19-22, 28-41, 45-49, or (79 and TOW_VEH =0 or 9)
Large Trucks	60-64, 66, 67, 71, 72, 78, or (79 and TOW_VEH in 1-4)
Motorcycles ¹	80-89
Buses	50-59
Other/Unknown Vehicles	12, 13, 42, 65, 73, 90-97, 98, 99, or (79 and TOW_VEH =5 or 6)
Passenger Vehicles	01-11, 14-22, 28-41, 45-49, or (79 and TOW_VEH=0 or 9)
Utility Vehicles (a.k.a. On/Off Road)	14-16, 19
Pickups ²	30-39
Vans	20, 21, 22, 28, 29
Medium Trucks	60-62, 64, 67, 71
Heavy Trucks	63, 66, 72, 78, or (79 and TOW_VEH in 1-4)
Combination Trucks	(60-63, 64, 67, 71, 72, 78 and TOW_VEH in (1-4)) or 66
Single Unit Trucks	60-63, 64, 67, 71, 72, 78, 79 and TOW_VEH in (0, 5, 6, 9)
Unknown (not in Imputed Body Type)	98, 99

⁽¹⁾ In 2017 new attributes were added to the motorcycle range: motor scooter (84); unenclosed three wheel motorcycle/unenclosed autocycle (1 rear wheel) (85); enclosed three wheel motorcycle/enclosed autocycle (1 rear wheel) (86); unknown three wheel motorcycle type (87).

⁽²⁾ In 2017 attributes compact pickup (30) and standard pickup (31) were deleted and replaced with attribute light pickup (34). In 2018 attribute pickup with slide in camper (32) was deleted.

Injury Severity

CRSS Description	Data Year and Code	Classification
	2016-Later	
No Apparent Injury (O)	0	Not Injured
Died Prior	6	
Possible Injury (C)	1	Injured
Suspected Minor Injury (B)	2	
Suspected Serious Injury (A)	3	
Unknown Injury Severity (U)	5	
Fatal (K)*	4	Killed

* Fatality counts from the FARS are used in NCSA's publications and analysis.

[Return](#)

Person Type

CRSS Description	Data Year and Code		Classification
	2016-2019	2020-Later	
<i>Occupants</i>			
Driver of a motor vehicle in transport	1	1	Driver
Passenger of a motor vehicle in transport	2	2	Passenger
Unknown occupant type of a motor vehicle in transport ⁽¹⁾	9	9	
<i>Non-occupants</i>			
Occupant of a motor vehicle not in transport ⁽²⁾	3	3	Other non-occupant
Occupant of a non-motor vehicle transport device ⁽³⁾	4	4	
Pedestrian	5	5	Pedestrian
Bicyclist	6	6	Pedalcyclist
Other Cyclist	7	7	Pedalcyclist
Persons on personal conveyances	8	-	Other non-occupant
Persons in/on buildings	10	10	
Person on motorized personal conveyance	-	11	
Person on non-motorized personal conveyance	-	12	
Person on personal conveyance, unknown if motorized or non-motorized	-	13	
Unknown type of non-occupant	19	19	Unknown non-occupant type

⁽¹⁾ Customarily, “Unknown Occupant” is placed in the “Passenger” category, unless they need to be distinguished from “Passengers.”

⁽²⁾ “Occupant of motor vehicle not in transport” refers to occupants of parked motor vehicles (any motor vehicle stopped off the roadway). This includes occupants of motor vehicles in motion outside the trafficway boundaries.

⁽³⁾ “Occupant of non-motor vehicle transport device” refers to people riding in an animal-drawn conveyance, on an animal, or injured occupants of railway trains, etc.

[Return](#)

Restraint System Use

The restraint use classification should be used for all vehicle occupants, except for motorcyclists. However, most restraint use analysis focuses on child safety seat use or belt use for passenger vehicle occupants. Be sure to include the appropriate vehicle body type occupied in your selection criteria - see the section on [Vehicle Body Type Classification](#).

CRSS Description	Data Year and Code			Classification
	2016	2017-2018	2019-Later

Appendix D: Auxiliary Data Files

Auxiliary Data Files

A set of auxiliary files contains elements derived from the CRSS datasets to make it easier to extract certain data classifications and topical areas, such as commonly used age groups, speeding involved crashes, and distraction involved crashes. There is an Accident (acc_aux), Vehicle (veh_aux), and Person (per_aux) level auxiliary file for each year of data. A listing of data elements in each file follows:

Accident File (acc_aux)

Variable	Description
A_CRAINJ	Crash Injury Type
A_CT	Crash Type
A_D15_19	Crashes Involving a Young Driver (Aged 15-19)
A_D15_20	Crashes Involving a Young Driver (Aged 15-20)
A_D16_19	Crashes Involving a Young Driver (Aged 16-19)
A_D16_20	Crashes Involving a Young Driver (Aged 16-20)
A_D16_24	Crashes Involving a Young Driver (Aged 16-24)
A_D21_24	Crashes Involving a Young Driver (Aged 21-24)
A_D65PLS	Crashes Involving an Older Driver (Aged 65+)
A_DOW	Day of Week
A_HR	Involving a Hit and Run
A_INTER	Interstate
A_INTSEC	Intersection
A_JUNC	Junction
A_LT	Involving a Large Truck
A_MANCOL	Manner of Collision
A_MC	Involving a Motorcycle
A_PED	Involving a Pedestrian
A_PEDAL	Involving a Pedalcyclist
A_RELRD	Relationship to the Trafficway
A_ROLL	Involving a Rollover
A_SPCRA	Involving Speeding
A_TOD	Time of Day

Vehicle File (veh_aux)

Variable	Description
A_BODY	Vehicle Type
A_IMP1	Initial Impact Point
A_MOD_YR	Vehicle Model Year
A_SPVEH	Speeding Vehicle
A_VROLL	Rollover

Person File (per_aux)

Variable	Description
A_AGE1	Age Group 1
A_AGE2	Age Group 2
A_AGE3	Age Group 3
A_AGE4	Age Group 4
A_AGE5	Age Group 5
A_AGE6	Age Group 6
A_AGE7	Age Group 7
A_AGE8	Age Group 8
A_AGE9	Age Group 9
A_EJECT	Ejection
A_HELMUSE*	Helmet Use (use for motorcyclists only)
A_LOC	Non-Motorist Location
A_PERINJ	Injury Type
A_PTYPE	Person Type
A_RESTUSE*	Restraint Use (use for all vehicle occupants except motorcyclists)

*Note A_HELMUSE focuses on motorcycle helmet use and should be used when doing helmet use analysis for motorcyclists. When using these variables, be sure to include the appropriate body types in your selection criteria as well (see [Vehicle Classification by NCSA Data Elements](#)). For the specific type of restraint system used – child seat, lap belt, shoulder belt, DOT-compliant motorcycle helmet, etc. – refer to the [Restraint System Use](#) (REST_USE) and [Helmet Use](#) (HELM_USE) in the Person data file.

Appendix E: Summary Statistics

Summary Statistics

The following two tables provide a summary of descriptive statistics from the CRSS data files. Table 1: Unweighted Sample represents the actual number of records and Table 2: Weighted Sample represents the national estimates. These statistics provide the analyst a benchmark to compare against numbers obtained from the analytical data files.

Table 1: Unweighted Sample

Year	Crashes	Vehicles (in Transport)	People	Drivers	Occupants	Pedestrians	Pedalcyclists
2016	46,511	82,149	117,759	82,000	113,405	2,257	1,576
2017	54,969	97,625	138,913	97,388	133,408	2,881	1,946
2018	48,443	86,105	120,230	85,916	115,774	2,444	1,436
2019	54,409	96,717	135,410	96,488	129,980	2,949	1,802
2020	54,745	94,718	131,962	94,500	126,460	2,882	1,923

Table 2: Weighted Sample

Year	Crashes	Vehicles (in Transport)	People	Drivers	Occupants	Pedestrians	Pedalcyclists
2016	6,821,129	12,094,306	16,617,091	12,074,087	16,386,624	95,492	69,929
2017	6,452,285	11,547,079	15,758,853	11,521,902	15,557,000	78,671	55,067
2018	6,734,416	12,049,038	16,208,490	12,024,889	15,997,232	81,573	51,286
2019	6,755,841	12,144,348	16,279,944	12,118,123	16,069,748	83,296	54,219
2020	5,250,837	9,145,835	12,156,001	9,126,739	11,997,178	61,799	43,195

Drivers: PERSON TYPE = 1

Pedestrians: PERSON TYPE = 5

Occupants: PERSON TYPE IN (1,2,9)

Pedalcyclists: PERSON TYPE IN (6, 7)

Appendix F: Standard Errors

Standard Errors

The estimates generated using CRSS data are subject to sampling errors because they are based on a probability sample of crashes instead of all crashes. The sampling error is a measure of the variability of an estimator from its mean under repeated sample selections. The magnitude of sampling error depends on the study variable, the estimator used, and the CRSS sample design.

For various reasons, it is necessary to use design features such as stratification, clustering, and unequal selection probabilities to select the CRSS probability sample. As a result, the CRSS sample is not a simple random sample. Failing to consider these design features in estimation can cause bias to both CRSS point estimates and the associated standard error estimates.

Estimation methods and computer software have been developed to make estimates from complex survey data like CRSS. Specialized procedures for complex survey data analysis, such as SAS PROC SURVEY procedures and SUDAAN procedures, should be used for CRSS data analysis along with proper design statements. A SAS PROC SURVEY procedure and a SUDAAN procedure are provided below as examples of CRSS estimation. See the NHTSA Technical Report [Crash Report Sampling System: Design Overview, Analytic Guidance, and FAQs](#) for some basic concepts of complex survey data analysis and more examples.

SAS and SUDAAN Examples for Single Year CRSS Estimation

/*SAS Example*/

```
PROC SURVEYFREQ DATA=IMPUTED.ACCIDENT VARMETHOD=JK;  
    STRATA PSUSTRAT;  
    CLUSTER PSU_VAR;  
    TABLES MAXSEV_IM;  
    WEIGHT WEIGHT;  
RUN;
```

/*SUDAAN Example*/

```
PROC CROSSTAB DATA=IMPUTED.ACCIDENT DESIGN=JACKKNIFE NOTSORTED;  
    NEST PSUSTRAT PSU_VAR;  
    WEIGHT WEIGHT;  
    TABLES MAXSEV_IM;  
    CLASS MAXSEV_IM;  
    PRINT NSUM="SAMSIZE" WSUM="POPSIZE" SEWGT;  
RUN;
```

For readers who do not have access to the specialized software, the generalized variance function (GVF) method can be used to generate ballpark standard error estimates for a large quantity of estimates in a simpler way. In this approach, it is assumed that in CRSS, the standard error (Ste)

of a point estimate X can be approximated by a known generalized variance function f of X indexed by estimated parameters, say, a , b , and c :

$$Ste \approx f(X; a, b, c)$$

The survey statisticians normally provide the estimated parameters a , b , c and specify the GVF form $f(X; a, b, c)$. To have a quick estimate of the standard error of X , the data user simply first estimates X and plugs X into $f(X; a, b, c)$ to calculate Ste .

In 2020 NHTSA conducted a study to determine the GVFs for CRSS. The CRSS GVF was determined as:

$$ste(X) = e^{a+b*\ln(X)+c*\ln^2(x)}$$

For more detailed information about NHTSA's CRSS GVF study, see [Crash Report Sampling System: Generalized Variance Functions](#).

The following table lists estimated coefficients for crash, vehicle, and person level GVFs since 2016.

Estimated coefficients of CRSS GVFs since 2016

Year	Crash Level Coefficients	Vehicle Level Coefficients	Person Level Coefficients
2016	a = 1.92772 b = 0.38750 c = 0.01947	a = 1.17146 b = 0.53866 c = 0.01425	a = 1.79032 b = 0.40622 c = 0.01930
2017	a = 2.33171 b = 0.30826 c = 0.02344	a = 1.43152 b = 0.48824 c = 0.01629	a = 2.05394 b = 0.35287 c = 0.02119
2018	a = 2.33242 b = 0.31521 c = 0.02258	a = 1.69299 b = 0.44262 c = 0.01787	a = 2.02774 b = 0.35777 c = 0.02075
2019	a = 2.19494 b = 0.33465 c = 0.02185	a = 1.70176 b = 0.43713 c = 0.01826	a = 2.14416 b = 0.32619 c = 0.02238
2020	a = 1.81266 b = 0.38881 c = 0.01959	a = 1.69637 b = 0.42507 c = 0.01877	a = 1.88630 b = 0.36439 c = 0.02074

Example 1: To use these GVFs to estimate the standard errors, use the vehicle level “hit-and-run” indicator variable HITRUN_IM as an example. The total number of “hit-and-run” vehicles in 2018 CRSS is estimated as $X = 817,573$ (the summation of the weights of all “hit-and-run” vehicles). Using the 2018 vehicle level model coefficients listed in the table above, the corresponding GVF standard error estimate is:

$$ste(X) = e^{1.69299+0.44262*\ln(817,573)+0.01787*(\ln(817,573))^2} = 61,756$$

At the end of this section, tables of pre-calculated point and GVF standard error estimates are also provided from 2016. Alternatively, these tables can also be used to estimate standard errors.

Example 2: For the “hit-and-run” point estimate $X = 817,573$, there is no standard error estimate in the 2018 CRSS GVF Standard Error Estimate table below. We need to make approximation by interpolation. The following is an excerpt of the 2018 CRSS GVF Standard Error Estimate table around estimate $X = 817,573$ at vehicle level:

2018 CRSS GVF Standard Error Estimates	
Vehicle	
Estimate (X)	Standard Error*
800,000	60,500
900,000	67,500

$X = 817,573$ is between $X = 800,000$ and $X = 900,000$. We approximate the standard error for estimate $X = 817,573$ by interpolation as the following:

$$ste(X) = 60,500 + \frac{817,573 - 800,000}{900,000 - 800,000} * (67,500 - 60,500) = 61,730$$

Example 3: GVFs may also be used to estimate the standard error of a proportion estimate. Here, the proportion estimate is referred to as the ratio of two total estimates:

$$\hat{R} = \frac{\hat{X}_d}{\hat{X}_p}$$

where \hat{X}_p is the total estimate of variable X (numeric or categorical) for population p , \hat{X}_d is the total estimate of variable X for domain d within population p . So, in general $\hat{X}_d \leq \hat{X}_p$.

The GVF for the standard error estimate of the above proportion estimate is:

$$ste(\hat{R}) = \hat{R} \sqrt{\frac{var(\hat{X}_d)}{\hat{X}_d^2} - \frac{var(\hat{X}_p)}{\hat{X}_p^2}}$$

For more discussion on this formula, see [Crash Report Sampling System: Generalized Variance Functions](#).

In Example 1, it is estimated $\hat{X}_d = 817,573$ “hit-and-run” vehicles in 2018. This comprises 6.7854% of total vehicles involved in police reported crashes ($X_p=12,049,038$ – the summation of the weights of all sampled vehicles). To estimate the associated standard error of this proportion estimate $\hat{R} = 6.7854\%$, notice:

$$\begin{aligned} var(\hat{X}_d) &= ste^2(X_d) = 61,756^2 \\ var(\hat{X}_p) &= \left[e^{1.69299 + 0.44262 * \ln(12,049,038) + 0.01787 * (\ln(12,049,038))^2} \right]^2 = 856,137^2 \\ ste(\hat{R}) &= 6.7854\% * \sqrt{\left(\frac{61,756}{817,573} \right)^2 - \left(\frac{856,137}{12,049,038} \right)^2} \approx 0.17\% \end{aligned}$$

In some cases, this method still generates imaginary number standard error estimate due to approximation and rounding. It should be noted that the CRSS GVF is mainly for the standard error of the total estimates. For estimates that are non-linear in totals such as percentage, ratio, and regression estimates, special software should be used in general.

Appendix G: Special Notes for Analysts

Special Notes for Analysts

2018 Increase in National Estimate of Property Damage Only (PDO) Crashes Due to Change in Police Reporting Procedures

Motor vehicle crashes that include fatalities, injuries, or property damage in excess of a pre-determined dollar amount are considered reportable crashes. Previously, at five CRSS sampled data collection sites, police officers could report the property damage costs to vehicles involved in a crash as “Unknown.” Due to updates to the State’s reporting criteria for these data collection sites, “unknown” property damage cost was removed as an option. This change converted many PDO crashes with unknown property damage costs that were previously non-reportable crashes into reportable crashes in 2018. This in turn caused the increase of the national PDO crash estimate.

Analysis of Pedestrian and Bicycle Crashes Around Intersections

When using the Accident, Person, and Pdtype data files to study pedestrian and cyclist crashes, care must be taken when describing their locations in and around intersections.

The Accident data file contains the data element, “Relation to Junction-Specific Location.” This element identifies the location of the “First Harmful Event” of the crash and not necessarily the location of any pedestrian or bicyclist involved. In addition, this element’s attributes have specific definitions for *Intersection* (in the intersection) and *Intersection-Related*.

The Person data file contains the data element, “Non-Motorist Location at Time of Crash.” This element employs the defined concepts of *At Intersection* and *Not at Intersection*, but does not include the concept of *Intersection-Related*.

Finally, the Pdtype data file contains the data elements, “Crash Location – Pedestrian,” “Crash Location – Bicycle,” “Pedestrian Position,” and “Bicyclist Position.” These elements employ the defined concepts of *At Intersection*, *Not at Intersection*, and *Intersection Related* (defined somewhat differently from the Accident file concept).

The following graphics may be helpful aids in conjunction with the FARS/CRSS Coding and Validation Manual and the Pedestrian-Bicyclist Crash Typing Manual:

C21b RELATION TO JUNCTION

02 (Intersection)

02 (Intersection) is used when the **FIRST HARMFUL EVENT** occurs in an area which:

- (1) contains a crossing or connection of two or more roadways not classified as a driveway access, and
- (2) is embraced within the prolongation of the lateral curb lines or, if none, the lateral boundary lines of the roadways.

03 (Intersection-Related)

03 (Intersection-Related) means that the **FIRST HARMFUL EVENT**:

- (1) occurs on an approach to or exit from an intersection and
- (2) results from an activity, behavior, or control related to the movement of traffic units through the intersection.

NM10 NON-MOTORIST LOCATION AT TIME OF CRASH

AT INTERSECTION

"At intersection" means: The **person** is on a roadway (travel lanes) either:

- (1) in the intersection,
- (2) in an area between a crosswalk and the perimeter of the intersection, or
- (3) in a crosswalk (whether marked or unmarked) adjacent to an intersection. If there are no crosswalks, "at intersection" means only the intersection, which is the area embraced within the prolongation of the lateral curb lines or, if none, the lateral boundary lines of the roadways.

NOT AT INTERSECTION

The **person** is on a roadway (travel lanes), but not "At Intersection."

PB31/PB31b Pedestrian/Bicycle Crash Location

AT INTERSECTION

1 (At Intersection) is used when a **person** is on a roadway (travel lanes):

- (1) in the intersection,
- (2) in an area between a crosswalk and the perimeter of the intersection,

OR

- (3) in a crosswalk (whether marked or unmarked) adjacent to an intersection.

INTERSECTION RELATED

2 (Intersection-Related) is used when a **person** is:

- within the trafficway 50 feet out from the perimeter of an "At intersection" area including the entire cross section of the trafficway (e.g., medians, turn lanes, bike lanes, parking lanes, shoulders, sidewalks, etc.)

OR

- the crash is related to the flow of traffic through an intersection (e.g., the result of queuing traffic).

NOT AT INTERSECTION

3 (Not At Intersection) is used when a **person** is:

- within the trafficway more than 50 feet out from the perimeter of an "At Intersection" area
- AND**
- the crash is not identified as related to the movement of the traffic units through an intersection.

This includes the entire cross section of the trafficway (e.g., medians, turn lanes, bike lanes, parking lanes, shoulders, sidewalks, etc.).

This attribute is the default when the case materials give no indication that the crash is within 50 feet of an intersection.

Appendix H: Notable Changes

Notable Changes

Addition of Automated Driving System Data Elements

Automated Driving System (ADS) data elements were added to CRSS to start collecting information on autonomous vehicles in 2019. Motor vehicle Automated Driving Systems are defined by the Model Minimum Uniform Crash Criteria (MMUCC), 5th ed., as "The hardware and software that are collectively capable of performing part or all of the dynamic driving task on a sustained basis; this term is used generically to describe any system capable of level 1-5 driving automation." The automation level refers to the SAE International standard (SAE J3016). For details on Automated Driving Systems, see NHTSA's website.

Three ADS data elements were added: one to capture the presence of an Automation System or Systems in the vehicle (ADS_PRES); a second to capture the highest level of automation present in the vehicle (ADS_LEV); and a third to capture the highest level of automation that was known to have been engaged in this vehicle at the time of the crash (ADS_ENG). Currently, information on ADS is not available on most crash reports and is limited in the data decoded from VINs, but States are beginning to update crash reports to collect information on autonomous vehicles. The addition of these data elements to CRSS prepares for future enhanced collection of ADS in vehicles involved in crashes.

Separation of Restraint System/Helmet Use into Two Data Elements

The 2019 change to *Restraint System/Helmet Use* is in response to more vehicle types where the use of both helmets and belt restraints are possible (e.g., three-wheel motorcycles and ROVs). Splitting the data element into two data elements, *Restraint System Use* and *Helmet Use*, allows both pieces of information to be captured. Analysts will be able to examine the varying State safety equipment laws for both seat belt and helmet use, and will no longer need to rely on focus groups and observational studies on use. *Restraint System Use* retained the SAS name REST_USE and the new SAS name for *Helmet Use* is HELM_USE.

A similar change to *Indication of Misuse of Restraint System/Helmet* was made to correspond to the change in *Restraint System/Helmet Use*. This data element was also split into two new data elements, *Restraint System Misuse* and *Helmet Misuse*. *Restraint System Misuse* retained the SAS name REST_MIS and the new SAS name for *Helmet Misuse* is HELM_MIS.

Addition of Attributes for Incident Responders

The *Related Factors–Driver Level* and *Related Factors–Person Level* data elements were modified in 2019 to capture information on specific types of emergency services personnel, tow operators, and transportation workers involved in crashes. This may provide more detail for analyses and evaluation of "move over" laws, which require other drivers to slow down and move over for emergency vehicles and hazard vehicles. Specifically, attribute 86 (Emergency Services Personnel) was replaced with 94 (Emergency Medical Services Personnel), 95 (Fire Personnel), 96 (Tow Operator), and 97 (Transportation [maintenance workers, safety service patrol operators, etc.]). Existing attribute 87 (Police or Law Enforcement Officer) remains unchanged.

Addition of the Nmdistract Data File and Non-Motorist Distracted By Data Element

The data element *Non-Motorist Distracted By* was added to CRSS in 2019 to begin capturing non-motorist distractions. Previously CRSS only captured distractions for drivers of motor vehicles in transport. The data element is defined as identifying the attributes that best describe the non-motorist's attention prior to their involvement in the crash. Distraction, for a non-motorist, occurs when a non-motorist's attention is diverted from the task of navigating in public to some other activity. Also, daydreaming or lost in thought are identified as distractions by NHTSA. Physical conditions/impairments (fatigue, alcohol, medical condition, etc.) or psychological states (anger, emotional, depressed, etc.) are not identified as distractions by NHTSA.

Non-Motorist Distracted By is structured the same as the current *Driver Distracted By* data element, both of which allow all applicable attributes to be recorded. Therefore, a separate Nmdistract data file is necessary to store (potentially) multiple distraction records for each non-motorist. Details on this new data element and data file can be found in [The Nmdistract Data File](#) section.
